ICAO Middle East Regional Office

Certification of Aerodromes Obligations of the Government Regulator Obligation of the Aerodrome Operator

Nawal A. Abdel Hady
Regional Officer, Aerodromes and Ground Aids
ICAO Middle East Regional Office, Cairo

Content

→ Objectives and Basic Background

★ Obligations of the Government Regulator

★ Obligations of the Aerodrome Operator

Objectives:

- **★**Aerodrome safety
- ★Prevention of accidents
- ★Reduction/elimination of deficiencies
- ★Aerodrome safety management system
- ★CAA aerodrome safety oversight and certification
- ★ICAO USOAP aerodromes audits

Aerodromes Basic Background

★ National Legislations

★ National Standards and Regulations

★ ICAO Standards and Recommended Practices – Annex 14, Volume I and other relevant Specifications

Context

- ★ Verification of the aerodrome data in the aerodrome manual
- ★ On-site verification and audits of aerodrome operating procedures
- On-site checking and testing of aerodrome facilities and equipment
- ★ Flying assessments and aeronautical studies at aerodromes
- ★ General duties

Verification of the aerodrome data in the aerodrome manual

- ★ Verification includes details of:
 - the location of the aerodrome;
 - the name and address of the aerodrome operator;

Verification of the aerodrome data in the aerodrome manual

Cont.

★the movement area;

★the runway declared distances available;

★aeronautical ground lighting;

Verification of the aerodrome data in the aerodrome manual

Cont.

★ground services; and

★notices of special conditions and procedures, if any.

On-site verification and audits of aerodrome operating procedures

- ★ On-site verification include:
 - the overall aerodrome safety management system;
 - ★ the aerodrome emergency plan and periodic aerodrome emergency exercises;
 - rescue and fire-fighting;
 - inspection and maintenance of aeronautical ground lighting;

On-site verification and audits of aerodrome operating procedures

- ★promulgation of changes to published aerodrome information;
- ★the prevention of unauthorized entry to the aerodrome, particularly the movement area and protection of the public against jet or propeller blast;

On-site verification and audits of aerodrome operating procedures

- ★the operator's daily inspection of the aerodrome;
- ★the planning and carrying out of aerodrome construction and maintenance work including compliance with construction safety requirements;

On-site verification and audits of aerodrome operating procedures

- ★apron management and parking control;
- ★the control of vehicles operating on or in the vicinity of the movement area;
- ★wildlife hazard management;
- the monitoring of obstacle limitation surfaces and notification;

On-site verification and audits of aerodrome operating procedures

- ★the removal of disabled aircraft;
- ★hazardous materials, including aviation fuel;
- ★the protection of radar and navigational aids; and
- ★low-visibility operations.

On-site checking and testing of aerodrome facilities and equipment

- On-site checking and testing includes:
 - ★ the dimensions and surface conditions of runways, taxiways, stopways, runway end safety areas, runway and taxiway strips, shoulders and aprons;
 - ★ aeronautical ground lighting systems including flight check records;

On-site checking and testing of aerodrome facilities and equipment

- ★standby power;
- ★landing direction indicators and wind direction indicators, aerodrome markings and markers;
- ★guidance signs and warning signs in the movement area;
- ★aerodrome maintenance equipment;
- ★disabled aircraft removal plan;

On-site checking and testing of aerodrome facilities and equipment

- ★wildlife control equipment;
- ★the presence of obstacles in obstacle limitation surfaces;
- ★runway visual range measuring equipment;
- ★the presence of lights that may endanger aircraft safety;

On-site checking and testing of aerodrome facilities and equipment

Cont.

★rescue and fire-fighting equipment;

★fuelling facilities; and

★runway surface friction measuring equipment.

Flying assessments and aeronautical studies at aerodromes:

★ Incorporation with the Flight
Operations Unit of the CAA and other
specialists as required, organize flying
assessments at aerodromes and
conduct aeronautical studies, if and
where permitted by the Specifications.

General Duties

All other functions related to the certification of aerodromes including:

★ Receiving and processing of expressions of interest and applications for aerodrome certificates;

General Duties

- processing requests for the amendment, transfer or surrender of certificates or requests for interim certificates;
- Reporting to AIS; initiating NOTAMs and

General Duties

Cont.

★Determining appropriate enforcement action in the event of non-compliance with the regulations.

Context

- Provision, operation and maintenance of aerodrome facilities and services in accordance with ICAO Specifications and National Regulations
- Competence of operational and maintenance personnel
- ★ Preparation of aerodrome manual
- ★ Submitting, to the satisfaction of CAA, all requirements, for Possession of an aerodrome certification

- ★ Implementation of Aerodrome safety management systems no later than 24 November 2005
- ★ Notifying and reporting to CAA, ATC and Pilots any changes to the aerodrome facilities, equipment and level of service planned in advance and of inaccuracies in AIS publications
- ★ General Duties

Provision, Operation and maintenance of facilities and services

- ★ Ensure compliance with ICAO SARPS contained in Annex 14 Volume I and relevant specifications and National Regulations for facilities and Services to be provided at an aerodrome
- ★ Ensure that the Aerodrome facilities and services are in accordance with standards, rules and practices

Provision and maintenance of facilities and services

- ★ Ensure that the aerodrome operating procedures make satisfactory provision for the safety of aircraft
- ★ Notify differences/deviations from Aerodrome standards specified in Volume I to Annex 14 and national regulations

Competence of operational and maintenance personnel

★ Employ an adequate number of qualified and skilled personnel to perform all critical activities for aerodrome operation and maintenance

★ Implement a programme to upgrade the competency of the personnel

Preparation of Aerodrome Manual

- ★ An aerodrome manual shall:
 - ★ be typewritten or printed, be in a format that is easy to revise, organized and signed by the aerodrome operator
- ★ Information to be included in the aerodrome manual:
 - ★ Part 1: General Information
 - ★ Part 2: Particulars of the Aerodrome Site
 - → Part 3: Particulars of the Aerodrome Required to be reported to the aeronautical information Service (AIS)

Preparation of Aerodrome Manual

Cont.

★ Part 4: Particulars of the Aerodrome Operating Procedures and Safety Measures

★ Part 5: Aerodrome Administration and Safety Management System

Operator

Covering, to the satisfaction of CAA, all requirements, for Possession of an aerodrome certification

- ★ All international aerodrome operators must be in possession of an aerodrome certification no later than 27 November 2003 according to ICAO SARPS and National Regulations
- ★ The expression of interest for aerodrome certification should include a flight operations assessment by CAA to ensure that the operation of an aerodrome at the location specified in the application will not endanger the safety of aircraft operation.

Implementation of Aerodrome safety management systems

- ★ Establishing a SMS for aerodrome for
 - ensuring that operations are carried out in a demonstrably controlled way and are improved where necessary
 - ★ oblige and monitor all users of the aerodrome that are performing activities at the aerodrome to comply with operational requirements laid down by the Operator

Implementation of Aerodrome safety management systems

- ★ Arrange for an internal safety audit of the safety management system
- ensure that the audit reports are prepared by suitably qualified safety experts

Notifying and reporting

- ★ Adhering to the requirement to notify and report to CAA, ATC and pilots within the time limits required,
- ★ Arranging for immediate notification for ATC and the flight operation unite to receive immediate notice detailing:
 - ★ obstacles, obstructions and hazards,
 - ★ reduction in the level of service as set out in any of AIS publications,

Notifying and reporting

- Closure of any part of the movement aria of the aerodrome, and
- ★ Any other condition that might affect aviation safety at the aerodrome
- ★ Immediate notification directly to pilots when they are affected by that circumstance

General Duties

All other functions related to the certification of aerodromes including:

- ★ Submitting and processing of expressions of interest and applications for aerodrome certificates
- ★ Ensure free access of State CAAauthorized inspectors to carry out safety audits, inspection

General Duties

- ★ Conduct special inspections as circumstance require, to insure aviation safety
- Remove obstructions that is likely hazardous, from the aerodrome surface
- ★ Post hazard warning notices when low flying aircraft at or near an aerodrome are likely to be hazardous to people or vehicle traffic
