

THE NEW IRANIAN E-PASSPORT

MATIRAN COMPANY

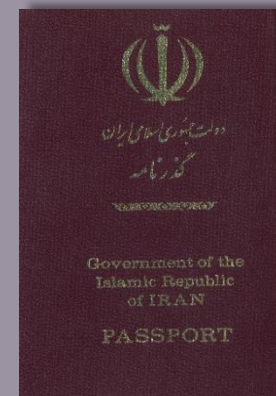

HISTORY OF THE PASSPORT AT MATIRAN

Since 1993 three versions of passport has been produced, each with specific changes. The younger generation called as 'Version A' was produced in 1993, with PT/PET laminate and florescent print. The holder's photograph should be attached to data sheet.

SERIES A

1993

SERIES A

HISTORY OF THE PASSPORT AT MATIRAN

In 2002 'Version B' had been generated with printing the holder's photograph by the inkjet printer. The laminate still was PT/PTE With a localized eransparent Hologram.

SERIES B

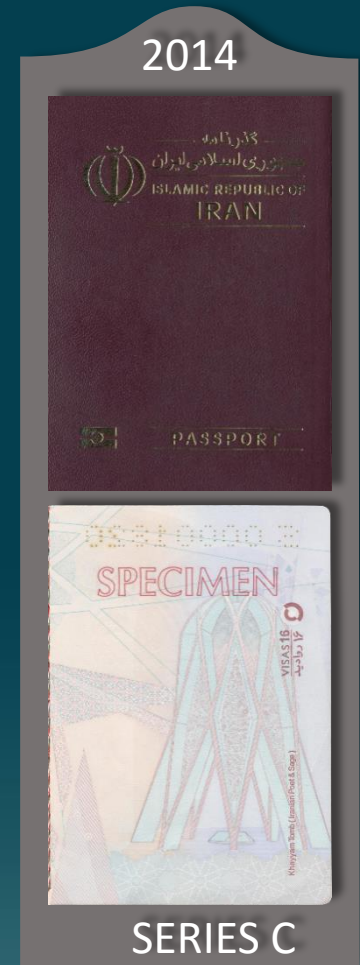

HISTORY OF THE PASSPORT AT MATIRAN

The project of the 3rd generation, 'Version C', started end of 2012 based on the latest security achievements.

SERIES C

INDEX

PROJECT PROCESSES

1-The content is printed in two languages; Persian & English.

2- according to ICAO 9303 standard.

3-The holder's information is printed when the passport is issued.

4-The serial number is printed.

DESIGN THEME

The specific background design of each page illustrates the art, history, and security.

14 historical and religious monuments had been selected to design a culturally rich and at the same time highly secure passport.
