1. INTRODUCTION

1.1 The meeting may wish to recall that, in order to improve the timeliness of aeronautical information and in accordance with the ICAO Guidelines on the use of Public Internet for Aeronautical Applications (Doc 9855), the MIDANPIRG/11 meeting, through Conclusion 11/39, encouraged States to use the internet for the advance publication of the Aeronautical Information Products.

2. DISCUSSION

2.1 In accordance with the ICAO Annex 15, *“Each Contracting State shall ensure that the aeronautical data and aeronautical information provided are complete, timely and of required quality in accordance with 3.3.”*

2.2 Issues/delays in mail/postal system is usually out of AISPs' control. Considering the importance of timeliness of aeronautical information for the Users, in particular AIRAC amendments, relying on hardcopy and mail system would not ensure that the States' AIS products are received, processed and used by the Users in a timely manner. AIS websites are currently the main resource of users, in particular for DAT providers, to get access to States' aeronautical information.

2.3 11 (out of 15) MID States have developed websites for AIS. However, only 8 States provide their AIP, 7 States AIP amendments and 6 States NOTAL Lists on the web, as reflected in the following table:

2.4 Looking into States' AISP websites, aeronautical information products are provided on the web with different quality, completeness and formats. Accordingly, in the absence of an updated global guidance on the provision of AIS products on web, development of a MID Regional guidance may be considered.

3. ACTION BY THE MEETING

3.1 The meeting is invited to:

- a) encourage States to provide on the web, in a timely manner, their AIS Products; AIP (including Amendments and Supplements), AICs, NOTAM Lists and digital datasets, as appropriate; and
- b) agree on the necessity for the development of a "MID Regional Guidance on posting of AIS products on the web, in order to harmonize the provision, quality and timeliness of AIS products on the web.
