The MIDANPIRG Air Traffic Management Sub-Group, Eighth Meeting

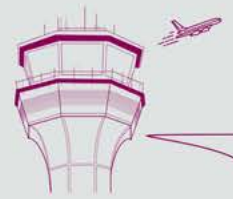

Amman, Jordan 7 - 10 November 2022

Eighth MIDANPIRG Air Traffic Management Sub-Group Meeting

BAHRAIN FWC2022 PREPARATION

Amman, Jordan, 7 – 10 November 2022

BAHRAIN FWC2022 PREPARATION

1. Distribution of workload

- Flexible sectorization in anticipation of increased workload and contingency.

2. Temporary amendment to traffic flow for OBXX departures arriving OTHH/OTBD

- Undergoing Safety Assessment as part of Change Management Procedures.

3. Temporary amendment to traffic flow for OTBD departures requesting FL400+

- Undergoing Safety Assessment as part of Change Management Procedures.

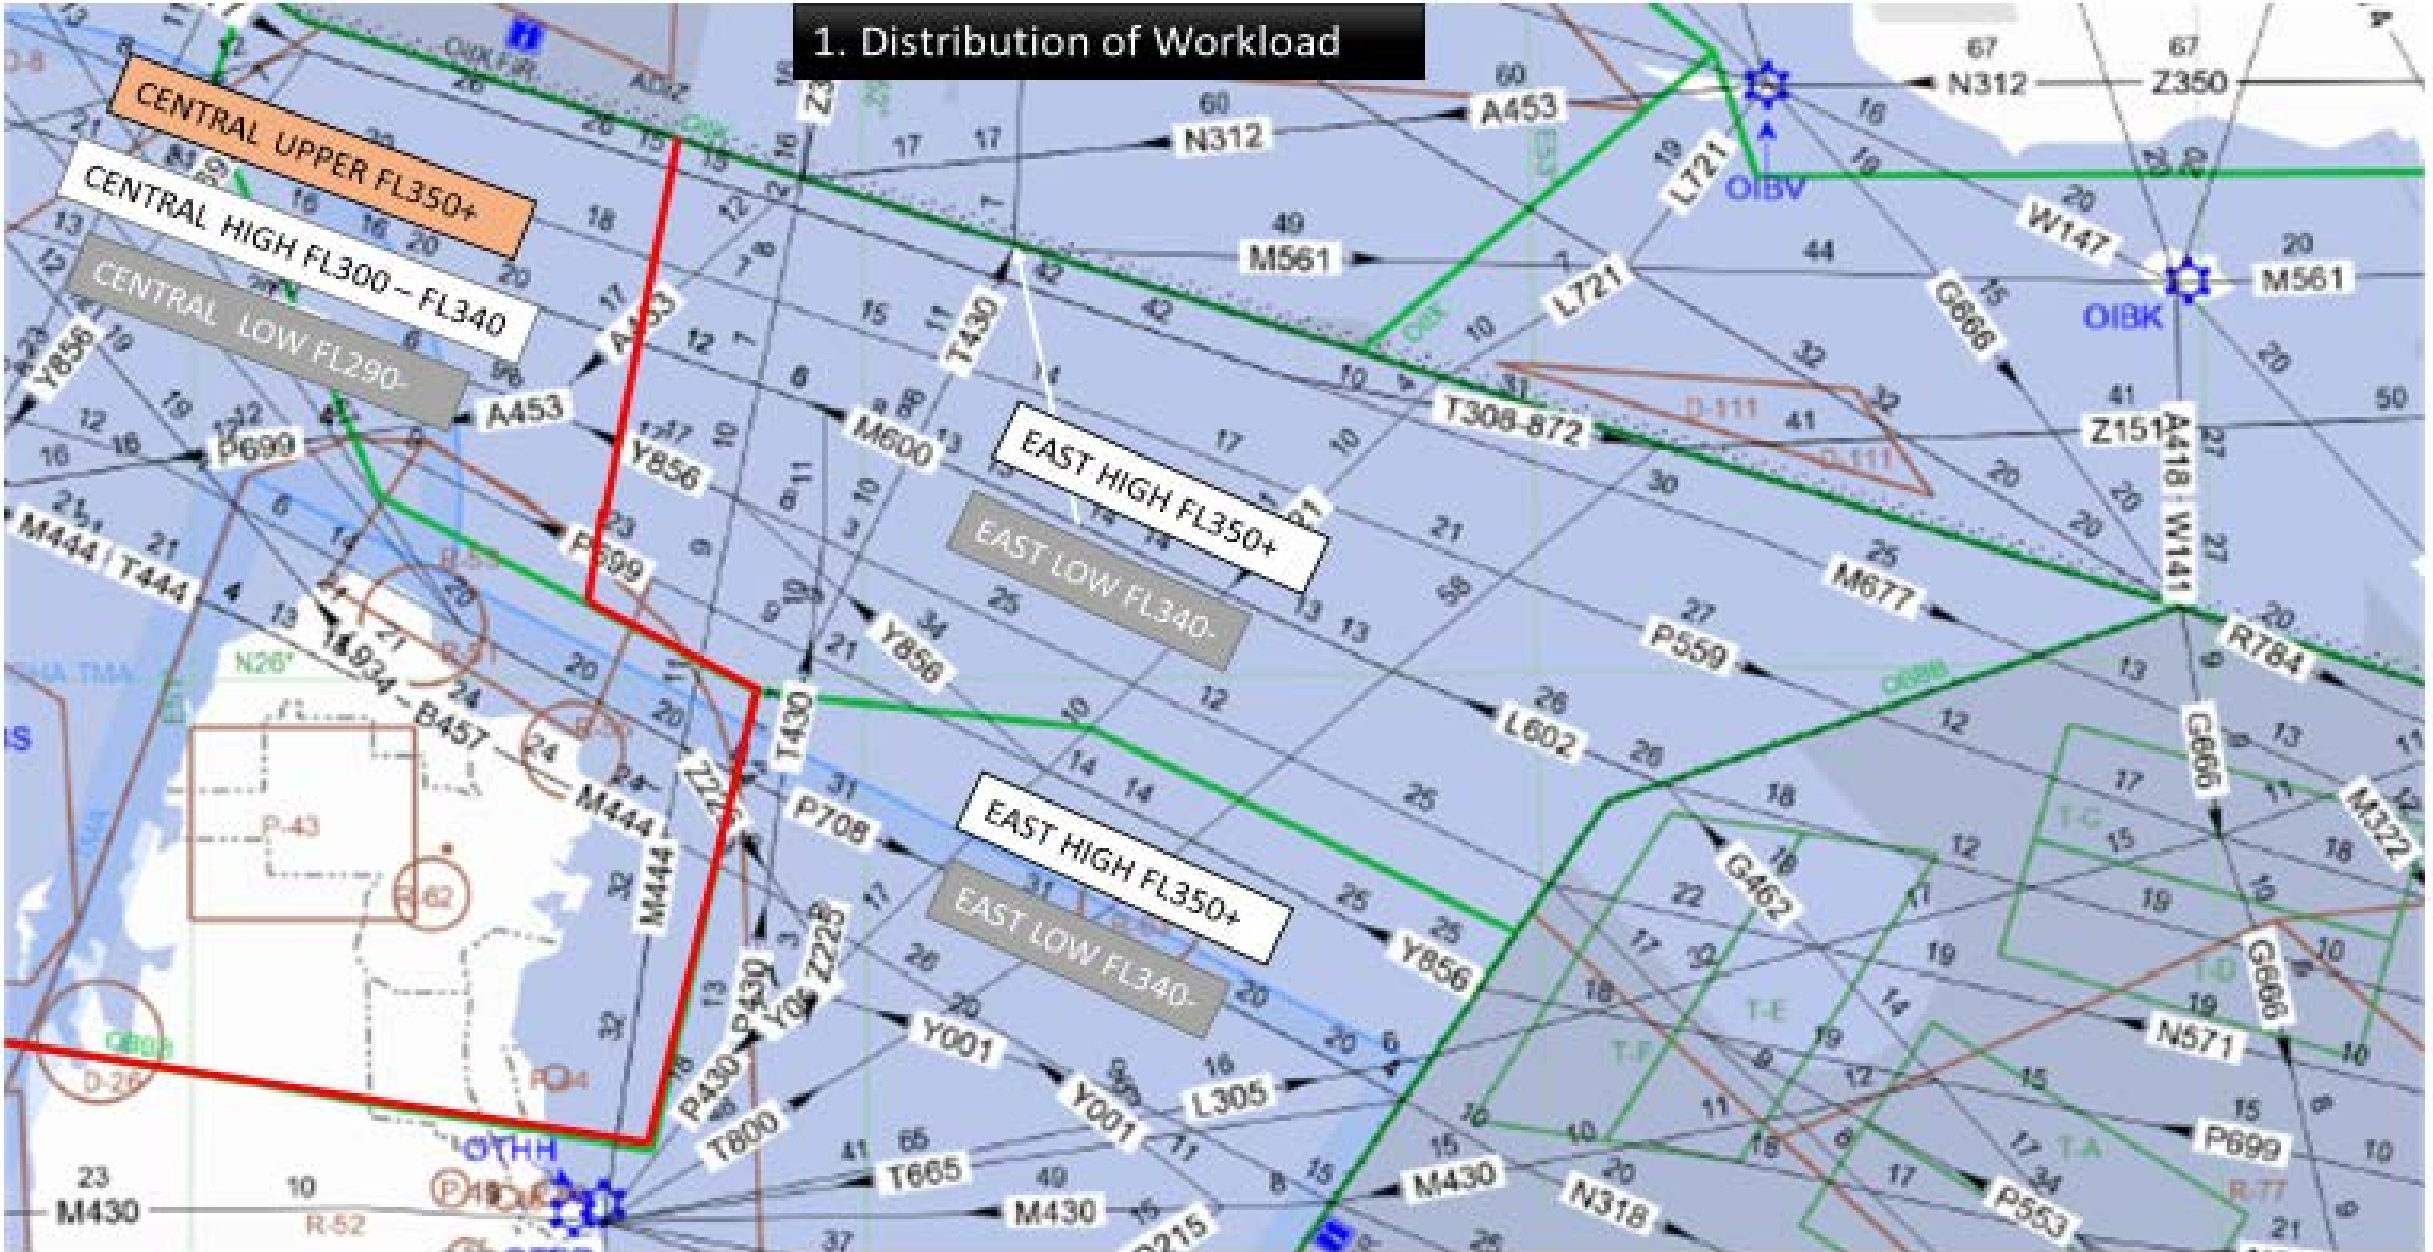

4. FLOW transparency

- Will share escalating flow procedures with surrounding AORs once received from Doha.

5. Contingency Preparation

- Temporary reduction in climbing/descending boundary traffic with KSA in order to allow for possible contingency measures.

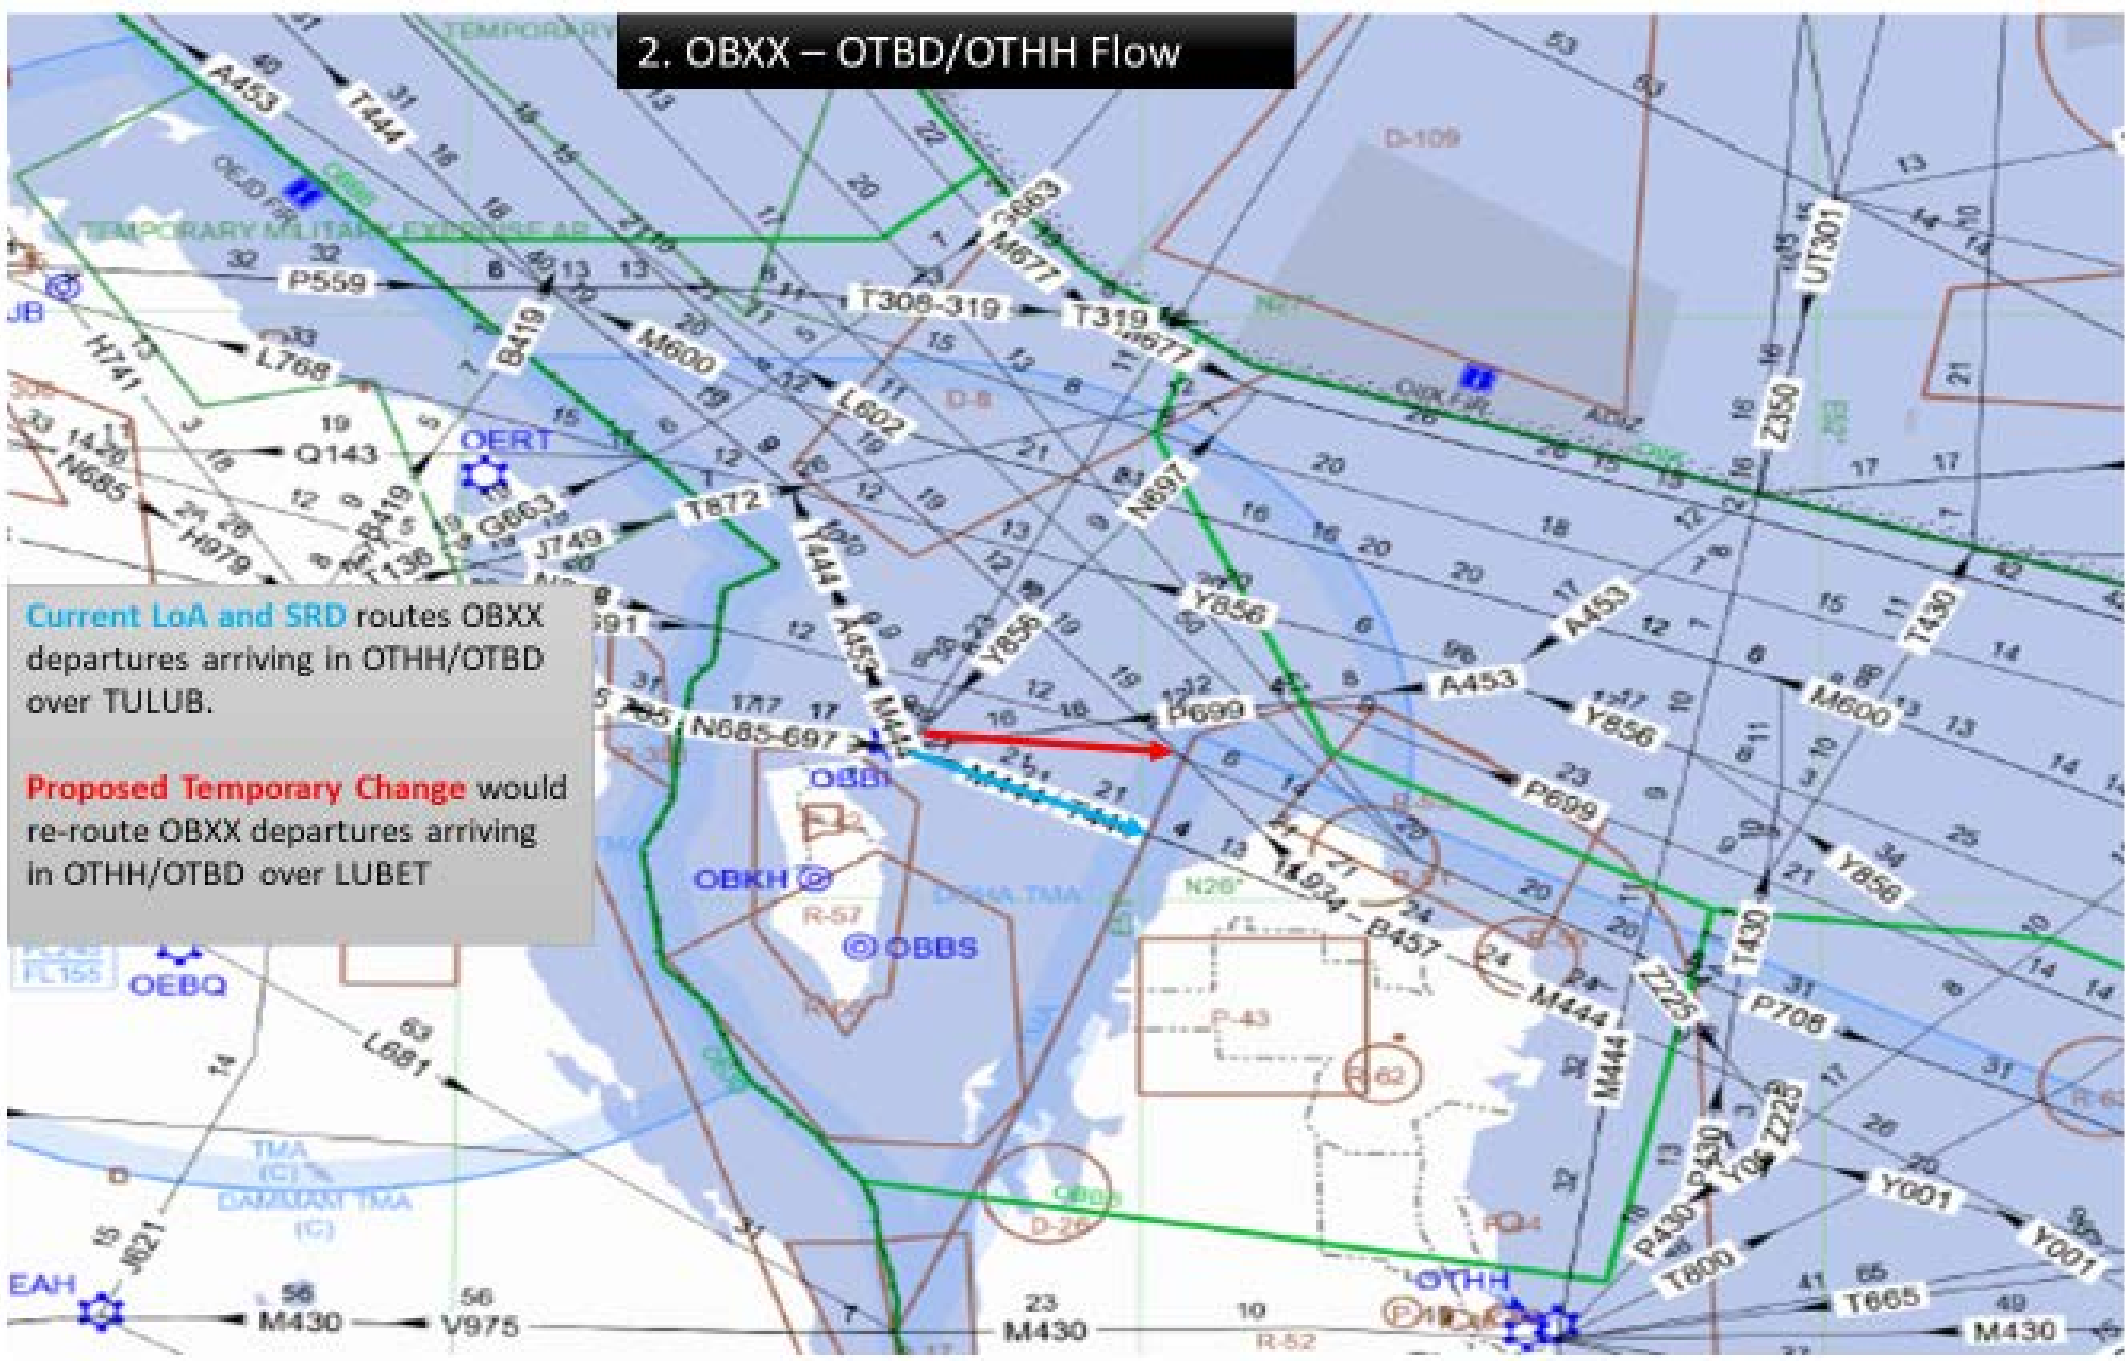

1. Distribution of Workload

2. OBXX – OTBD/OTHH Flow

Current LoA and SRD routes OBXX departures arriving in OTHH/OTBD over TULUB.

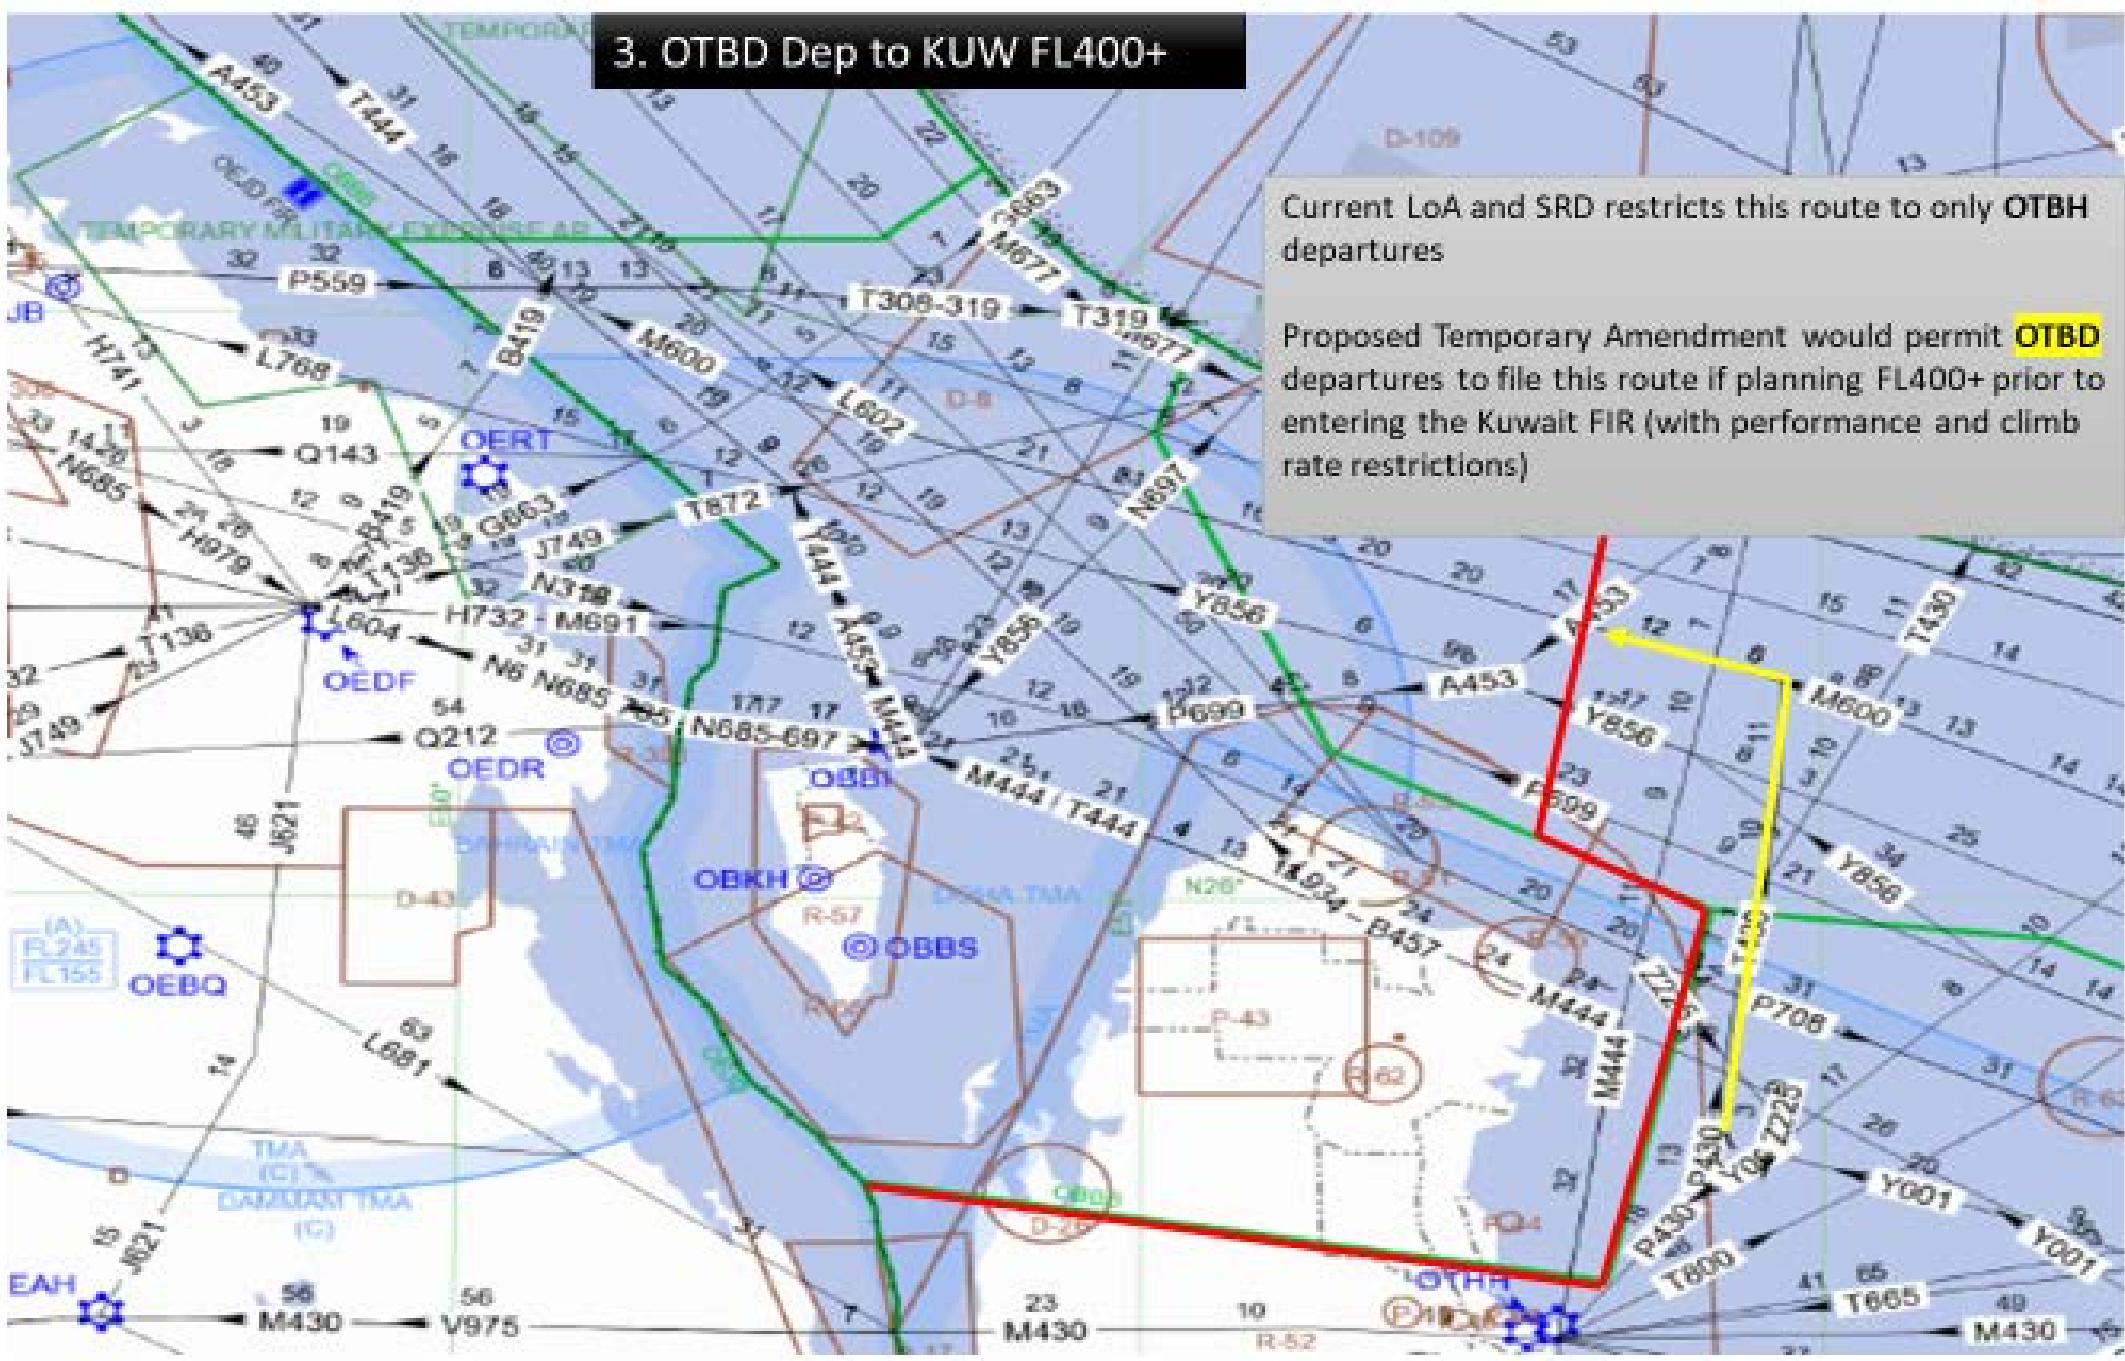

Proposed Temporary Change would re-route OBXX departures arriving in OTHH/OTBD over LUBET

3. OTBD Dep to KUW FL400+

Current LoA and SRD restricts this route to only OTBH departures

Proposed Temporary Amendment would permit **OTBD** departures to file this route if planning FL400+ prior to entering the Kuwait FIR (with performance and climb rate restrictions)

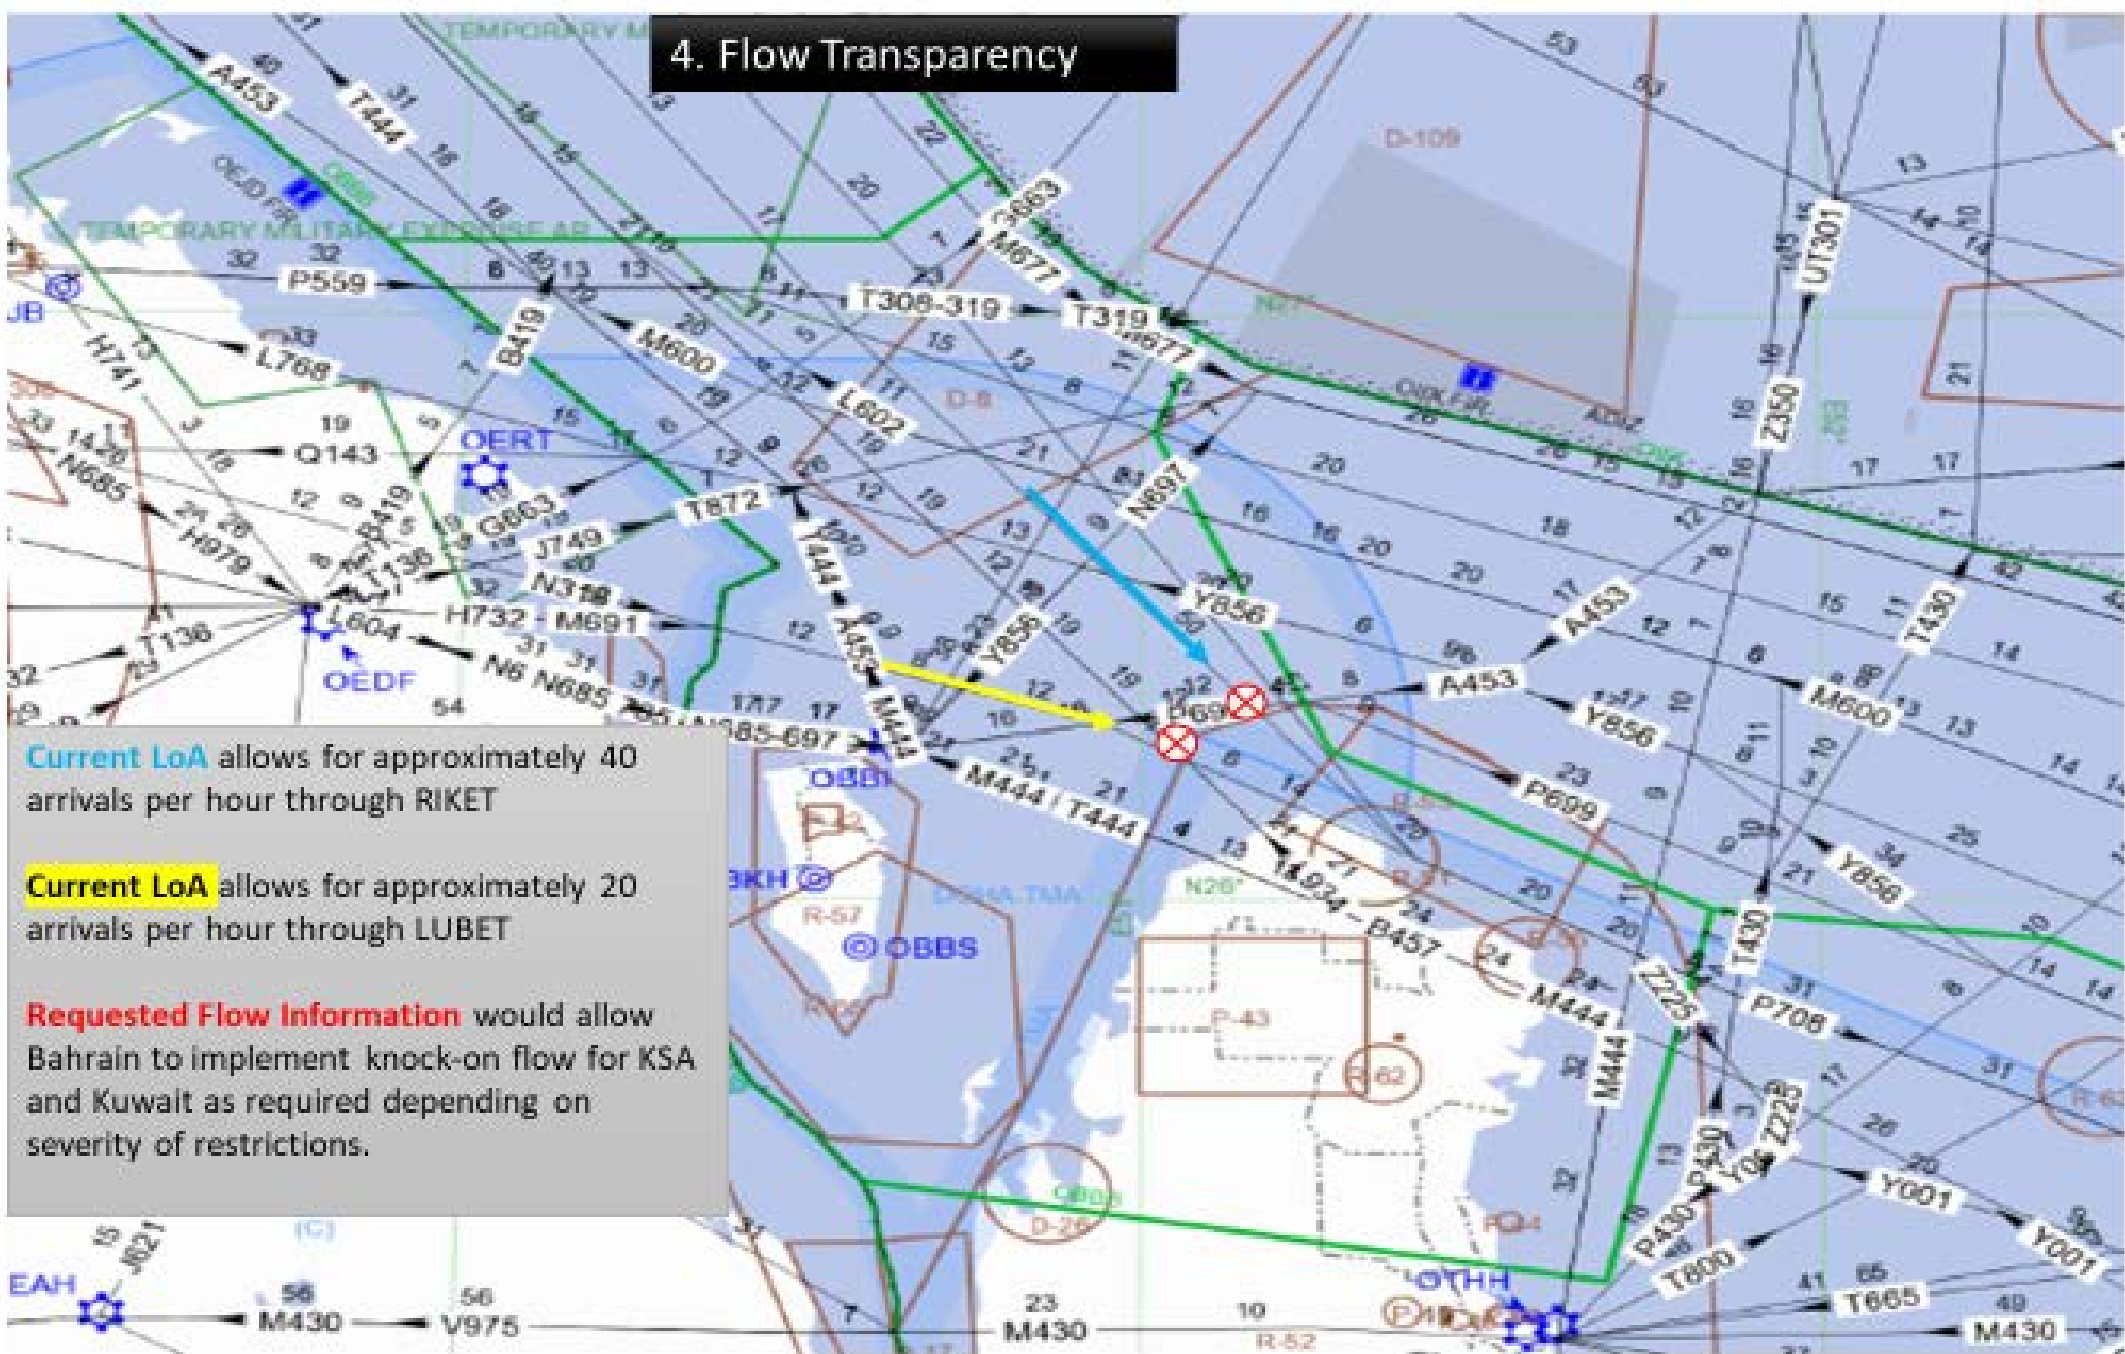

4. Flow Transparency

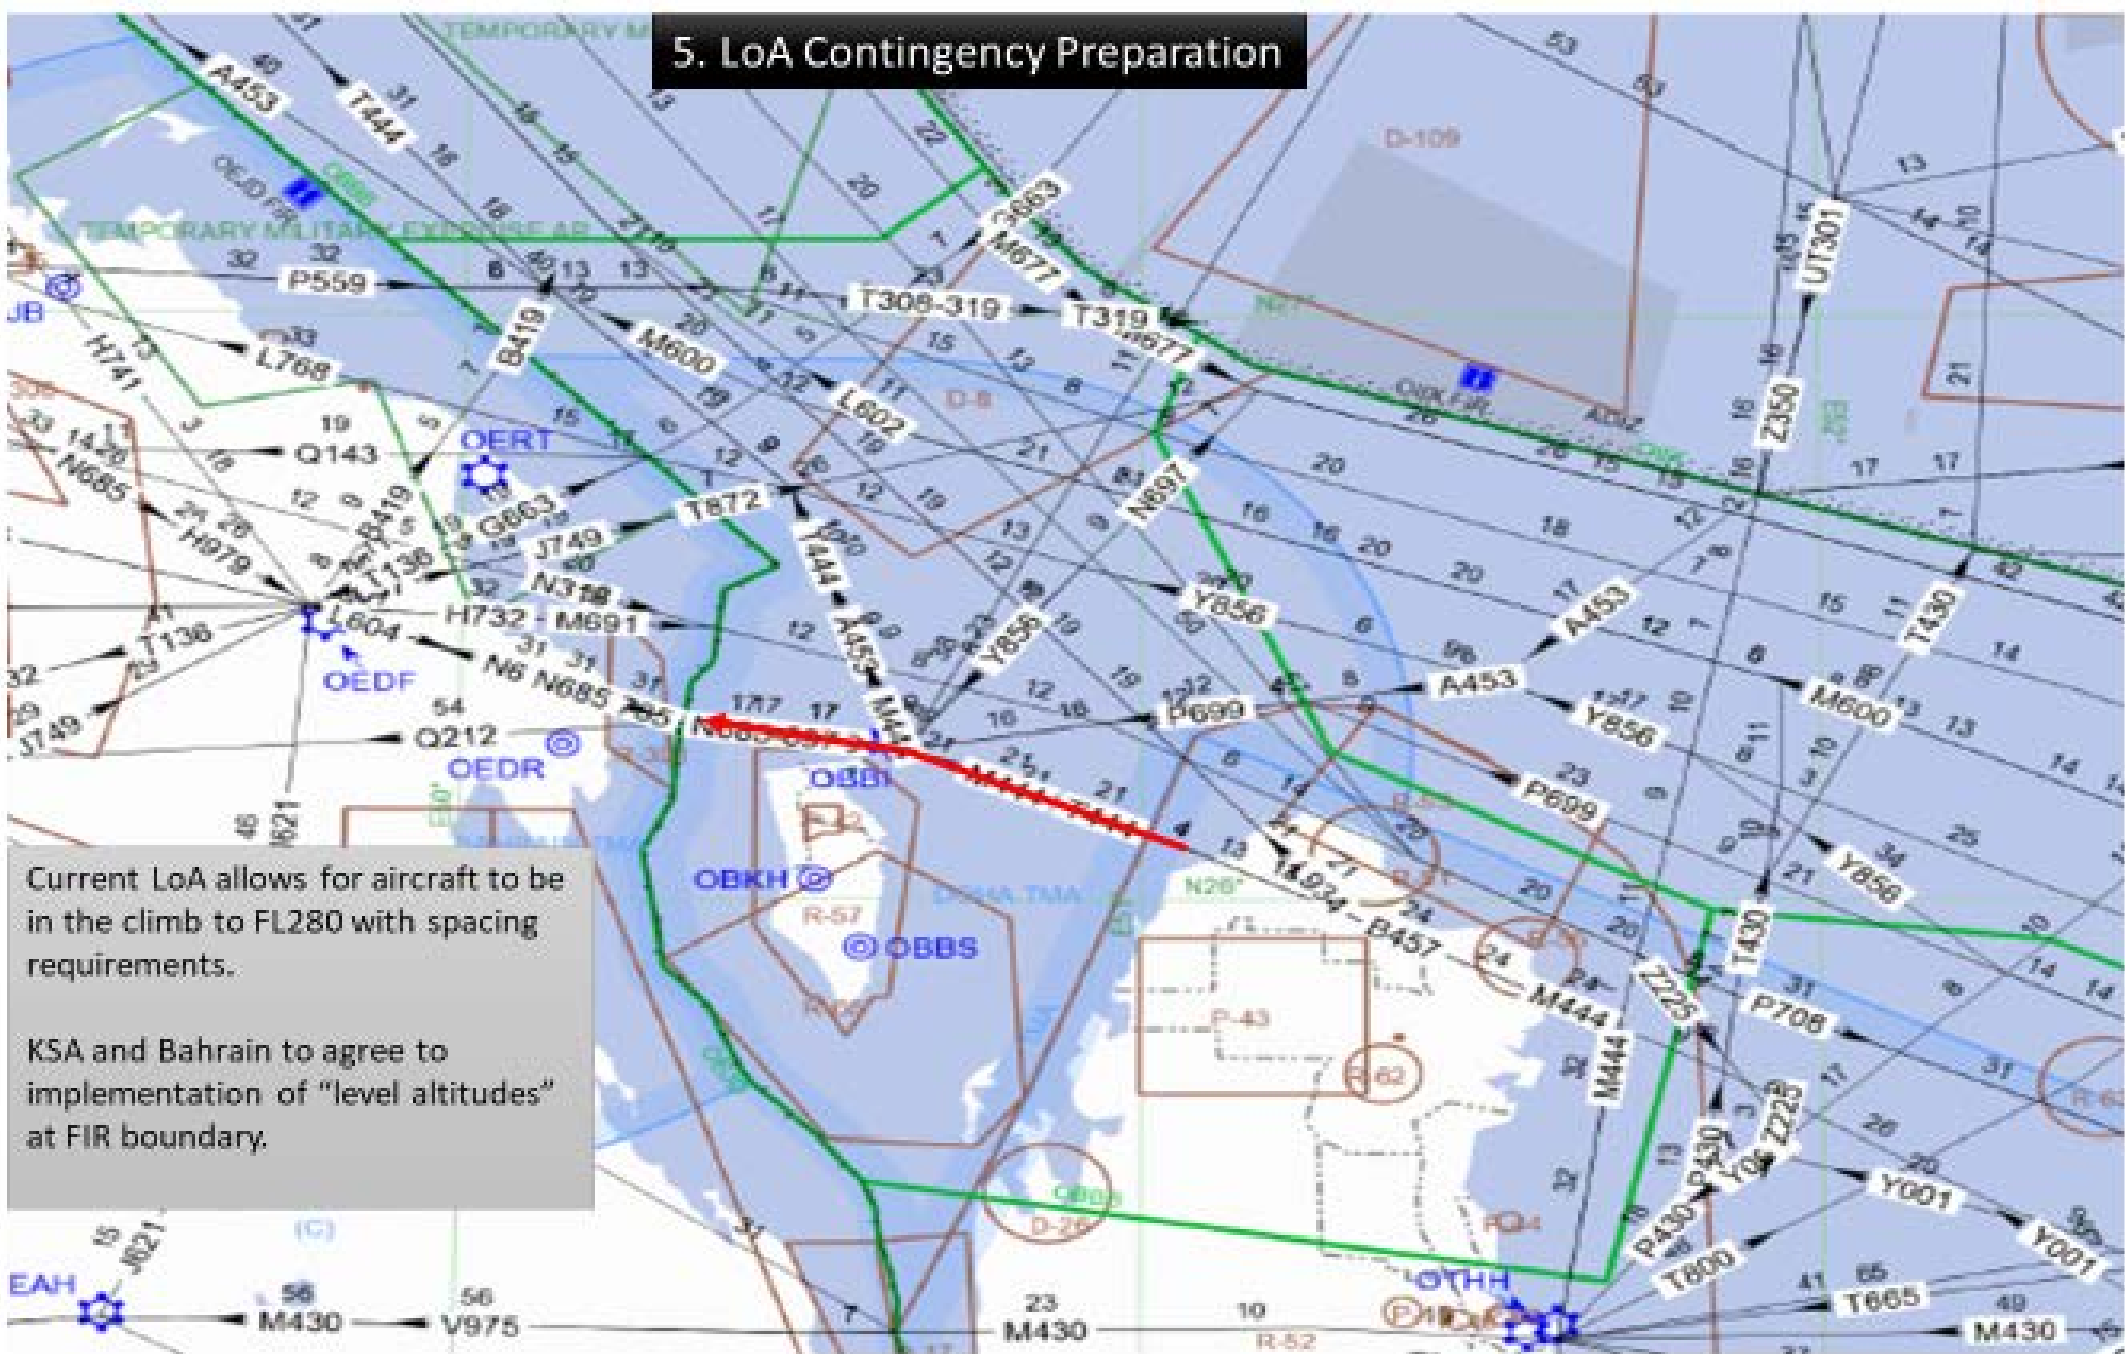

Current LoA allows for approximately 40 arrivals per hour through RIKET

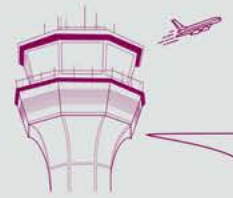

Current LoA allows for approximately 20 arrivals per hour through LUBET

Requested Flow Information would allow Bahrain to implement knock-on flow for KSA and Kuwait as required depending on severity of restrictions.

5. LoA Contingency Preparation

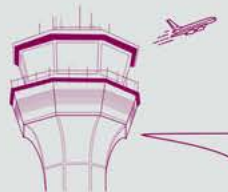

SUMMARY

- Increase Workload Adaptability / Flexibility.
- Doha TMA Service Provision.
- Efficiency / Tactical Deconfliction.
- Regional Mitigation of Flow and Contingency Measures.
- Near Border Contingency Preparation.
