

*International Civil Aviation Organization*

NORTH AMERICAN, CENTRAL AMERICAN AND CARIBBEAN OFFICE

**Twenty-Ninth Eastern Caribbean Working Group Meeting (29 E/CAR WG)**

Saint Vincent and the Grenadines, 9 to 13 May 2005

29 E/CAR WG – WP/14

02/05/05

---

**Agenda Item 3**

**Specific Air Navigation Activities and Developments**

**3.5 Air Traffic Management (ATM)**

**REDUCTION OF MISSING FPLS**

(Presented by France)

**SUMMARY**

This WP proposes actions in order to drastically reduce the number of missing flight plans in the control rooms.

Appendices: **2 Tables**

**1. Introduction**

1.1 A significant number of flight plans are missing in the control rooms making coordination longer and less safe.

**2. Discussion**

2.1 The causes of missing FPLs in the control room can be either technical (network or FPL data processing problems, ...) or operational (wrong address, missing addressees...)

2.2 Annexed to this WP, two tables show different sort out of the same sample of traffic.

2.3 The aim is to find out common solutions that can be use to diminish the number of missing FPL. A proposal could be a coordinated action during a reference period. During this period the technical quality could be checked by the transmission of reference messages at agreed times. The operational aspects could be dealt with through a systematic analysis of the causes of the absence of each missing Flight plan. The result of the verification period being synthesized, a common and coordinated action plan could be built for the E/CAR.

**3. Proposed action**

3.1 The meeting is invited to consider the proposal of

- strong call to orders to the Airlines authorized to directly file their FPLs on the AFTN and to the concerned control offices to respect the addressing rules , and
- adopting a common method to assess the technical and the operational causes of the missing FPLs.

## APPENDIX A
