1. INTRODUCTION

1.1 The identification, assessment and reporting of air navigation deficiencies represent a regular task of the MIDANPIRG and its subsidiary bodies.

2. DISCUSSION

2.1 The meeting may wish to recall that the MIDANPIRG/15 meeting agreed to the following Conclusion related to elimination of Air navigation Deficiencies:

CONCLUSION 15/35: AIR NAVIGATION DEFICIENCIES

That, States be urged to:

- a) use the MID Air Navigation Deficiency Database (MANDD) for the submission of requests for addition, update, and elimination of Air Navigation Deficiencies, including the submission of a specific Corrective Action Plan (CAP) for each deficiency; and*
- b) submit a Formal Letter to the ICAO MID Regional Office containing the evidence(s) that mitigation measures have been implemented for the elimination of deficiency(ies) when requesting the elimination of deficiency(ies) from the MANDD.*

2.2 The meeting may wish to recall that the MIDANPIRG/16 meeting noted with concern that the majority of deficiencies listed in the MANDD have no specific Corrective Action Plan (CAP). The meeting urged States to implement the provisions of MIDANPIRG Conclusion 15/35 related to elimination of Air navigation Deficiencies, in particular, the submission of a specific Corrective Action Plan (CAP) for each deficiency.

2.3 The MIDANPIRG/16 meeting noted that some deficiencies are related to old requirements of the previous Basic ANP and FASID. However, after the completion of the transition to the new MID eANP (VOL I, II and III) on 15 February 2016, some of those requirements might be included in the new eANP in a more general way based on the PBA approach. Accordingly, the meeting agreed that some of the data included in the MANDD (in particular the "Reference") should be reviewed and updated by the relevant MIDANPIRG Subsidiary Bodies.

2.4 MIDANPIRG/16 reviewed and updated air navigation deficiencies in the AIM field; 4 priority "A" deficiencies related to Aerodrome Obstacle Chart, Aerodrome Chart, QMS and AIP and 1 priority "B" deficiency related to World Aeronautical Chart were deleted. The total number of AIM deficiencies has decreased from 53 to 48 since MIDANPIRG/15 (42 priority "A" and 6 priority "B" deficiencies). The lack of provision of terrain and obstacle datasets, the deficiencies related to AIP and aeronautical charts and the QMS represents 70% of these deficiencies.

2.5 The updated list of deficiencies in the AIM field, endorsed by MIDANPIRG/16, is at **Appendix A** to this working paper for the review of the meeting.

3. ACTION BY THE MEETING

3.1 The meeting is invited to:

- a) review and update the list of deficiencies in the AIM field;
- b) urge States to take necessary follow-up actions to implement MIDANPIRG/15 Conclusion 14/35, in particular submission of a specific Corrective Action Plan (CAP) for each deficiency.

Urgent requirement consisting of any physical, configuration, material, performance, personnel or procedures specification, the application of which is urgently required for air navigation safety.

'A' priority = Top priority requirements necessary for air navigation safety.

Top priority requirement consisting of any physical, configuration, material, performance, personnel or procedures specification, the application of which is considered necessary for air navigation safety.

'B' priority = Intermediate requirements necessary for air navigation regularity and efficiency.

Intermediate priority requirement consisting of any physical, configuration, material, performance, personnel or procedures specification, the application of which is considered necessary for air navigation regularity and efficiency.
