Windows

Do you want to change the color scheme to improve performance?

Windows has detected your computer's performance is slow. This could be because there are not enough resources to run the Windows Aero color scheme. To improve performance, try changing the color scheme to Windows 7 Basic. Any change you make will be in effect until the next time you log on to Windows.

- Change the color scheme to Windows 7 Basic
- Keep the current color scheme, but ask me again if my computer continues to perform slowly
- Keep the current color scheme, and don't show this message again
