

UNMANNED AVIATION 2022

DRONE ENABLE 2022

Stephen P. Creamer

Director, ICAO Air Navigation Bureau

Keynote & ATM/UTM

Keynote

- Regulatory framework responsive to technology and innovation
- Communications, collaboration and learning are key enablers of UAS
- Societal benefits

ATM/UTM

- Dynamic flight planning and automated decision-making
- Great number of third party service and data suppliers
- UAS integration is much more than UTM
- From segregation to integration - conspicuity and equipage

ICAO

SAFETY

Facilitation Challenges & Environmental Impacts

FACILITATION OF UAS OPERATIONS

- Annex 9 regarding facilitation – applicable to international UAS operations
- UAS cross-border customs requirements and stakeholders
- Security – crucial to identify the applicable stakeholders

ENVIRONMENTAL IMPACTS – NOISE AND LIFE CYCLE EMISSIONS

- Need for environmental standards for UAS operations
- Life cycle perspective
- Early community engagement to support societal acceptance

Experiences/Best Practices of UTM Systems and Services Deployments

- UTM requirements vary by State and local applications
- Strategic and tactical de-confliction
- Cooperative air traffic
- UTM development and implementation will be incremental
- UTM implementation convergence versus fragmentation

SAFETY

ICAO Materials Supporting Safe Operations

ICAO MATERIALS SUPPORTING SAFE OPERATIONS

- UAS Model Regulations support harmonization
- Training courses inform key personnel
- UAS iPack supports implementation

UAS for Humanitarian Operations

UAS FOR HUMANITARIAN OPERATIONS - JOINT ICAO, UNICEF and WFP

- Diversity of operations
- Challenges: lack of regulations, harmonization, and mutual recognition
- Collaboration between ICAO, UNICEF and WFP
- Future work
 - More data
 - Flight rules
 - Facilitation framework

ICAO

SAFETY

UTM Data Requirements

- **Different use cases = different data tiers**
- **Standardization**
- **Data driven approaches**
- **Trust & Security - bake it in vs sprinkle it on**
- **Cross-pollination and integration of data across ATM and UTM**

Digital Road to UTM Implementation

- **Digitilization will lead to operation centric approach**
- **Transition from analog to digital**
- **Trust in data quality and reliability**
- **Flight rules in a more digital environment**

ADVANCED AIR MOBILITY – INITIAL CONCEPT OF OPERATIONS

- Sense of urgency to enable AAM to benefit society
- Harmonized concept of operations is needed
- AAM evolutionary approach
- Lessons learned from UTM
- Many areas need to be addressed
- ICAO is stepping up to ensure harmonization
