

MIND&FIND/SLTD PROGRAM

Providing law enforcement with instant worldwide access to INTERPOL databases

*Integrated solutions
for enhanced border security*

Solutions have been created to suit every individual country's specific technical/operational/telecommunication situation – customer tailored approach. Border security can not be a privilege – has to be available to everyone.

Databases - Services

- *Stolen/lost travel documents –*
SLTD – +15 000 000 RECORDS
 - *Stolen motor vehicles -* **SMV**
- + 4 000 000 RECORDS
 - *Red, Yellow AND UN Notices extraction*
(through the document number) - **NOMTD** -
10 000 RECORDS
- ...Systems open for additional services upgrades*
– fingerprints, photo.....

Three goals

- Real time access –
MIND/FIND deployment/integration
- Databases populated with reliable data –
Tools for automatic/simultaneous population
and updates
- Operational “Return on investment” –
Hit confirmation and Hit follow-up procedure

MIND

MOBILE INTERPOL

NETWORK DATABASE

MIND local copy of INTERPOL database(s) for queries only

Only IPSG can initialize a copy of databases using an ordinary HD (USB or any) and in coordination with national authorities can integrate/install it in a country.

HD plugged in a server – **INTEGRATED OR STAND ALONE MIND** – for countries with some national infrastructure

External hard disk connected to a dedicated workstation through the USB port – **MOBILE MIND** – for countries without any national infrastructure

MIND deployment

- **MIND operational** – Antigua and Barbuda, Barbados, Dominica, Guyana, Grenada, Jamaica, St. Kitts & Nevis, St. Lucia, St. Vincent and the Grenadines, Trinidad & Tobago, Saudi Arabia
- **MIND testing** – Croatia, Czech Republic, Indonesia, Kenya, Singapore, United Kingdom

FIND FIXED INTERPOL NETWORK DATABASE

FIND deployment

- **FIND operational** – Switzerland, France, Belgium, Lithuania, Spain, Bahamas, Chile and South Africa
- **FIND testing** – Norway, Portugal, Turkey, United States

Impact

...first operational country..then
first region...

....'French Connection' and it

participating**

Standard Operating Policies and Procedures (SOPP)

- Advisory Committee (composed from 12 member countries representatives) had their first session from 13-14 December 2006, and the second one from 29 May to 1st of June
- Standard Operating Policy and Procedure are created, acknowledging and accepting new/additional responsibility

Data quality - recommendations

- **AC RECOMMENDS:** Participating Member Countries should ensure that their data is accurate and that they update their data in the Interpol SLTD database **at the same time** as they update such data in their national/regional databases.
- ***Committee Action Result:*** *The committee submitted the document (to be part of the SOPP) addressing all data quality issues that might effect the SLTD database, and the committee is proposing Best Practices, Operating Procedures, and Tools designed to address these issues.*

Hit confirmation/hit follow-up procedure - recommendations

- **AC RECOMMENDS:** Each Member Country should implement a process which enables its NCB or other designated authority to provide within **one hour** sufficient information to a country that is detaining a document holder to allow the querying country to determine whether the holder of the document is its lawful bearer.
- *Committee Action Result: The committee submitted the document (part of the SOPP) for the legal, practical, and other realities faced by Member Countries in implementing the above recommendation, and the committee submitted proposition for Best Practices, Operating Procedures, and Tools designed to address these realities.*

Challenges

- Dynamics of the deployment depends mainly on countries readiness/willingness to integrate or to install the services...
- Countries are often confused – detailed information on integrated border systems with global interoperability is missing

Challenges

- There is a need to coordinate different international efforts related to border security for the benefit of countries
- Potential sponsorships (EU, World Bank) would allow the world to achieve the equality (providing services to less developed regions/countries allowing them not to stay behind due to the lack of infrastructure)

Thank you.....
