

## **SATELLITE DISTRIBUTION SYSTEM OPERATIONS GROUP (SADISOPSG)**

### **THIRTEENTH MEETING**

**Dakar, Senegal, 27 to 29 May 2008**

#### **Agenda Item 6: Development of the SADIS**

##### **6.4: Alternative SADIS 2G hardware**

### **INFORMATION ABOUT THE EVALUATION OF ALTERNATIVE SADIS 2G HARDWARE**

(Presented by the SADISOPSG Technical Development Team)

#### **SUMMARY**

This information summarizes the progress in the evaluation of alternative SADIS 2G hardware.

## **1. INTRODUCTION**

1.1 Following SADISOPSG Conclusion 12/18 the SADIS Provider State continued to evaluate the technical and operational capability of alternative SADIS 2G hardware and the option to bring it into the commercial workplace.

### **1.2 Progress of Evaluation of alternative SADIS 2G Hardware (NetSys NST)**

1.2.1 The SADIS Provider State continued the evaluation of alternative SADIS 2G hardware NetSys SADIS Transcoder (NST) with special respect to features that are required for the operational use. The TDT received detailed information about this evaluation from the SADIS Provider State which showed that these requirements with respect to operations and commercial launching have been met and final results should soon be made available by the SADIS Provider State.

## **2. ACTION BY THE SADISOPSG**

2.1 The group is invited to take note of the information in this paper
