Familiarization workshop of the CODEVMET-AFI project

Nairobi, 6 - 10 March 2023

Methodology for conducting analysis of State situation and identification of possible solutions

Presented by the Secretariat

Goals

- Assess the State/Organization system against the CODEVMET Documents, Identify gaps and Propose a corrective action plan

References and Method of Analysis

State & MET Service Provider Documens to be analyzed	CodevMET Safety Oversight Tool – CodevMET QMS Impl. Tool	Assessment method
• **Documents** for **establishing** and **implementing** the safety oversight system in the MET field • **QMS MET Implementation** Documents	• **CodevMET Safety Oversight Package** • **CodevMET QMS Implementation Package**	• CODEVMET KITS are the basic reference • The State/Service Provider system is to be compared with the CodevMET corresponding documents • Deviations should be well identified and documented. • A plan of action should be proposed to address the identified gaps.
