

International Civil Aviation Organization

**FIFTEENTH MEETING OF THE ASIA/PACIFIC METEOROLOGICAL
INFORMATION EXCHANGE WORKING GROUP
(MET/IE WG/15)**

Bangkok, Thailand, 20 – 22 March 2017

Agenda Item 5: Quality control, monitoring and management of meteorological information exchange

AVAILABILITY OF NON-SCHEDULED OPMET DATA FROM ASIAPAC

(Presented by IATA)

SUMMARY

This paper summarizes the results of an availability monitoring of Non-Scheduled OPMET data for the ASIAPAC region with the focus on SADIS and WIFS distribution. Further it provides information about deficiencies.

1. INTRODUCTION

1.1 SADIS and WIFS are the two main data systems for weather data. Primarily SADIS is a satellite broadcasting system but it is also possible to get access to the SADIS Secure FTP Service. WIFS is only using the ftp for data provision.

1.2 Both systems are reliable source of weather data. Beside the distribution of WAFS products it is used for broadcasting Non-Scheduled OPMET data.

2. DISCUSSION

2.1 IATA requires that all issued Non-Scheduled OPMET data (AIRMET, GAMET, SIGMET, Volcanic Ash Advisories, Tropical Cyclone Advisories) are distributed globally via SADIS and WIFS.

2.2 The IATA monitoring for Non-Scheduled OPMET data was performed in order to compare the availability of these data on SADIS and WIFS. As a further reference the data feed from DWD (German MET Office) is considered. The monitoring covers a period of seven (8) days between 7th and 14th of February 2017.

2.3 The monitoring showed that with one exception all issued Non-Scheduled OPMET data are available on both distribution systems. AIRMETs (WA) issued for **RKRR** have been never received from WIFS.

2.4 IATA has no information if AIRMETs are also issued by other states in the AISAPAC region and if yes, why they are not distributed as required.

2.5 The comparison list can be found in the appendix to this working paper.

3. ACTION BY THE MEETING

3.1 The meeting is invited to:

- a) to note results of the IATA Non-Schedule OPMET data monitoring and information provided
- b) to use the result tables to improve the Non-Schedule OPMET data exchange in general especially in coordination with the SADIS and WIFS operators
