May 28, 2020

Lockdown was partially
lifted, Domestic flights
were permitted

March 31, 2021

international flights were
permitted

- Risk Assessment
- Supporting monitoring activities
- Testing
- Surveillance
- Precautionary measures

Our national Airlines has done tremendous efforts since day 1 to overcome COVID-19 pandemic and mitigate the risk of spread among employees and passengers

- Double and triple crew to fly long-haul flights with no layover to avoid crew institutional quarantine on return to base.
- Mandatory full staff vaccination programs and frequent testing.
- Protecting the staff and passengers, increasing confidence in the air travelling.
- Flexible working hours and working remotely.

Ease COVID-19 curbs from Oct 17, 2021

Aircraft sanitization
Aircraft will undergo deep cleaning and disinfection process constantly and regularly

Cabin crew boarding control
Your crew will control boarding flow and seating to assist social distancing

Cabin crew to avoid interaction with guests' carry-on items

Social distancing
Staff throughout the terminal will guide you to maintain social distancing at all times

The crew will keep wearing masks in all INTL flights unless other PPE items are required by the authority at arrival destination

Tawakkalna Partners:

CAPSCA is the only project in the world that coordinates international aviation's response to public health risks. In this regard, we emphasize strengthening communication and coordination between public health institutions and the aviation sector is critical.

**THANK
YOU!**
