MIDAMC STG/6

MIDAMC Activities

- The MIDAMC has been in operation on trial basis since 12 Dec 2012, and was providing the necessary support and updates every AIRAC date to all MID States.

- The MIDAMC provide - among others- the following main tasks on daily basis to support its operations:

1. provide regular email update as at each AIRRAC date;
2. check the routing tables for consistency;
3. register new Users;
4. keep the Network Inventory data updated;
5. coordinate and communicate with MID Users and support AMHS Planning and Implementation when required;
6. Synchronize the ATS Addresses with the EURAMC; and
7. move data between MIDAMC Areas according to the MIDAMC AIRAC phases

AMHS/TCP-IP			MHS	10.100.100.15	[X]

- MIDAMC sends periodical notifications to all States to make required changes every AIRAC cycle. However, some States don't do timely update, which cause operational problems (unable to deliver, wrong addressee translation)
- The MIDAMC was established because some of the operational functions on AMC, like routing management were available to EUR COM Centers
- Establish Whatsapp group for instant notification and to provide alternative means of communication, including all States main focal points.????
- In 2018, EUROCONTROL & AFSG decided to use routing management function for all AMC users overall the world.

The meeting is invited to urge States to:

a) Update AFS centres point of contacts;

b) Agree to use AMC routing management functions;

c) Note that MIDAMC website will no longer be used;and

d) encourage States to nominate experts to join the MIDAMC team in managing the ATS messaging network in the MID Region.
