

# Automatic Document Authentication

*regula*

forensic science systems

[www.regulaforensics.com](http://www.regulaforensics.com)

**established in 1992**

**Today Regula is a group of companies located**

**Regula – Minsk, Belarus**

**Regula Baltija – Daugavpils, Latvia**

**Regula Rus – Moscow, Russian Federation**

**Regula Forensics – Washington, USA**

**Regula Brazil – Rio de Janeiro, Brazil**

**Regula AD – Kiev, Ukraine**

**Partners/Distributors – more than 40 countries and regions globally**

# Regula Products

Magnifiers

Compact devices

Video spectral magnifiers

Visualizer of magnetic properties

Spectral Luminescent microscope

Video spectral comparators

Vehicle inspection devices

Spectral Luminescent microscope

Bullet speed measuring devices

Magneto-optical device for VIN examinations

Visualizer of magnetic properties

Magnetic ink scanner

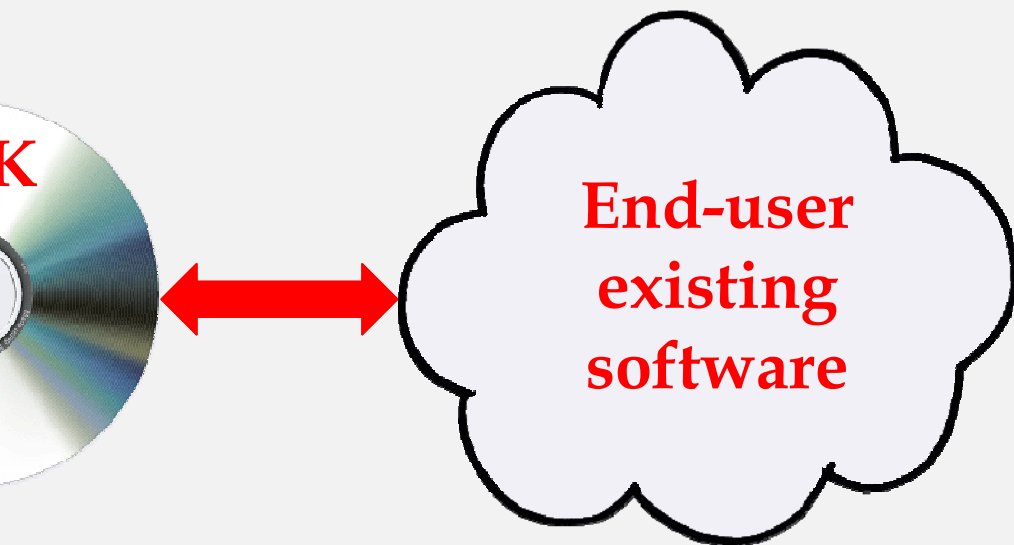

## Atlas of Passports:

- **8** volumes
- **200** documents per volume
- **1** page per document

## Databases:

Passports:	1655 documents
Drivers Licenses:	475 documents
Banknotes:	2109 documents

check

- MRTD with basic checks  
2 seconds

- Enrolled MRTD with up to 10 checks  
- 3 seconds

- eMRTD with up to 22 checks  
- 5 seconds (average time  
which depends on chip)

# Conclusions

**Software solutions become more reliable;**

**Any secure document can be processed – passport, driver's license, etc.;**

**Any scanner can be used for document reading and authentication but specialized devices with multiple light sources are preferred;**

**Automatic verification allows better inspection of documents, not only by law enforcement agencies but also by commercial institutions.**

**Thank you!**
