

**WORKING PAPER**

**SATELLITE DISTRIBUTION SYSTEM OPERATIONS GROUP (SADISOPSG)**

**THIRTEENTH MEETING**

**Dakar, Senegal, 27 to 29 May 2008**

**Agenda Item 5 Content of the SADIS broadcast**

**5.1 OPMET information**

**HARMONIZATION OF ISCS AND SADIS BROADCAST**

(Presented by the International Air Transport Association (IATA))

**SUMMARY**

ISCS and SADIS are broadcasting OPMET data. In order to give all users access to all available OPMET data it is required that the broadcast of both satellite systems is identical. The following paper gives an overview about the differences of the two systems and requests a harmonization.

**1. INTRODUCTION**

1.1 The *SADIS User Guide* (SUG), Annex 1 lists all aerodromes for which OPMET data are required to be distributed. It contains requirements for AOP aerodromes as well as for non-AOP aerodromes.

1.2 For the ISCS system a similar list of requirements does not exist. Users, especially airlines under the foot prints of the two ISCS satellites expecting the same broadcast contents regarding OPMET data as provided by SADIS..

**2. DISCUSSION**

2.1 Annex 1 to the SUG was developed over the last years and is continuously updated, as necessary. Annex 1 reflects the current requirements from airlines for OPMET data distribution. These requirements are also applicable for the ISCS broadcast.

2.2 The following table gives a brief overview on the availability of OPMET data on both broadcast systems. Details about the differences can be found in the Appendix.

Aerodromes OPMET on SADIS	2615
Aerodromes OPMET on ISCS	2174
SADIS and ISCS (max)	2804
Aerodromes OPMET on ISCS only	189
Aerodromes OPMET on SADIS only	630
Aerodromes providing SA, FC and FT on SADIS and ISCS	272
Aerodromes providing SA and FC on SADIS and ISCS	274
Aerodromes providing SA and FT on SADIS and ISCS	580
Aerodromes providing FC and FT on SADIS and ISCS	6
Aerodromes providing SA on SADIS and ISCS only	185
Aerodromes providing FC on SADIS and ISCS only	9
Aerodromes providing FT on SADIS and ISCS only	100

2.3 The above table shows that ISCS and SADIS broadcast only for 1426 (50,8%) aerodromes the same OPMET data. For all other aerodromes the broadcast contents of SADIS and ISCS is different.

2.4 IATA is requesting that the broadcast on SADIS and ISCS shall be harmonised. The group may wish to formulate the following conclusion:

**Conclusion 13/.— Harmonization of the SADIS and ISCS broadcast for OPMET data**

That the SADIS Provider State and the ISCS Provider State, in coordination with ICAO, be invited to harmonize the OPMET information broadcast on SADIS and ISCS.

*Note. — The goal is of 95% availability of OPMET data from AOP aerodromes on SADIS and ISCS broadcast as soon as possible, and preferably by the SADISOPG/14 meeting.*

**3. ACTION BY THE SADISOPSG**

3.1       The SADISOPSG is invited to:

- a) to note the information presented in the working paper; and
  - b) to decide on the draft conclusion proposed for the group's consideration.
-
