Air Transport Statistics

ICAO is a global civil aviation forum for 191 Member States. Its vision is to achieve sustainable growth for the global civil aviation system.

CAE is a global leader in modelling, simulation and training for civil aviation and defence.

ICAO and CAE have partnered to offer the following e-learning courses:

- Air Transport Statistics
- Air Transport Economics and Policy
- Forecasting for Air Transportation.

Product Description

In the first Air Transport Statistics e-learning course ICAO-CAE will provide basic training on international air transport statistics focusing on standard terminology used, how data is collected and what it represents.

While the course aims at teaching general air transport statistics, participants will be introduced to some of the most important data series that ICAO collects. They will also learn where the data originates, how the different data series may relate to each other and how to verify that the data submitted conforms to the instructions and definitions pertaining to each data series presented.

Benefits

Civil aviation statistics may be required for a number of activities, such as analysing historical trends; planning and forecasting; defining benchmarks to enable comparison among similar entities; analysing accident and incident trends; etc. For these activities, a comprehensive understanding of the available information is required.

This course fills a vacuum which has been created over the last decade as some of the international and regional organizations that once provided basic guidance material on air transport statistics to the industry have ceased to do so.

Why ICAO-CAE training?

- **Competency:** ICAO has a long-standing aviation statistical programme and recognized experts with solid experience in collecting and interpreting air transport data. CAE is a leading provider of training solutions for civil aviation and defence and was an early adopter of e-learning and blended training solutions.
- **Convenience:** The course is delivered in a web-based interactive platform with user-friendly interface and is accessible 24/7.
- **Results-oriented:** The learning process includes comprehensive material presentation enhanced by testing sessions as well as final exam and certification.
- **Recognition:** The competencies acquired in this course will be industry - recognized worldwide.

Target Audience

This course caters to airport and airline planners, managers and operational staff, airport specialists in government, airline executives, marketing and commercial managers, aviation consultants and aircraft manufacturing analysts.

Modules

- Module 1: Introduction to Air Transport Statistics
- Module 2: Commercial Air Carrier Traffic Statistics
- Module 3: Other Commercial Air Carrier Data
- Module 4: Commercial Air Carrier Financial Data
- Module 5: Airport Traffic and Financial Data
- Module 6: ICAO Data Plus: Data Extraction and Analysis
