

EU Vision for drone integration

European Commission
DG Mobility & Transport
ICAO Symposium - March 2015

European
Commission

Aviation services today

Regulated civil aviation market

Other markets in the EU:
link to aviation

Intermodal connection

Just in time delivery

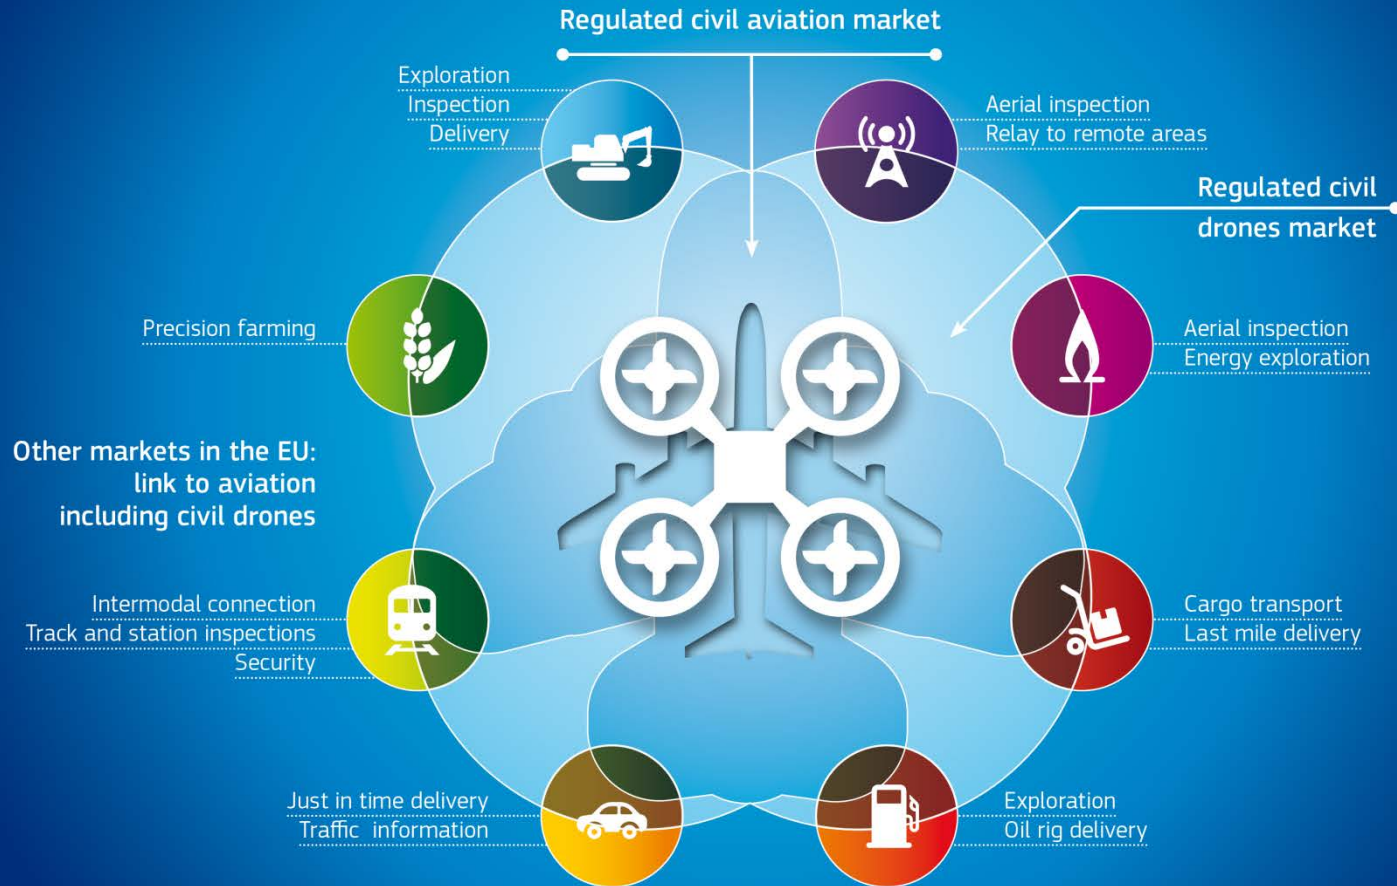

Cargo transport

Oil rig delivery

Future aviation services

Guiding principle 1

"Drones need to be treated as new types of aircraft with proportionate rules based on the risk of each operation"

Guiding principle 2

"EU rules for the safe provision of drone services need to be developed now"

Guiding principle 3

"Technologies and standards need to be developed for the full integration of drones in the European airspace"

Guiding principle 4

"Public acceptance is key to the growth of drone services"

Aviation safety rules: impact on areas of public concern

Guiding principle 5

"The operator of a drone is responsible for its use"
