International Civil Aviation Organization

### MIDANPIRG RANP/NANP Task Force

First Meeting (RANP/NANP TF/1) (Cairo, Egypt, 19 – 22 February 2024)

## Agenda Item 5: Review and update of the MID Air Navigation Strategy

REVIEW AND UPDATE OF THE MID AIR NAVIGATION STRATEGY PLAN (MID DOC 002)

(Presented by the Secretariat)

#### SUMMARY

This paper presents a Draft Revised MID Air Navigation Strategy (ICAO MID Doc 002) for review by the meeting.

Action by the meeting is at paragraph 3.

#### REFERENCES

- GANP 7th edition;
- MID Air Navigation Strategy Plan (ICAO MID Doc 002); and
- GANP/NANP Workshop (5-8 March 2023, Cairo, Egypt)

### 1. Introduction

- 1.1 The Assembly, through Resolution A41-6, endorsed the 2023-2025 edition of the Global Air Navigation Plan (GANP) as the global strategic directions for safety and the evolution of the air navigation system.
- 1.2 Furthermore, the Assembly 41 resolved that these global plans shall provide the frameworks in which regional, sub-regional and national plans will be developed and implemented, thus ensuring consistency, harmonization and coordination of efforts aimed at improving international civil aviation safety, capacity and efficiency.
- 1.3 The ICAO MID Office organized a GANP/NANP Workshop (5-8 March 2023, Cairo, Egypt). The objectives of the GANP/NANP workshop were to familiarize the participants with the 7th Edition of the GANP endorsed by the A41 and showcase the different ASBU Block 0 and Block 1 Threads & Elements, through online demonstration using the GANP Portal. The Workshop provided also an opportunity to explore ways and means to support the implementation of the agreed air navigation priorities taking into consideration airspace users' requirements, fleet equipage, infrastructure, interoperability and inter-regional coordination, and address the Regional and National planning for ASBU implementation.

### 2. DISCUSSION

- 2.1 The meeting may wish to note that the MID Region Air Navigation Strategy (ICAO MID Doc 002, Edition March 2023) was endorsed by MIDANPIRG, through Conclusion 20/7.
- Based on inputs from the different MIDANPIRG subsidiary bodies, a Draft revised version of the MID Region Air Navigation Strategy has been consolidated as at *Appendix A*.

# 3. ACTION BY THE MEETING

- 3.1 The meeting is invited to:
  - a) review the Draft revised version of the MID Region Air Navigation Strategy (MID Doc. 002) at **Appendix A**;
  - b) agree on necessary amendments to keep pace with the developments; and
  - c) agree on the following Draft Conclusion:

# DRAFT CONCLUSION 1/1: REVISED MID AIR NAVIGATION STRATEGY

That, The Revised MID Air Navigation Strategy (ICAO MID DOC 002, Edition February 2024) is endorsed and be published by the ICAO MID Office.

# AIR NAVIGATION PRIORITIES AND MONITORING OF THE STATUS OF IMPLEMENTATION

#### 1. Introduction

- 1.1 As traffic volume increases throughout the world, the demands on air navigation service providers in a given airspace increase, and air traffic management becomes more complex.
- 1.2 It is foreseen that the implementation of the components of the ATM operational concept will provide sufficient capacity to meet the growing demand, generating additional benefits in terms of more efficient flights and higher levels of safety. Nevertheless, the potential of new technologies to significantly reduce the cost of services will require the establishment of clear operational requirements.
- 1.3 Taking into account the benefits of the ATM operational concept, it is necessary to make many timely decisions for its implementation. An unprecedented cooperation and harmonization will be required at both global and regional level.
- 1.4 ICAO introduced the Aviation System Block Upgrades (ASBU) framework as a systemic manner to achieve a harmonized implementation of the air navigation services. An ASBU designates a set of improvements that can be implemented globally from a defined point in time to enhance the performance of the ATM system.
- 1.5 In accordance, with the Resolutions of the 40th Session of the ICAO Assembly, particularly Resolution A40-1 "ICAO global planning for safety and air navigation", the ICAO Assembly urged States and PIRGs to utilize the guidance provided in the GANP for planning and implementation activities which establish priorities, targets and indicators consistent with globally-harmonized objectives, taking into account operational needs. In response to this, the MID Region developed the MID Region Air Navigation Strategy Part 1, which is aligned with the GANP 6th Edition and ASBU Framework.
- 1.6 Stakeholders including service providers, regulators, airspace users and manufacturers are facing increased levels of interaction as new, modernized ATM operations are implemented. The highly integrated nature of capabilities covered by the block upgrades requires a significant level of coordination and cooperation among all stakeholders. Working together is essential for achieving global harmonization and interoperability.

#### 2. Strategic Air Navigation Capacity and Efficiency Objective

2.1 The Strategic Objective related to Air Navigation Capacity and Efficiency is to realize sound and economically-viable civil aviation system in the MID Region that continuously increases in capacity and improves in efficiency with enhanced safety while minimizing the adverse environmental effects of civil aviation activities.

#### 3. MID Air Navigation Objectives

- 3.1 The MID Region air navigation objectives are set in line with the global air navigation objectives and address specific air navigation operational improvements identified within the framework of the Middle East Regional Planning and Implementation Group (MIDANPIRG).
- 3.2 Blocks '0' and "1" feature Elements are characterized by operational improvements, which have already been developed and implemented in many parts of the world. The MID Region priority 1 Block 0 & 1 Elements are reflected in **Table 1** below.
- 3.3 The MID Region Air Navigation Strategy aims to maintain regional harmonisation. The States should develop their National Air Navigation Plan (NANP), including action plans for the implementation of relevant priority 1 ASBU Elements and other ASBU elements or non ASBU solutions based on the States' operational requirements and cost benefits analysis.
- 3.4 The implementation of the ASBU Block 0 Elements in the MID Region started before 2013 and is continuing. For the short and medium term, the MID Region priorities include identified ASBU Elements from Block 0 and Block 1.

### 4. MID Region ASBU Threads/Elements Prioritization and Monitoring

4.1 On the basis of operational requirements and taking into consideration the associated benefits, **Table 1** below shows the priority associated for each ASBU element from Block 0 and Block 1, as well as the MIDANPIRG subsidiary bodies that will be monitoring and supporting the implementation of these Threads/Elements:

**Priority 1 ASBU Element:** Elements that have the highest contribution to the improvement of air navigation safety and/or efficiency in the MID Region. These Elements should be implemented where applicable and will be used for the purpose of regional air navigation monitoring and reporting.

**Priority 2 ASBU Element**: Elements recommended for implementation based on identified operational needs and benefits by States.

Priority 1 Thread: Any Thread with at least one priority 1 element
