The Organization retains, claims and enforces copyright for ICAO publications, sound recordings and digital information as determined by the Secretary General. Requests for permission to reproduce all or parts of ICAO publications should be addressed to ICAO Headquarters, Attention: Director, Administration and Services Bureau.

The products listed in this Catalogue are subject to the Agreement on the Importation of Educational, Scientific and Cultural Materials (Florence, 1950) and to the Protocol to the Agreement on the Importation of Educational, Scientific and Cultural Materials (Nairobi, 1976).

ICAO will pursue violations of copyright and other intellectual property rights through legal/law enforcement action or other means.

QUICK ORDERING

This Catalogue can be used as an ordering or reference source for placing orders with ICAO via email, fax or telephone. Everything in the Catalogue can be ordered via the ICAO Store at www.icao.int.

The fastest way to order ICAO products and services is online, using Visa or MasterCard, at www.icao.int (ICAO Store). All transactions conducted on this server are encrypted and secure. The online services are currently in English only. For ease of shipping, all orders must include the complete civic address (city, state/region, country, postal code), a contact name, telephone number and email address. Full payment in advance is required.

To avoid duplication, unnecessary delays and transaction costs, orders should be submitted to ICAO only **ONCE**, and by only one method – ICAO Store, email, telephone or fax.

An **inquiry** on the status of an order should indicate date of order and mode of payment and be marked “THIS IS AN INQUIRY ONLY – PLEASE DO NOT DUPLICATE ORDER”.

ABOUT ICAO

The International Civil Aviation Organization (ICAO) is a specialized agency of the United Nations and was created with the signing in Chicago, on 7 December 1944, of the *Convention on International Civil Aviation*. ICAO is the permanent body charged with the administration of the principles laid out in the Convention. It sets the standards for aviation safety, security, efficiency and regularity, as well as for aviation environmental protection.

ICAO's membership comprises 193 Member States. Its headquarters are in Montréal and it has regional offices in Bangkok, Cairo, Dakar, Lima, Mexico City, Nairobi and Paris.

The aims and objectives of ICAO, as contained in Article 44 of the Chicago Convention, are to develop the principles and techniques of international air navigation and to foster the planning and development of international air transport so as to:

- ensure the safe and orderly growth of international civil aviation throughout the world;
- encourage the arts of aircraft design and operation for peaceful purposes;
- encourage the development of airways, airports and air navigation facilities for international civil aviation;
- meet the needs of the peoples of the world for safe, regular, efficient and economical air transport;
- prevent economic waste caused by unreasonable competition;
- ensure that the rights of Member States are fully respected and that every Member State has a fair opportunity to operate international airlines;
- avoid discrimination between Member States;
- promote safety of flight in international air navigation; and
- promote generally the development of all aspects of international civil aeronautics.

The constitution of ICAO is the Convention on International Civil Aviation to which each ICAO Member State is a party. The Organization has a sovereign body, the Assembly, and a governing body, the Council. The chief officers are the President of the Council and the Secretary General.

The Assembly, composed of representatives from all Member States, meets every three years, reviewing in detail the complete work of the Organization and setting policy for the coming years. It also decides on a triennial budget.

The Council, composed of representatives from 36 States, is elected by the Assembly for a three-year term and provides continuing direction to the work of ICAO. One of the major duties of the Council is to adopt International Standards and Recommended Practices (SARPs) and to incorporate these into the Annexes to the *Convention on International Civil Aviation*. The Council is assisted by its subsidiary bodies (the Air Transport Committee, the Committee on Joint Support of Air Navigation Services, the Finance Committee, the Committee on Unlawful Interference, the Human Resources Committee and the Technical Cooperation Committee) and by the Air Navigation Commission.

The Secretariat, headed by the Secretary General, has five main divisions: the Air Navigation Bureau, the Air Transport Bureau, the Technical Cooperation Bureau, the Legal Affairs and External Relations Bureau, and the Bureau of Administration and Services.

ICAO works in close collaboration with other specialized agencies of the United Nations such as the International Maritime Organization, the International Telecommunication Union, and the World Meteorological Organization. The International Air Transport Association, the Airports Council International, the International Federation of Air Line Pilots' Associations, and other international organizations participate in many ICAO meetings.

ABOUT THE ICAO CATALOGUE

The main purpose of this Catalogue is as an ordering and reference guide to all the products and services provided by ICAO, see <https://www.icao.int/publications/pages/catalogue.aspx>.

This Catalogue is published in separate English, Arabic, Chinese, French, Russian and Spanish editions and contains the titles and prices of all ICAO saleable products. The Catalogue, also available in pdf at www.icao.int, indicates which language versions are available; these are abbreviated as follows:

E = English	A = Arabic	C = Chinese
F = French	R = Russian	S = Spanish

SUPPLEMENTS TO THE CATALOGUE

The Catalogue is kept up to date by Supplements which list new products and services as they become available, as well as amendments, supplements, corrigenda, etc. Supplements to the Catalogue are available at www.icao.int, under “Information Resources”, then click on “Publications” and select “Products and Services Catalogue”.

AMENDMENTS TO ICAO PUBLICATIONS

Certain ICAO publications are subject to amendment. These include Annexes to the Convention, Procedures for Air Navigation Services (PANS), Technical Manuals and the various parts of the *Training Manual*. These amendments, as well as supplements, corrigenda, etc., are announced in the Supplements to the Catalogue. Please note that some amendments are not yet available in all languages.

The prices of amendments and supplements are listed in the Catalogue and in the Supplements to the Catalogue. Please note that these prices apply *only when this material is purchased separately from the publication to which they apply*. When the publication itself is purchased, all existing applicable amendments, supplements, etc., are included free of charge at that time.

ADVANCED VERSION DISCLAIMER

A document carrying the advanced version disclaimer is an unedited version of an ICAO publication and has not yet been approved in final form. As its content may still be supplemented, removed, or otherwise modified during the editing process, ICAO shall not be responsible whatsoever for any costs or liabilities incurred as a result of its use.

Annexes to the Convention on International Civil Aviation

International Standards and Recommended Practices adopted by the Council in accordance with Articles 54, 37 and 90 of the Convention on International Civil Aviation. Associated with the Standards and Recommended Practices, which for convenience are designated as Annexes to the Convention, are explanatory forewords, notes and, in some cases, additional guidance material, approved by the Council for inclusion within the covers of the individual Annexes and intended to assist in the implementation of the Standards and Recommended Practices.

NEW EDITIONS OF ANNEXES TO THE CONVENTION ON INTERNATIONAL CIVIL AVIATION

Note 1.— Annexes are also available online by subscription. See Subscriptions/Digital Products section.

Note 2.— Corrigenda and addenda listed in this English edition of the Catalogue do not necessarily apply to the other language versions of the same publication.

Note 3.— The Annexes carry Supplements listing the differences which Member States have informed ICAO exist between their regulations and practices and the corresponding international Standards and Recommended Practices.

Note 4.— Annexes are also available digitally.

Annex 1 – Personnel Licensing.

Annex 5 – Units of Measurement to be Used in Air and Ground Operations.

This Annex comprises the Standards and Recommended Practices for dimensional units to be used in air and ground operations. The Annex deals with the standard application of units of measurement and termination of the use of non-SI units. Attachments to the Annex contain material describing the development of the International System of Units (SI) and guidance on the application of the SI, conversion factors, Coordinated Universal Time (UTC), and presentation of date and time in all-numeric form.

5th edition, incorporating Amendments 1–17. July 2010. 56 pp.

Annex 6 – Operation of Aircraft.

Part I – International Commercial Air Transport – Aeroplanes.

This document specifies international Standards and Recommended Practices for aeroplanes used in international commercial air transport operation carrying passengers or freight. The Annex addresses flight operations; performance operating limitations; aeroplane instruments, equipment and flight documents; aeroplane communication and navigation equipment; aeroplane maintenance; flight crew; flight operations officers/flight dispatchers; manuals, logs and records; cabin crew; security; lights to be displayed in the air and on the ground during operations; contents of an operations manual; and flight time and flight duty period limitations.

12th edition. July 2022. 242 pp.

Part II – International General Aviation – Aeroplanes.

This document specifies international Standards and Recommended Practices for aeroplanes used in international general aviation operations. The Annex addresses flight preparation and in-flight procedures; performance operating limitations; aeroplane instruments and equipment; aeroplane communication and navigation equipment; aeroplane maintenance; flight crew; lights to be displayed in the air and on the ground during operations; flight recorders; and carriage and use of oxygen.

11th edition, July 2022. 182 pp.

Annex 8 – Airworthiness of Aircraft.

This Annex contains the Standards and Recommended Practices for the airworthiness of aircraft. Part I of the Annex provides definitions. Part II contains general airworthiness procedures applicable to all aircraft together with the standard format for the certificate of airworthiness. Part IIIA contains the minimum airworthiness characteristics of aeroplanes over 5 700 kg for which application for certification was submitted on or after 13 June 1960. Part IIIB contains the minimum airworthiness characteristics of aeroplanes over 5 700 kg for which application for certification was submitted on or after 2 March 2004. Part IVA contains the minimum airworthiness characteristics of helicopters for which application for certification was submitted on or after 22 March 1991. Part IVB contains the minimum airworthiness characteristics of helicopters for which application for certification will be submitted on or after 13 December 2007. Part V contains the minimum airworthiness characteristics of aeroplanes over 750 kg but not exceeding 5 700 kg for which application for certification will be submitted on or after 13 December 2007.

13th edition, July 2022. 346 pp.

Annexes to the Convention on International Civil Aviation

Annex 9 – Facilitation.

Annex 9 contains Standards and Recommended Practices, and related definitions and appendices concerning the facilitation of international air transport. They are the outcome of Article 37 of the Convention on International Civil Aviation which requires ICAO to adopt international Standards and Recommended Practices dealing with, inter alia, customs and immigration procedures and such other matters concerned with the safety, regularity and efficiency of air navigation.

16th edition, July 2022. 114 pp.

Procedures for Air Navigation Services

Procedures developed mostly through the ICAO divisional-type meetings and approved by the Council for worldwide application. They comprise, for the most part, operating procedures regarded as not yet having obtained a sufficient degree of maturity for adoption as international Standards and Recommended Practices, or material of a more permanent character which is inappropriate or too detailed for incorporation in an Annex.

Doc 4444 – ATM – Air Traffic Management.

These procedures are complementary to the Standards and Recommended Practices contained in Annex 2 and Annex 11 and specify, in greater detail than in the Standards and Recommended Practices, the actual procedures to be applied by air traffic services units in providing the various air traffic services to air traffic.

16th edition, 2016. 466 pp.

Volume II – Construction of Visual and Instrument Flight Procedures.

This volume is intended for the guidance of procedures specialists and describes the essential areas and obstacle clearance requirements for the achievement of safe, regular instrument flight operations. It provides the basic guidelines to States, and those operators and organizations producing instrument flight charts that will result in uniform practices at all aerodromes where instrument flight procedures are carried out.

Doc 9868 – Training.

These PANS contain material that provides for the uniform implementation of competency-based training and assessments for the multi-crew pilot licence (MPL) and maintenance personnel. It also includes provisions related to the implementation of evidence-based training in recurrent training in FSTDs and upset prevention and recovery training. This document is complementary to the Standards and Recommended Practices (SARPs) contained in Annex 1 – *Personnel Licensing* and specifies, in greater detail than in the SARPs, the actual procedures to be applied by training organizations in providing training for aeronautical personnel.

3rd edition, 2020. 218 pp.

Doc 9981 – Aerodromes.

The PANS-Aerodromes are complementary to the SARPs contained in Annex 14, Volume I. The PANS-Aerodromes specify, in greater detail than the SARPs, operational procedures to be applied by aerodrome operators to ensure aerodrome operational safety. PANS-Aerodromes specify procedures to be applied by both aerodrome regulators and operators for initial aerodrome certification and continuing aerodrome safety oversight, as well as aerodrome compatibility studies, in particular, where full compliance with the SARPs in Annex 14, Volume I, cannot be achieved.

REGIONAL SUPPLEMENTARY PROCEDURES

Doc 7030 – Regional Supplementary Procedures.

Operating procedures supplementary to the Annexes and PANS developed for the greater part through the ICAO regional air navigation meetings to meet the needs of a specific ICAO Region. They deal with matters affecting the safety and regularity of international air navigation. They are published in a single document covering all Regions. The ICAO Regional Supplementary Procedures form part of the Air Navigation Plan developed by Regional Air Navigation Meetings to meet those needs of specific areas which are not covered in the worldwide provisions.

RESOLUTIONS

Doc 10075 – Assembly Resolutions in Force (as of 6 October 2016).

This document contains the texts of all resolutions of the ICAO Assembly in force at the close of its 39th Session (September/October 2016). In addition to the text of the resolutions in force, the document contains reservations which were recorded by some delegations to resolutions adopted by the Assembly (with effect from the 39th Session); a list of resolutions resulting from consolidations, with an indication of their origin; a list of resolutions that have been consolidated, with an indication of the resulting resolution; a subject index of resolutions in force; and an index of resolutions in force.

TECHNICAL PUBLICATIONS

Specialized information on air navigation activities, listed under subheadings of particular air navigation fields, and comprising the following:

Manuals. The technical manuals provide guidance and information and are intended to facilitate uniform application of international Standards and Recommended Practices. The various parts of the Training Manual are intended to encourage the uniform application of personnel licensing standards and the attainment of a high standard of professional training generally.

Circulars. Publications intended to disseminate specialized information to Member States, such as technical studies; analyses, reproductions of or extracts from informative documents supplied by Member States; and reports on the implementation of Standards and Recommended Practices.

AGA – AERODROMES

Doc 9137 – *Airport Services Manual.*

Part 1 – *Rescue and Firefighting.*

Part 1 provides guidance for the implementation of the Annex 14, Volume I, specifications relating to rescue and firefighting (RFF). It includes material concerning the level of protection to be provided at an airport, the critical area concept and the method by which the amount of extinguishing agents has been related to the critical area. The manual also contains information on RFF vehicle specifications, extinguishing agent characteristics, siting of fire stations and operating procedures for dealing with an emergency.

4th edition, 2015. 170 pp.

Part 2 – *Pavement Surface Conditions.*

The purpose of Part 2 is to assist States to ensure that adequate measures are taken to overcome problems resulting from contaminants on, or weathering of, the movement area. This manual includes material concerning basic factors affecting friction, the correlation between friction measuring devices on paved surfaces, descriptions of some friction measuring devices, and practices for measuring and reporting friction on snow-, ice- and water-covered surfaces. It also provides information on the collection and dissemination of pavement surface condition information, and clearance and removal of contaminants and debris from the movement area.

4th edition, 2002. 124 pp.

E, F, R, S

Order No. 9137P2

\$112.00

* Free if purchased with corresponding document.

Part 3 – *Wildlife Hazard Management.*

Part 3 is intended to provide airport personnel with the information necessary to develop and implement an effective bird/wildlife control programme for their airport. The manual stresses the importance of good organization and planning in the creation of such a programme, and it details the roles and responsibilities of those involved in airport bird/wildlife control. To assist States wishing to establish a national bird/wildlife strike committee, the manual contains information describing how such a committee is organized. In addition, the manual includes material which describes why birds/wildlife are attracted to an airport, and it explains some of the concepts used to make the airport less attractive to birds. The manual also includes material on emerging technologies and communication procedures dealing with bird/wildlife strike hazard reduction.

5th edition, 2020. 72 pp.

E, A, R, C, S, F

ISBN 978-92-9258-972-1

Order No. 9137P3

\$107.00

Part 5 – *Removal of Disabled Aircraft.*

The purpose of Part 5 is to assist States to establish a plan for the removal of a disabled aircraft from the airport movement area. The manual discusses the responsibility for removing a disabled aircraft, emphasizes the need for pre-arranged agreements with operators, companies with heavy-lift equipment and other airports for the expeditious removal of a disabled aircraft. The manual also describes some of the methods used to remove disabled aircraft.

4th edition, 2009. 114 pp.

Reprinted, incorporating Corrigendum dated 5/2/10.

E, F, R, S

ISBN 978-92-9231-967-0

Order No. 9137P5

\$96.00

Part 6 – *Control of Obstacles.*

Part 6 includes information intended to provide guidance on the control of obstacles in the vicinity of an airport. This part of the manual includes information on: obstacle surfaces; controlling obstacles at an airport; temporary hazards; obstacle surveys; and airport equipment and installations which might constitute obstacles.

2nd edition, 1983. 70 pp.

E, F, R, S

ISBN 92-9194-297-9

Order No. 9137P6

\$65.00

Part 7 – *Airport Emergency Planning.*

The material in Part 7 relates to the pre-planning for handling airport emergencies, as well as coordination between different airport agencies (or services) and those agencies in the surrounding communities that could be of assistance in responding to an emergency. Some of the topics dealt with by the manual are: the preparation of an airport emergency plan; agencies involved including their responsibilities and roles; emergency operations centre and mobile command post; offices to be contacted; triage and medical centre; care of ambulatory survivors; care of fatalities; communications; airport emergency exercises; and review of the airport emergency plan.

2nd edition, 1991. 81 pp.

E, F, R, S

ISBN 92-9194-635-4

Order No. 9137P7

\$77.00

Part 8 – *Airport Operational Services.*

Part 8 brings together the various technical functions that are required to be fulfilled by an airport to ensure safety and continuity of operations. The manual treats two aspects of providing airport services. In the first two chapters the overall organization and the staffing of operational services are discussed. The remaining chapters discuss particular services to be provided at the airport.

1st edition, 1983. 64 pp.

E, F, R, S

Doc 9150 – Stolport Manual.

This manual provides guidance for the planning and establishment of stolports, unique airports designed to serve airplanes that have exceptional short-field performance capabilities. The material in this manual is based on adaptations of conventional airport practices and on the experiences of States that have operated stolports or complete STOL systems. The manual covers all aircraft operating aspects of stolports except non-visual navigation aids.

Part 4 – *Visual Aids*.

Proper design and installation of visual aids are prerequisites for the safety of airport operations. Part 4 provides information on the characteristics of visual aids used at airports. Some of the topics covered are: functional requirements of visual ground aids; surface marking and markers; approach lighting systems; light characteristics for precision approach runways and taxiways; runway lead-in lighting systems; runway and taxiway lighting; surface movement guidance and control systems; taxiing guidance signs and obstacle lighting.

Part 5 – *Electrical Systems*.

Part 5 discusses the general features of electrical practices and installations and also addresses those features which are of special significance for aerodrome installations. It is assumed the readers of the manual will be familiar with electrical circuits and design concepts, but may not be familiar with certain features of aerodrome installations which are less frequently encountered in other installations.

Part 6 – *Frangibility*.

At airports, various visual and non-visual aids are located near runways, taxiways and aprons where they may present a hazard to aircraft in the event of accidental impact during landing, take-off or ground manoeuvring. All such equipment and their supports shall be frangible and mounted as low as possible to ensure that impact will not result in loss of control of the aircraft. This manual provides guidance on the design, testing and installation of frangible structures at airports and heliports. Much of the material is closely associated with the specifications on frangibility of visual and non-visual aids contained in Annex 14 – *Aerodromes*, Volume I – *Aerodrome Design and Operations* and Volume II – *Heliports*.

Doc 9946 – Manual on Regional Accident and Incident Investigation Organization.

This manual provides information and guidance on the establishment and management of a regional accident and incident investigation organization (RAIO) to assist ICAO Contracting States in fulfilling their obligations pertaining to accident and incident investigation. A regional investigation system can provide economies of scale by allowing for the sharing of required resources. The manual outlines the duties and responsibilities of ICAO Contracting States, individually and/or collectively, with respect to the establishment and management of a regional accident and incident investigation system.

Cir 315 – Hazards at Aircraft Accident Sites.

Working at aircraft accident sites has the potential to expose investigators, and search and rescue personnel, to a wide range of health and safety hazards. These hazards, generated by the damage to structures, systems, components and aircraft contents, will be variable in nature and will themselves be influenced by the factors associated with the accident scenario, e.g. location, weather conditions, environment, security. This circular is produced to assist individuals to consider and apply effective occupational safety management practices both to their own activities, and to the activities of the teams that they work with, or for which they are responsible. The circular discusses the nature and variety of occupational hazards and the management of risk associated with exposure to these hazards during the investigation of aircraft accidents.

Doc 9883 – Manual on Global Performance of the Air Navigation System.

This manual was produced by the ICAO Air Traffic Management (ATM) Requirements and Performance Panel within the context of a performance-based global air navigation system. The performance-based approach can be applied in economic management, transition management, safety management, security management, communications, etc. This manual is not replacing any existing ICAO guidance material in these areas, rather it is to be seen as overarching and complementary guidance, introducing a set of performance management terminology and techniques to assist the aviation community members in converging towards a globally harmonized and agreed upon approach.

Doc 9896 – Manual on the Aeronautical Telecommunication Network (ATN) using Internet Protocol Suite (IPS) Standards and Protocols.

This manual contains the minimum communication standards and protocols that will enable implementation of an ICAO aeronautical telecommunication network (ATN) based on the Internet protocol suite (IPS), referred to as the ATN/IPS. The focus of this manual is on interoperability *across* administrative domains in the ATN/IPS internetwork, although the material in this manual may also be used *within* an administrative domain.

Doc 9931 – Continuous Descent Operations (CDO) Manual.

The purpose of this manual is to provide guidance on continuous descent operations (CDO) and to harmonize its development and implementation. To achieve this, airspace design, instrument flight procedure design and air traffic control (ATC) techniques should all be employed in a cohesive manner. This will then facilitate the ability of flight crews to use in-flight techniques to reduce the overall environmental footprint and increase the efficiency of aircraft operations.

Doc 9965 – Manual on Flight and Flow – Information for a Collaborative Environment (FF-ICE).

This manual is to present a concept for the Flight and Flow Information for a Collaborative Environment (FF-ICE) aiming at the realization of the vision for the future ATM system that requires an environment with significant information content and collaboration. It illustrates information for flow management, flight planning, and trajectory management associated to the ATM operational components and will be used by the ATM community, as the basis from which ICAO Standards and Recommended Practices (SARPs) will be developed, in order to ensure the global implementation in a consistent manner.

Doc 9971 – Manual on Collaborative Air Traffic Flow Management (ATFM).

This manual provides in its Part I guidance on collaborative decision-making that is defined as an explicit supporting process focused on deciding on a course of action in pursuit of articulated objectives between two or more community members. It guides how ATM community members affected by a decision, share information related to that decision and agree on and apply a decision-making approach and associated principles. The overall objective of the process is to improve the performance of the ATM system as a whole while balancing against the individual performance needs of individual ATM community members. The manual also provides in its Part II guidance on how to implement air traffic flow management (ATFM) services and a description of ATFM measures to be taken in specific operational conditions, including procedures to calculate aerodrome acceptance rates and airspace capacity.

Purchase requests must be submitted on letterhead clearly identifying the purchaser by name, official title, contact information and the reason for purchase. Mail requests to ATM@icao.int with "Purchase request for Doc 9985" indicated in subject line.

Doc 9994 – Manual on Airborne Surveillance Applications.

Airborne surveillance is rapidly evolving with a number of new capabilities planned for introduction into the flight deck. The ICAO Global Air Navigation Plan (GANP) (Doc 9750) requests/requires that these be interoperable in order to allow aircraft to achieve the same levels of safety and efficiency globally. This manual has been developed by the ICAO Airborne Surveillance Task Force (ASTAF) to develop international provisions that ensure global uniformity and interoperability of operations based on the use of ADS-B on the flight deck. The manual covers several airborne surveillance capabilities and applications such as enhanced traffic situational awareness during flight operations (AIRB), enhanced visual separation on approach (VSA) and basic surface situational awareness (SURF) along with the in-trail procedure (ITP) application, which were introduced in the aviation system block upgrades (ASBUs) supporting the *Global Air Navigation Plan (GANP)* (Doc 9750, fourth edition). The manual provides guidance material and aims to support the implementation of those airborne surveillance capabilities and applications, especially that ADS-B is recognized as an essential enabler of the ICAO global concept of operations.

Cir 325 – In-Trail Procedure (ITP) Using Automatic Dependent Surveillance – Broadcast (ADS-B).

Airborne surveillance applications, such as the In-Trail Procedure (ITP), facilitate the climb and descent of aircraft during the en-route phase to achieve optimal flight levels in environments where the absence of air traffic service (ATS) surveillance service or the application of large separation minima is a limiting factor. The benefit of the ITP is significant fuel savings enabling greater payloads to be gained. This document provides information on ITP, its separation minima and the work undertaken by ICAO in this regard. It is aimed at a worldwide audience of the civil aviation authorities and service providers responsible for implementing ITP.

Doc 9861 – Manual on the Universal Access Transceiver (UAT).

The objective of this manual (in conjunction with the UAT SARPs of Annex 10, Volume III) is to define internationally agreed detailed technical specifications for the UAT system that accomplish the following: a) establish a basis for RF compatibility of UAT with other systems operating in the 960 MHz to 1 215 MHz frequency band (ACAS, DME, SSR, TACAN, JTIDS/MIDS and GNSS E5/L5); and b) establish a common basis for UAT inter-system interoperability across implementations manufactured and certified in different regions of the world.

Doc 9871 – Technical Provisions for Mode S Services and Extended Squitter.

The purpose of this manual is to specify technical provisions for the formats and associated protocols used in Mode S services and extended squitter. The manual also includes implementation guidelines as well as information on future Mode S and extended squitter services that are under development. The provision of Mode S services, specified in this document, include the following: a) data formats for transponder registers; b) formats for Mode S specific protocols: traffic information broadcast; and dataflash; c) Mode S broadcast protocols, including: 1) uplink broadcast; and 2) downlink broadcast.

Doc 9924 – Aeronautical Surveillance Manual.

Air traffic is growing at a significant rate and at the same time there are increasing demands for more operating flexibility to improve aircraft efficiency and to reduce the impact of air travel on the environment. This document addresses aeronautical surveillance systems as major elements of modern air navigation infrastructure required to safely manage increasing levels and complexity of air traffic. It provides a basic understanding of various systems and how they are used for air traffic surveillance while the appendices contain detailed information on some specific systems and related topics.

Doc 10131 – Manual on the Development of Regional and National Aviation Safety Plans.

This manual complements the 2020–2022 edition of the *Global Aviation Safety Plan* (GASP, Doc 10004). It addresses different aspects to be considered by a region or State when developing or modifying its aviation safety plan and when implementing regional and national aviation safety plans consistent with the GASP. This manual provides guidance that may be used to establish a development process for aviation safety plans, including methods to identify safety enhancement initiatives of the regional or national aviation safety plan; address the relationship between the national aviation safety plan and State safety programme; monitor the plans' implementation and their effectiveness; and report on safety performance measurement, including reporting methods for individual States to the regional aviation safety groups.

Doc 9654 – Manual on Prevention of Problematic Use of Substances in the Aviation Workplace.

The global spread of psychoactive substances, their general availability and the ever-increasing number of addicted users are becoming a growing threat to aviation safety in many States. This document was developed to provide States with a tool for decision-makers to use when deciding on the best policy for their States and for State licensing authorities when planning national strategies; at the same time, airlines and other employers can use this document to implement, on a practical level, established policies and strategies in a cost-effective way, with due regard for both aviation safety and the welfare of their employees. The manual is organized into five chapters: introduction; education of the aviation workforce; identification, treatment and rehabilitation; employment consequences of problematic substance use; and biochemical test programmes.

Doc 9815 – Manual on Laser Emitters and Flight Safety.

This manual supports the laser-related SARPs in Annexes 11 and 14. It focuses on the medical, physiological and psychological effects on flight crew of exposure to laser emissions. The information and guidance material provided in this manual are primarily directed to decision-makers at government level, laser operators, air traffic control officers, aircrew, aviation medicine consultants to and medical officers of the regulatory authorities, and doctors involved in clinical aviation medicine, occupational health and preventive medicine. The manual is aimed both at reducing the need for regulatory authorities to seek individual expert advice and at reducing inconsistencies between Member States in the implementation of national regulations.

MET – METEOROLOGY

Doc 7488 – Manual of the ICAO Standard Atmosphere (extended to 80 kilometres (262 500 feet)).

This manual provides standard values of atmospheric parameters in tabular form for levels up to 80 kilometres. It also gives values of constants and coefficients, as well as the underlying equations used in the calculation of the atmospheric parameters. The document is intended for use in calculations in the design of aircraft, in presenting test results of aircraft and their components under identical conditions, and in facilitating standardization in the development and calibration of instruments. Its use is also recommended in the processing of data from geophysical and meteorological observations. This manual intends to facilitate the uniform application of the ICAO Standard Atmosphere defined in Annex 8 – *Airworthiness of Aircraft* and provides sets of data that are accurate enough for practical applications (identical to ISO standard atmosphere).

Doc 8896 – Manual of Aeronautical Meteorological Practice.

This manual aims at meeting the needs of aeronautical meteorologists, particularly those at the working level, as well as the needs of pilots and other aeronautical personnel for guidance on practices to be used in the provision of meteorological service to air navigation. The body of the manual is based primarily on the content of Annex 3 – *Meteorological Service for International Air Navigation* and it contains detailed guidance on meteorological reports and forecasts. The appendices address specific issues such as location of instruments at aerodromes, and guidelines for authorized access to WAFS forecasts and OPMET information through the AFS satellite broadcast and Internet-based services.

Doc 9377 – Manual on Coordination between Air Traffic Services, Aeronautical Information Services and Aeronautical Meteorological Services.

The aim of this manual is to make available to States information and guidance concerning ways and means of improving the coordination between area control centres/flight information centres (ACCs/FICs) and their associated meteorological watch offices (MWOs). It also contains information on relevant modern methods employed by States, in particular in respect of the provision to air traffic services (ATS) units, of weather radar data and of meteorological information required by flights below flight level 100. In addition, the manual provides information on coordination between search and rescue units and meteorological offices.

OPS – FLIGHT OPERATIONS

Doc 7192 – Training Manual.

ICAO has issued guidance material in the form of Training Manuals to assist States in the implementation and uniform application of the Standards and Recommended Practices for the licensing of personnel as specified in Annex 1. The Training Manual is issued in several parts dealing with specific aspects of training for various categories of personnel.

Part D-1 – Aircraft Maintenance (Technician/Engineer/Mechanic).

This part of the Training Manual contains training syllabi for AMEs that cover both knowledge and skill requirements outlined in Annex 1. The content of this edition has been updated to reflect new technologies and procedures. New subject matter has been included for the first time on topics such as airships, composite materials and Human Factors. The format of the manual reflects the concept of competency-based training and is now consistent with other manuals in the Doc 7192 series.

Doc 7383 – Aeronautical Information Services Provided by States.

Part 1 provides essential data concerning the type of aeronautical information service available from various States and how it may be obtained, supplemented by a map indicating the geographical area of responsibility of each service. Part 2 shows the current exchange of NOTAM between NOTAM offices. Part 3 contains a listing of all international airports, including those designated under Article 10 of the Convention on International Civil Aviation. Operational information for each airport includes the location indicator, the geographical coordinates and the types of operations permitted. Any limitations concerning the provision of customs services are summarized for each airport.

Doc 8335 – Manual of Procedures for Operations Inspection, Certification and Continued Surveillance.

This manual provides States and operators with detailed guidance concerning the establishment and maintenance of safe, regular and efficient international commercial air transport operations. This guidance presents broad objectives and details of acceptable means of compliance with Annex 6 – *Operation of Aircraft*, Part I – *International Commercial Air Transport – Aeroplanes*, and Part III – *International Operations – Helicopters*, which underscore a need for the State of the Operator to exercise a positive and continuing measure of control over operators. The manual outlines the duties and responsibilities of both the State of the Operator and the operator and recognizes their interdependence in maintaining an acceptable standard of operations and safe operating practices.

Doc 9613 – Performance-based Navigation (PBN) Manual.

This manual identifies the relationship between RNAV and RNP applications and the advantages and limitations of choosing one or the other as the navigation requirement for an airspace concept. It also aims at providing practical guidance to States, air navigation service providers and airspace users on how to implement RNAV and RNP applications, and how to ensure that the performance requirements are appropriate for the planned application.

Doc 9625 – Manual of Criteria for the Qualification of Flight Simulation Training Devices.

Volume I – *Aeroplanes*.

Volume I of this manual provides States, manufacturers and operators with guidance material covering the criteria for the initial and periodic qualification and evaluation of aeroplane flight simulation training devices (FSTD). Seven standard examples of FSTD are defined, to support identified training types. The manual also allows the determination of criteria for an FSTD tailored to specific training needs. This “à la carte” determination is constructed using a comprehensive list of training tasks, with associated requirements for FSTD features.

Volume II – Helicopters.

Volume II of this manual provides States, manufacturers and operators with guidance material covering the criteria for the initial and periodic qualification and evaluation of helicopter flight simulation training devices (FSTD). Five standard types of FSTD are defined, to support identified training programmes. The manual also allows the determination of criteria for an FSTD tailored to specific training needs. This “à la carte” determination is constructed using a comprehensive list of training tasks, with associated requirements for FSTD features.

Doc 9910 – Normal Operations Safety Survey (NOSS).

This manual introduces the Normal Operations Safety Survey (NOSS), a methodology for capturing safety data during normal air traffic control (ATC) operations. The NOSS methodology is based on the Threat and Error Management (TEM) framework and is a safety management tool to monitor safety during normal aviation operations. Monitoring safety in normal operations is an essential activity within the safety management systems of air traffic services (ATS) provider organizations, and NOSS is proposed as a suitable way to do this. In introducing NOSS, the manual also presents the latest information available to international civil aviation on the control of systemic error in operational environments, from the perspective of safety management. Its target audience includes senior safety, training and operational personnel in ATS and regulatory bodies.

Order No. 9966**\$11.00****Doc 9992 – Manual on the Use of Performance-based Navigation (PBN) in Airspace Design.**

This manual explains how to utilize Performance-based Navigation (PBN) in developing an airspace concept through a step-by-step process. It should be used by airspace designers and other stakeholders involved in the design process (regulators, airlines, procedures designers, military, airport operators, etc.) in order to appropriately apply PBN concepts and thus maximize the capacity and efficient use of the airspace.

ISBN 978-92-9249-225-0

Order No. 9992**\$57.00****Doc 9993 – Continuous Climb Operations (CCO) Manual.**

The purpose of this manual is to provide guidance on continuous climb operations (CCO) and to harmonize its development and implementation. To achieve this, airspace design, instrument flight procedure design and air traffic control (ATC) techniques should all be employed in a cohesive manner. This will then facilitate the ability of flight crews to use CCO to reduce the overall environmental footprint and increase the efficiency of aircraft departure operations. This manual is intended for airspace designers, regulators, airlines, procedures designers, military and airport operators.

Doc 10002 – Cabin Crew Safety Training Manual.

The ICAO *Cabin Crew Safety Training Manual* (Doc 10002) provides guidance related to cabin crew training requirements found in Annex 6 – *Operation of Aircraft, Part I – International Commercial Air Transport – Aeroplanes*. ICAO developed guidance for a competency-based approach to cabin crew safety training so that cabin crew members may be proficient to perform their duties and responsibilities, and with the goal of establishing an international baseline for cabin crew competencies. The manual presents cabin crew safety training using a competency-based approach. It provides guidance for operators to develop cabin crew competency-based training, and to States for the approval of cabin crew training programmes.

Doc 10011 – Manual on Aeroplane Upset Prevention and Recovery Training.

Reducing the number of loss of control in flight (LOC-I) accidents is an ICAO priority, and ICAO has developed harmonized training requirements for flight crews that address the avoidance and mitigation of LOC-I events. ICAO has also introduced improvements to existing Standards and Recommended Practices (SARPs) and corresponding guidance material. Both on-aeroplane training at the commercial pilot and multi-crew pilot levels and training in a flight simulation training device at the airline transport pilot and type rating level are now promulgated in Annex 1 – *Personnel Licensing* and Annex 6 – *Operation of Aircraft, Part I – International Commercial Air Transport – Aeroplanes*, as well as in the *Procedures for Air Navigation Services – Training* (PANS-TRG, Doc 9868). This manual provides guidance to support these new provisions and is only applicable to the training of aeroplane pilots.

Cir 323 – Guidelines for Aviation English Training Programmes.

Currently, there is no system of accreditation or qualification for schools or teachers developing and delivering aviation English training. Like aviation English testing, aviation English training is an unregulated industry. This circular seeks to lay down a set of principles of best practice and guidelines by which any aviation English training can be assessed. The circular addresses four areas: Aviation English training design and development; Aviation English training delivery; Aviation English trainer profiles and backgrounds; and Aviation English trainer training.

Air Transport

Air Carrier Economics

Regional Differences in International Airline Operating Economics.

This circular analyses how differences in operations and input prices may affect the level of international air transport operating costs and the impact that changes in costs may have on air transport tariffs. Chapter 2 presents passenger, freight and mail revenue yield data of scheduled services for 17 international route groups, comprising all international routes along with passenger revenue yield data for non-scheduled operations. For the same route groups, regional differences in the costs related to the scheduled service passenger yields are presented in Chapter 3. Major causes of regional differences in costs are identified in Chapter 4.

Doc 9956 – Global and Regional 20-year Forecasts – Pilots, Maintenance Personnel, Air Traffic Controllers.

This forecast represents an independent study of civil aviation personnel dynamics for the next 20 years and contributes to the unbiased aviation data and traffic forecasts for which the International Civil Aviation Organization (ICAO) is recognized. Its exclusive findings are based on first-hand information collected from different air transport industry stakeholders. Executives of airlines, maintenance, repair and overhaul organizations; aircraft manufacturers; air navigation service providers; and civil aviation authority officials with a professional interest in air transport human resource planning will appreciate this first edition of one of the foremost works in the field. Training institutions, future aviation professionals, as well as aviation consulting businesses, will also consider it a valuable resource.

Doc 9829 – *Guidance on the Balanced Approach to Aircraft Noise Management.*

The aim of this guidance material is to provide States with advice and practical information on implementing a Balanced Approach to noise management. The Balanced Approach, which was adopted by the ICAO Assembly in 2001, encompasses four principal elements: reduction of noise at source, land-use planning and management, noise abatement operational procedures and operating restrictions on aircraft. This guidance material describes some of the measures available under each element, their interrelationship, and the tools that might be used to assess and compare their costs and benefits.

Cir 317 – Effects of PANS-OPS Noise Abatement Departure Procedures on Noise and Gaseous Emissions.

The purpose of this document is to provide information to aircraft and aerodrome operators with regard to the selection and development of noise abatement departure procedures designed according to the guidance in PANS-OPS, Volume I. Quantitative information regarding the effects of noise abatement departure procedures on noise and gaseous emissions are provided for a limited number of today's commercial transport jet aircraft. The scope of this document is limited to noise abatement departure procedures that can be operated with aircraft currently in service.

MANUALS

Guidance and information on economics of airports and air navigation services; air traffic forecasting; regulation of international air transport; and reporting and using ICAO civil aviation statistics.

Doc 8973 – *Restricted – Aviation Security Manual*

Doc 8973 provides States with detailed guidance on how to comply with the Standards and Recommended Practices (SARPs) of Annex 17 – *Aviation Security*, and assists with the development of a robust security framework able to prevent and respond when necessary to acts of unlawful interference. To help States implement Annex 17-compliant procedures, the manual covers a wide range of topics including, but not limited to, legislation, oversight, selection and training of personnel, and airport design and operations.

Doc 8991 – Manual on Air Traffic Forecasting.

This manual is addressed to civil aviation administration personnel, airline planners, planners of airports and air navigation systems and others actively engaged in practical forecasting work. It provides a survey of techniques currently used for air traffic forecasting and practical guidance on the application of these techniques. The advantages and disadvantages of the techniques as well as the criteria for selection of a particular technique for the forecast concerned are discussed.

Collection of ICAO Aviation Law Documents (electronic bundle)

The Collection of ICAO Aviation Law Documents puts together all existing ICAO aviation law documents of interest to States, the industry and the general public in a single edition. Included are the original texts of the Chicago and the Warsaw conventions with their related acts as well as other conventions, protocols, international and multilateral agreements in no less than three languages – English, French and Spanish.

This bundle provides the entire aviation legal framework necessary for resolution of aviation legal issues, disputes and claims; negotiation of air services agreements; providing legal advice or consulting services. It is a useful collection of air and space law reference material for regulators and academics.

This document is recommended for aviation lawyers, air and space law policymakers, academics and legal professionals from civil aviation authorities, aviation law firms, international organizations, aviation industry players, insurers and universities with aviation law programmes.

GUIDANCE MATERIAL

Cir 288 – Guidance Material on the Legal Aspects of Unruly/Disruptive Passengers.

This circular is intended to facilitate the implementation of Resolution A33-4 of the 33rd Session of the ICAO Assembly: *Adoption of national legislation on certain offences committed on board civil aircraft (unruly/disruptive passengers)*. The material covers three major aspects of the unruly passenger problem: the list of specific offences for inclusion in national law, extension of jurisdiction over such offences, and appropriate legal mechanisms available for addressing them. Resolution A33-4 and the model legislation are included in the circular.

2002. 18 pp.

Cir 295 – Guidance on the Implementation of Article 83 bis of the Convention on International Civil Aviation.

This circular is aimed at assisting Member States in developing appropriate policies with respect to the implementation of Article 83 *bis* of the *Convention on International Civil Aviation* (Chicago, 1944), which entered into force on 20 June 1997. It is intended to provide better regulation and oversight over air safety regarding international lease, charter or interchange of aircraft. This material comprises, *inter alia*, background information on the subject, as well as Guidelines and a Model Agreement for the implementation of Article 83 *bis*.

THE INTERNATIONAL CIVIL AVIATION ORGANIZATION (ICAO)

ICAO Flag.

The flag was created specially to mark ICAO's 50th Anniversary and was flown officially for the first time on 7 December 1994 at ICAO Headquarters, Montréal. The ICAO flag bears the blue and white colours of the United Nations, as well as its depiction of the land masses of the earth, enveloped by two olive branches symbolizing peace. To these symbols of the United Nations, ICAO added the wings which have come to symbolize how international civil aviation helps to bring the peoples of the world together in the pursuit of peace.

In order to ensure the proper use of the ICAO flag, Doc 9638, the *ICAO Flag Code and Regulations*, is included in the purchase price of the flag.

ICAO DATA PLUS – ONLINE**DTPL-1U: Air Carrier Traffic (ACT)**

This module includes operational, traffic and capacity statistics of both international and domestic scheduled airlines as well as non-scheduled operators. The new tool allows you to quickly visualize monthly traffic and capacity trends for passenger, freight and mail services for an individual carrier, group of carriers or compare these between different air carriers.

English only

Order No. DTPL-1U**\$2 500.00****DTPL-2U: Traffic by Flight Stage (TFS)**

TFS contains annual traffic on-board aircraft on individual flight stages of international scheduled services. The data, classified by international flight stage, shows for each air carrier and aircraft type used, the number of flights operated, the aircraft capacity offered and the traffic (passengers, freight and mail) carried.

English only

Order No. DTPL-2U**\$3 000.00****DTPL-3U: Air Carrier Finances (ACF)**

This module shows international scheduled airlines financial data, including revenues and expenditures for the year (calendar or fiscal), assets and liabilities at the end of the year and retained earnings as well as summary traffic data. In addition, comparisons are provided of unit costs and revenue yields over time and between air carriers, break-even load factors, the distribution of the main accounts included in the operating revenues and costs, as well as a few financial ratios.

English only

Order No. DTPL-3U**\$1 500.00****DTPL-4U: Airport Traffic (AT)**

Covers monthly or annual traffic data for major international airports. The data consists of aircraft movements, number of passengers embarked and disembarked and tonnes of freight and mail loaded and unloaded.

English only

Order No. DTPL-4U**\$1 300.00****DTPL-5U: On-Flight Origin and Destination (OFOD)**

Shows on an aggregate basis the number of passengers, freight and mail tonnes carried between all international city-pairs on scheduled services. These data are collected on a quarterly basis, but due to confidentiality restrictions, they can only be shown six months after the end of each reporting period.

English only

Order No. DTPL-5U**\$3 000.00****DTPL-6U: Air Carrier Fleet and Personnel (ACFP)**

Part one covers the fleet data of international and domestic scheduled airlines as well as non-scheduled operators. The data consist of statistics on the number and types of aircraft operated, their capacity and their utilization.

Part two deals with the personnel data of international and domestic scheduled airlines as well as non-scheduled operators. The data consist of statistics on the number of airline personnel by job category and the annual expenditures for these personnel.

English only

Order No. DTPL-6U**\$1 500.00****DTPL-3MU: Bundle of 3 Data Plus modules.**

HOW TO ORDER ICAO PRODUCTS AND SERVICES

ORDERS

The fastest way to order ICAO Products and Services is online at www.icao.int. Alternatively, orders can be made by email, fax, telephone or mail. Please state the catalogue order number, language(s) required, exact title of the item, and quantity required for each item. Orders can also be placed through the ICAO Regional Offices or the authorized resellers listed in this catalogue.

To avoid duplication, unnecessary delays and transaction costs, please submit your order only once, especially those placed by email, fax or telephone. Inquiries on the status of an order should indicate date of order and mode of payment and be marked "This is an inquiry only. Please do not duplicate order."

Standing orders. Standing orders can be established for any ICAO publication or for publications on a given subject, so that new editions, new titles, amendments and supplementary materials are automatically sent to customers as these become available. Group numbers pertaining to a list of documents are listed on page 133 of this catalogue to facilitate the establishment of a standing order for a categorized group of documents.

To create a standing order, please contact the ICAO E-Commerce and Publication Sales Unit. A deposit account is necessary for standing orders.

Internet Subscription Services. Another way to access ICAO products is through our web-based information service. Subscriptions give online access to the full and most recently updated text of certain ICAO products. For additional details, please visit our website at www.icao.int and click on "ICAO Store" or please contact us at sales@icao.int for more information.

PAYMENT OPTIONS

Credit card (all orders must be paid in advance). Online orders can be paid using Visa or MasterCard. Orders made by email, fax, telephone or mail can be paid using Visa, MasterCard or American Express. In all cases, please state the cardholder's name, credit card number, expiry date and billing address. Orders paid by credit card are normally delivered within 10 working days worldwide for regular courier and 5 to 6 working days for express courier, so customers are encouraged to use credit cards for fastest service.

Deposit account. To facilitate purchases of ICAO publications or to allow for standing orders, customers can establish a deposit account with a minimum initial deposit of 500 USD. Customers are required to maintain sufficient funds to avoid delay in delivery of documents. Please contact our E-Commerce and Publication Sales Unit.

Cheque or money order. These should be made payable to *International Civil Aviation Organization*, in U.S. dollars, drawn on a bank located in Canada or the United States, and mailed to: International Civil Aviation Organization, Attn: Treasury Office, 999 Robert-Bourassa Boulevard, Montréal, Québec, Canada H3C 5H7. (Please allow 8 to 10 weeks for delivery of orders paid by cheque or money order.) Only regular mail can be accepted at the Case Postale address.

How to order ICAO products and services

Bank transfer. Please provide your bank with the quotation number and order number whenever possible. Mail, fax or email your order to ICAO (Attention: E-Commerce and Publication Sales Unit) and include a copy of the bank transfer details. (Please allow 8 to 10 weeks for delivery of orders paid by bank transfer.) A charge of 10 USD should be added to cover charges by ICAO's bank. All bank charges must be prepaid, in U.S. dollars, into the following account:

Royal Bank of Canada, 1140 St. Catherine Street West, Montréal, Quebec, Canada H3B 1H7

Beneficiary: ICAO

Swift code: ROYCCAT2

Bank code: 003

Transit code: 05101

Bank account: 4004 164

Currency of account: USD

Ordering customer: Specify name of organization, contact name, telephone, fax and email

Details of payment: Publications Order (specify Quotation number, if applicable)

Corresponding United States Bank Information:

Name of Intermediary Financial Institution in the United States:

JP Morgan Chase Bank

New York, NY

ABA/Routing #: 021000021

SWIFT code: CHASUS33

SHIPPING OPTIONS

The courier company is determined by ICAO. Please note that all local delivery and customs clearing charges, if any, shall be borne by the purchaser.

Regular courier. A shipping and handling charge of 10% of the total cost of *documents only* will be applied, with a minimum charge of 25 USD.

Express courier. Where express courier is available, a shipping and handling charge of 15% of the total cost of *documents only* will be applied, with a minimum charge of 35 USD.

RETURNS

Returns for exchange or refund require prior written approval from ICAO and are subject to a restocking fee of 25% of the returned order. It may take up to two months to receive a refund. The deadline to submit a request for a refund is 30 days after the shipping date for print publications and 30 days after the purchase date for digital publications.

HOW TO REACH US

To request a quotation or information on publications, to set up a standing order or a deposit account, or to place an order, please contact ICAO Headquarters:

International Civil Aviation Organization
Attention: E-Commerce and Publication Sales Unit
999 Robert-Bourassa Boulevard, Montréal, Quebec
Canada H3C 5H7

Telephone: +1 514-954-8022
Fax: +1 514 954-6769
Email: sales@icao.int

Quick ordering

Click on <[ICAO Store](#)> for quick online ordering. Publications can also be ordered by email, fax, telephone or mail.

The Catalogue and its Supplements

The PDF version of the Catalogue and its Supplements are available free of charge on our website at [www.icao.int](#). Click on <Information Resources>, then <Publications> and select <Products and Services Catalogue>. During 2024, new documents, updated editions, amendments and supplements, in all ICAO languages, will be published and listed in the Supplements to the Catalogue.

Free Publications

We are pleased to inform you that free documents are available on our website. Click on <Information Resources>, then <Publications> and select <Doc Series>. You will find a selection of documents, searchable databases and informative booklets.
