

Financing Sainarayan A Environment Branch

Assistance and Financing for International Aviation Emissions Reductions

OVERVIEW

Assembly Resolution A38-18 required ICAO Council

Facilitate access to existing and new financial resources, technology transfer, and capacity building for developing countries

Consolidate and build on the partnership with other International Organizations to meet the assistance needs of ICAO's member States

Initiation of specific measures to assist developing Sates

Synergies and constructive engagement among ICAO, Member States, stakeholders and other international organizations

Assistance to Members States through dissemination on best practices and the provision of guidance

- Sources and Instruments
- Challenges and Opportunities
- Financing (Some Examples)
- ICAO's key role

ICAO ENVIRONMENT SOURCES - ADAPTATION FINANCING

Adaption Measures:

Those activities undertaken by stakeholders to manage the consequences of climate change.

Fund	Purpose	Administered by
Least Developed Countries Fund (LDCF)	Support the preparation and implementation of NAPAs (National Adaptation Program of Actions)	Global Environment Facility (GEF)
Adaptation Fund (AF)	Support long term adaptation measures to impacts of climate change	Global Environment Facility (GEF)
Global Climate Change Alliance (GCCA)	Bilateral initiative of the European Union to support most vulnerable countries to adapt to the effects of climate change	European Commission (EC)
Green Climate Fund (GCF)	Mechanism to transfer money from the developed to developing countries to assist them in their adaptation and mitigation measures	UNFCCC

2012 Adaptation Financing was USD \$20-24 billion as part of the total USD \$ 359 billion for **Annual Global Climate Finance**

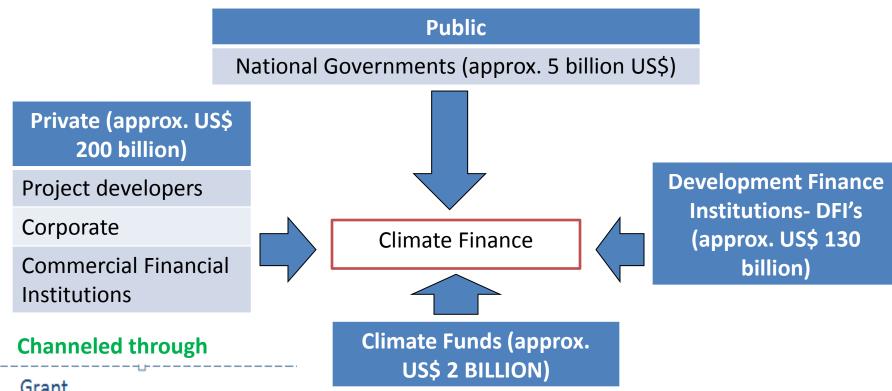

ICAO ENVIRONMENT Sources and Channels – Mitigation Financing

2012 Annual Global Climate Finance for Mitigation in all Sectors USD \$ 340 billion (Source CPI)

- Grant
- Low Cost debt
- Market rate debt (Loans , Bonds)
- Equity, Venture Capital.
- Infrastructure Funds

FINANCING

Challenge

International Aviation has no dedicated financial mechanism related to climate change
 2012 Annual Global Climate Finance for Mitigation in all Sectors USD \$ 340 billion

Opportunities

Financial support can be originated from public, private and public-private sectors.

States can in close coordination with ICAO and using ICAO assistance tap the different sources of financing using the Action Plan platform.

States can independently using Action Plan guidance and standard taxonomies approach DFI's and other sources for financing.

What States Can do

- Have a mitigation Project
- Use the Action Plan Platform and guidance to Request for Assistance
- Coordinate with ICAO for assistance and facilitation
- Independently or using ICAO assistance tap Sources of Mitigation Finance to secure financing.

Financing the Development of Aviation Emissions Reduction in Africa

AfDB's Climate Change Program

Low Carbon Development Enhanced Investments in Clean Energy and Energy Efficiency

Promoting Sustainable Transport

Promoting Sustainable Land & Forestry Management

Climate Resilient Dev

Promoting Sustainable Land Use and Water Resources
Management

Building Resilience Key Infrastructure & Urban Systems

Climate-proofing of AfDB's projects

Financing Tools Mobilizing
Concessionary
Resources

Catalyzing Private Capital Maximizing Market Mechanisms Policy reform & knowledge generation/competency building

Financing the development of aviation emissions reduction in Africa

Addus Aircraft Leasing: 310 MUSD

- Setting up Africa's first regional aircraft leasing facility through purchase of 6 new and 6 pre-owned Embraer 171/190;
- Leasing operations ran out of South Africa to benefit exclusively African Airlines;
- As regards Green & Sustainability facts: Building efficiency and competitiveness of African Airlines;
 Developing intra-Africa connectivity will help lower the need to travel to Europe/Middle East to reach Africa destinations Cutting carbon emissions
- Investing in modern, fuel-efficient technology will help reduce CO2 emissions and improve Africa's Aviation safety record

Some Climate Funds

CLIMATE FUNDS

Adaptation Fund (AF)

Clean Technology Fund (CTF)

Congo Basin Forest Fund (CBFF)

Forest Carbon Partnership - Readiness Fund (FCPF-RF)

Forest Investment Program (FIP)

GEF Trust Fund (GEF 5)

Global Energy Efficiency and Renewable Energy Fund

Least Developed Countries Fund (LDCF)

Work with partner counties to integrate climate change into their domestic policies in a way that mirrors the country's specific circumstances

- EU Priorities for mitigation assistance related to International Aviation
 - Supporting the preparation or further elaboration of State's action plans
 - Assisting the improvement of CO₂ environmental system tools and processes for compiling national inventories in the aviation sector
 - Financing country-specific pilot measures to reduce aviation fuel consumption and to improve airspace usage

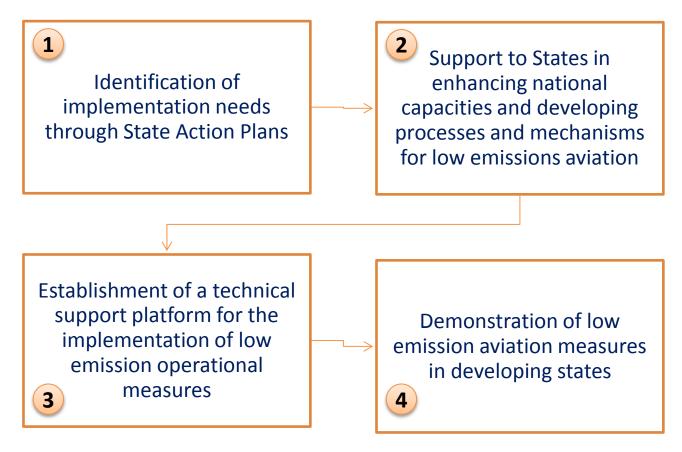

ICAO-UNDP PROJECT GEF Financing USD\$2 Million

Salient features of Project

Note - Salient features of the project are subject to change as the project evolves and continues to develop.

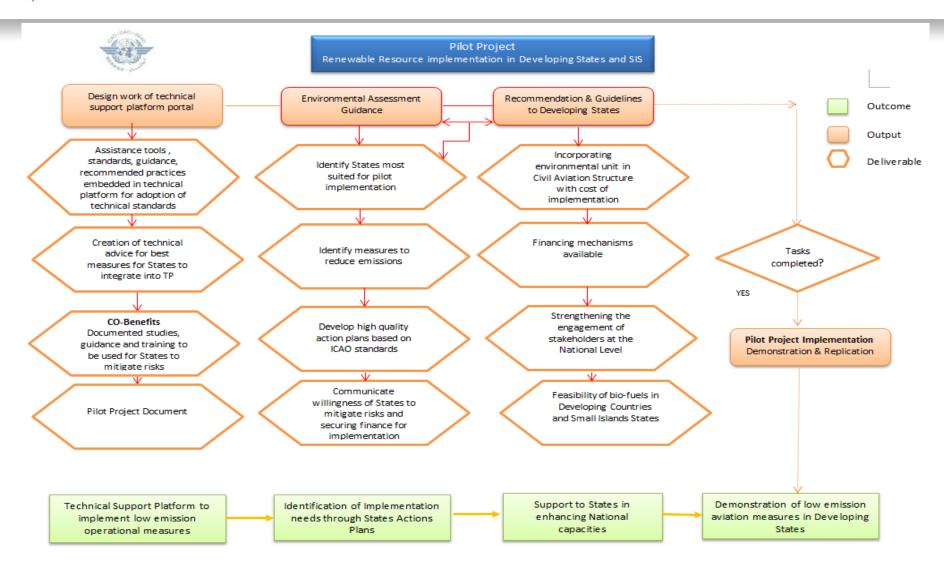

Schematic

Note - Salient features of the project are subject to change as the project evolves and continues to develop.

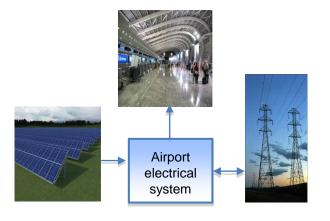

Potential Implementation

Emission reduction measure example

CO2 emission reduction of around 700,000 Kg / year

Reduce in lifecycle of project 17,500 metric tons

Pay back 7-8 years

Convenience of ensuring a fixed power tariff to the airport utility

FACTORS TO CONSIDER FOR SOLAR PANEL PROJECT IMPLEMENTATION IN AIRPORTS		
PARAMETERS	Max Range	
Area	1 acre	
Module Tilt	30 degrees	
Number of 60 cell solar panels	1,560	
Panel Wattage (W)	255	
System Size DC (Kw)	398	
PRODUCTION NUMBERS		
Annual hours of energy generation Energy Generated kWh/year	2,000 795,600	
ESTIMATED COSTS		
Ground Mount System (\$/W)	2.80	
Turnkey Cost (\$/W)	\$1.1 million	
Operations & Maintenance (\$/year)	\$5,000	
REVENUE POTENTIAL		
Avoided Cost of Solar (\$/kWh)	\$0.20	
Annual Potential Savings	\$159,120	
LYFECYCLES		
Years of useful life	25	

Note - The numbers here are subject to change depending on the State where the Implementation occurs. The numbers are for broad illustrative purposes only.

ICAO-EU: Specific Objectives EUR 6.5 million financing

Increased capacity of the national civil aviation authorities to develop their action plan to reduce CO2 emissions from international aviation in order to account and manage CO2 from international civil aviation operations

Efficient emission reduction measures are identified and assessed

Aviation emissions are reduced after the implementation of measures, including operational measures, such as improved ATM techniques

ICAO-EU: Results

AREA OF ACTIVITY 1

Capacity building for the development of action and their inclusion in ICAO State action plans

Country specific ICAO State action plans in at least 5 target States (Request for assistance and the measures clearly defined)

At least 2 members of staff in national aviation authorities per States trained to develop action plans

RESULT 1

RESULT 2

ICAO-EU: Results

AREA OF ACTIVITY 2

Setting up aviation environmental systems and creating national emissions inventories for aviation

Environmental tools and systems developed and introduced in at least four countries

At least 2 members from national authorities, gain expertise to work with environmental tools and systems and have the skills to ensure continuity of the project

A CO2 report for international aviation emissions using the action plans template is developed and submitted to ICAO per country

States' report to ICAO for UNFCCC inventory of GHC

RESULT 3

RESULT 4

RESULT 5

RESULT 6

ICAO-EU: Results

AREA OF ACTIVITY 3

Piloting the implementation of measures to reduce fuel consumption through environmental measures including operational measures

At least 4 feasibility studies on proposed pilot measures contained in the action plans are developed

Measures to improve environmental benefits and reduce aviation fuel consumption including operational measures, such as Air Traffic Management, that directly benefit at least 4 target countries, have been selected and implemented

RESULT 7

RESULT 8

ICAO'S Key Role

Replication and Continuity

Countries develop high quality State Action Plans and identify measures to reduce emissions from the sector & request for assistance

By providing

Member States

technical assistance to

By providing financing assistance to Member States

Demonstration of feasible low emission aviation measures in developing States

- ✓ Capacity Building
- ✓ Technology transfer
- ✓ Knowledge sharing
- ✓ Scaling up State of the art tech.
 - ✓ Innovative financing strategies
- Enhanced implementation & emissions reductions.

QUESTIONS?

Thank you!
