2. DISCUSSION

2.1 The AN-Conf/13 set the foundation for the future of aviation safety, as well as capacity and efficiency, covering traditional areas in addition to new and emerging ones (Doc 10115 refers). The Conference considered a wide range of subjects and strategies to guide the development and implementation of initiatives outlined in the Global Aviation Safety Plan (GASP) and the Global Air Navigation Plan (GANP) that will be presented to the 40th Session of the Assembly for endorsement.

2.2 As an outcome of the AN-Conf/13, the aviation community agreed with recommendations in the field of safety and air navigation capacity and efficiency that have been reviewed by the Council and considered relevant for inclusion in the Organization's work programme. The resources required to address these recommendations were identified and the work programme was reviewed in preparation of the budget discussions prior to the Assembly.

2.3 Following the review by the Council of ICAO of the AN-Conf/13 recommendations, States are now urged to appropriately address the recommendations directed to States (Supplement No. 1 to Doc 10115 refers).
