

SATELLITE DISTRIBUTION SYSTEM OPERATIONS GROUP (SADISOPSG)

THIRTEENTH MEETING

Dakar, Senegal, 27 to 29 May 2008

Agenda Item 5: Content of the SADIS broadcast

5.1: OPMET information

IATA STATISTICS OF OPMET DATA AVAILABLE FROM AOP AND NON-AOP AERODROMES ON THE SADIS BROADCAST

(Presented by the International Air Transport Association (IATA))

SUMMARY

This paper provides a brief statistical analysis about the availability of OPMET data for AOP and non-AOP aerodromes on the SADIS broadcast.

1. INTRODUCTION

1.1 The *SADIS User Guide* (SUG), Annex 1 lists all aerodromes for which OPMET data are required to be distributed. It contains requirements for aerodrome operational planning (AOP) aerodromes as well as for non-AOP aerodromes.

1.2 It was agreed that all aerodromes listed in an AOP table of the ICAO regions are automatically inserted in Annex 1 to the SUG.

1.3 All users do expect that, as a minimum, all available OPMET data for AOP aerodromes will be distributed on SADIS. It is recognised that, for small general aviation aerodromes, a State may decide not to issue OPMET data, as indicated in the regional ANP.

2. DISCUSSION

2.1 The following table gives a brief overview about the current number of available OPMET data on SADIS. This statistic is based on information about AOP tables dated February 2008, Annex 1 dated February 2008 and an IATA monitoring of the SADIS broadcast dated 11 April 2008.

Aerodromes listed in SUG Annex 1	2269 (-18)
AOP Aerodromes listed in SUG Annex 1	1297 (+3)
AOP Aerodromes are indicating 'No OPMET data'	0 (-45)
AOP Aerodromes providing SA, FC and FT	342 (-4)
AOP Aerodromes providing SA and FC	251 (+2)
AOP Aerodromes providing SA and FT	440 (-9)
AOP Aerodromes providing only SA	62 (+20)
AOP Aerodromes providing FC and FT	8 (-8)
AOP Aerodromes providing only FC	8 (+2)
AOP Aerodromes providing only FT	41 (+13)
AOP Aerodromes are not providing any data (see Appendix A)	116 (+4)
AOP Aerodromes not in IATA database	29

2.2 The above table shows that 1033 (-12) (79,7%, -1,1%) AOP aerodromes do provide OPMET data as requested. All other AOP aerodromes do not meet the users requirements (20,3%). 119 (+27) (9,2%, +2,1%) AOP aerodromes do not provide all OPMET data while 116 (8,9%) do not distribute any data. For 0 (-45) (0,0%, -3,5%) AOP aerodromes it is indicated that no OPMET data will be issued.

2.3 In Appendix A all **AOP** aerodromes are listed for which **no** required **SA** could be found on the SADIS broadcast.

2.4 In Appendix B all **AOP** aerodromes are listed for which **no** required **FC** could be found on the SADIS broadcast.

2.5 In Appendix C all **AOP** aerodromes are listed for which **no** required **FT** could be found on the SADIS broadcast.

2.6 IATA is requesting some efforts by the group to improve the availability of OPMET data for AOP aerodromes in the near future; the group may wish to agree that ICAO should continue its efforts to improve the availability of OPMET data for AOP aerodromes in order to achieve, as soon as practicable, the goal of 95% availability of OPMET data from all AOP aerodromes on SADIS broadcast. To promote this goal, the group may wish to formulate the following conclusion:

Conclusion 13/.. — Improvement of OPMET data availability for AOP aerodromes

That ICAO invite States concerned to ensure that OPMET information be provided from the aerodromes listed in Appendix¹... to this report

2.7 Since more and more non-AOP aerodromes are used internationally IATA has formulated following general requirement for OPMET data in its MET TF/14 meeting:

“IATA Position: All OPMET data currently available should be distributed. This does not mean modifying the airport status in the AOP table.”

2.8 Non-AOP Aerodromes are widely used as en-route alternates and for ETOPS operation. With regard to a safe flight operation, OPMET data for these aerodromes are important and should be available to all airlines.

2.9 Following the above requirement, IATA provides also statistics about OPMET data of non-AOP aerodromes in the table below. This statistic is based on information about AOP tables dated February 2008, SUG Annex 1 dated February 2008 and an IATA monitoring of the SADIS broadcast dated 11 April 2008.

¹ The missing data is listed in Appendices A, B and C to this working paper.

Aerodromes listed in SUG Annex 1	2269 (-18)
Non-AOP Aerodromes listed in SUG Annex 1	972 (-21)
Non-AOP Aerodromes are indicating 'No OPMET data'	0
Non-AOP Aerodromes providing SA, FC and FT	65
Non-AOP Aerodromes providing SA and FC	129
Non-AOP Aerodromes providing SA and FT	444
Non-AOP Aerodromes providing only SA	135
Non-AOP Aerodromes providing FC and FT	1
Non-AOP Aerodromes providing only FC	16
Non-AOP Aerodromes providing only FT	56
Non-AOP Aerodromes are not providing any data (see Appendix F)	89
Non-AOP Aerodromes not in IATA database	37

2.10 The above table shows that 638 (65,3%) Non-AOP aerodromes do provide OPMET data as requested. All other Non-AOP aerodromes do not meet the users requirements (34,7%). 208 (21,4%) Non-AOP aerodromes do not provide all OPMET data while 89 (9,2%) do not distribute any data. For 0 (0,0%) AOP aerodromes it is indicated that no OPMET data will be issued.

2.11 In Appendix D all **Non-AOP** aerodromes are listed for which **no** required **SA** could be found on the SADIS broadcast.

2.12 In Appendix E all **Non-AOP** aerodromes are listed for which **no** required **FC** could be found on the SADIS broadcast.

2.13 In Appendix F all **Non-AOP** aerodromes are listed for which **no** required **FT** could be found on the SADIS broadcast.

2.14 IATA is requesting some efforts by the group to improve the availability of OPMET data for non-AOP aerodromes in the near future and that ICAO should continue its efforts to improve the availability of OPMET data for non-AOP aerodromes in order to achieve, as soon as practicable, the goal of 90% availability of OPMET data from listed non-AOP aerodromes on SADIS broadcast. To promote this goal, the group may wish to formulate the following conclusion:

Conclusion 13/.. — Improvement of OPMET data availability for non-AOP aerodromes

That ICAO invite States concerned to ensure that OPMET information be provided from the aerodromes listed in Appendix²... to this report

Note. — States are not obliged to provide OPMET data from non-AOP aerodromes; references to non-AOP aerodromes from where a State does not wish to provide OPMET data is to be deleted from Annex 1.

3. ACTION BY THE SADISOPSG

3.1 The SADISOPSG is invited to:

- a) note the information presented in the working paper, and
 - b) decide on the draft conclusions proposed for the group's consideration.
- — — — — — —

² The list is in Appendices D, E and F to this working paper.
