# Structure of CBA database

Functions
- Define scenarios
- Select Parameters

Functions
- Select Data
- Perform cost explosions
- Summarizes values
- Interface with the CBA model
- interface with the different databases

Scenario Generator

Scenario Pre-processor

Cost/Benefit Analysis

Sensitivity Analysis

Db Manager

Reports..

Com. Db.
Nav. Db
Surv. Db
PAL. Db
ACC. Db
Staff. Db
Other. Db

Functions
- Calculate NPV

Functions
-Evaluate sensitivity of different design/planning parameters

Functions
- Data input/output
- Table maintenance
- Maintain data relationship
- Validate data
