AOP Block	Element	Maturity level	Enablers Required Infrastructure/Systems/Procedures/Training
ACDM-B0 Aerodrome operators, aircraft operators, air traffic controllers, ground handling agents, pilots and air traffic flow managers share live information that may be dynamic, in order to make better and coordinated decisions. This applies notably in day to day operations and also in case of severe weather conditions or in case of emergencies of all kinds; for these cases A-CDM procedures are referred to in the snow plan, the aerodrome emergency response plan and the aerodrome manual. In some cases, aerodromes are connected to the ATM network via the ATFM function or to ATC through data exchange.	**ACDM-B0/1** Airport CDM Information Sharing(ACIS)	Ready for implementation	Surface operations milestones procedure
			ACDM information Sharing (ACIS) System
			Phraseology
			Training in the operational standards and procedures
	ACDM-B0/2 Integration with ATM Network function	Ready for implementation	Procedures for: integration of aircraft turnaround with ATM/ATFM objectives.
			Interconnectivity between A-CDM system and ATFM system
			Phraseology for the integration of the turnaround within the network
			Training requirements for the integration of the turnaround
ACDM-B1 Aerodromes are integrated within the ATM Network, from the strategic through all tactical phases. Situational awareness and decision support information is made available to affected stakeholders to establish a common understanding of the various needs and capabilities and make adjustments to assets in order to cope with these needs. Support mechanisms include an Airport Operations Planning (AOP) and an Airport Operations Centre (APOC).	**ACDM-B1/1** Airport Operations Plan (AOP)	Ready for implementation	Airport Operations Plan
			CDM information management processes
			Training in the operational standards and procedure of AOP
	ACDM-B1/2 Airport Operations Center (APOC)	Ready for implementation	APOC information sharing system
			APOC monitoring and decision support systems
			Physical APOC
			Operational procedures to support operations within the APOC
			Training requirements for APOC
