10 to 14 September 2018

**Denis JAUVIN**

ICAO – ANB - RPAS PROGRAM

Licensing Remote pilots for better integration

ICAO

SAFETY

# International Civil Aviation Organization

- Specialized agency of the **United Nations**
- Created 7 December **1944** with signing of the ‘Chicago Convention’
- Addresses all aspects of **civil aviation**
- Agree on principles and arrangements for **international civil aviation to develop in a safe and orderly manner**

ICAO

SAFETY

# Process for international regulation

The **Air Navigation Commission (ANC)** considers and recommends SARPs and Procedures for Air Navigation Services (PANS) for approval by the ICAO Council.

SARPs once adopted by **the ICAO Council** are translated into national regulations by States.

The **Secretary General** is responsible for general direction of the work of the Secretariat.

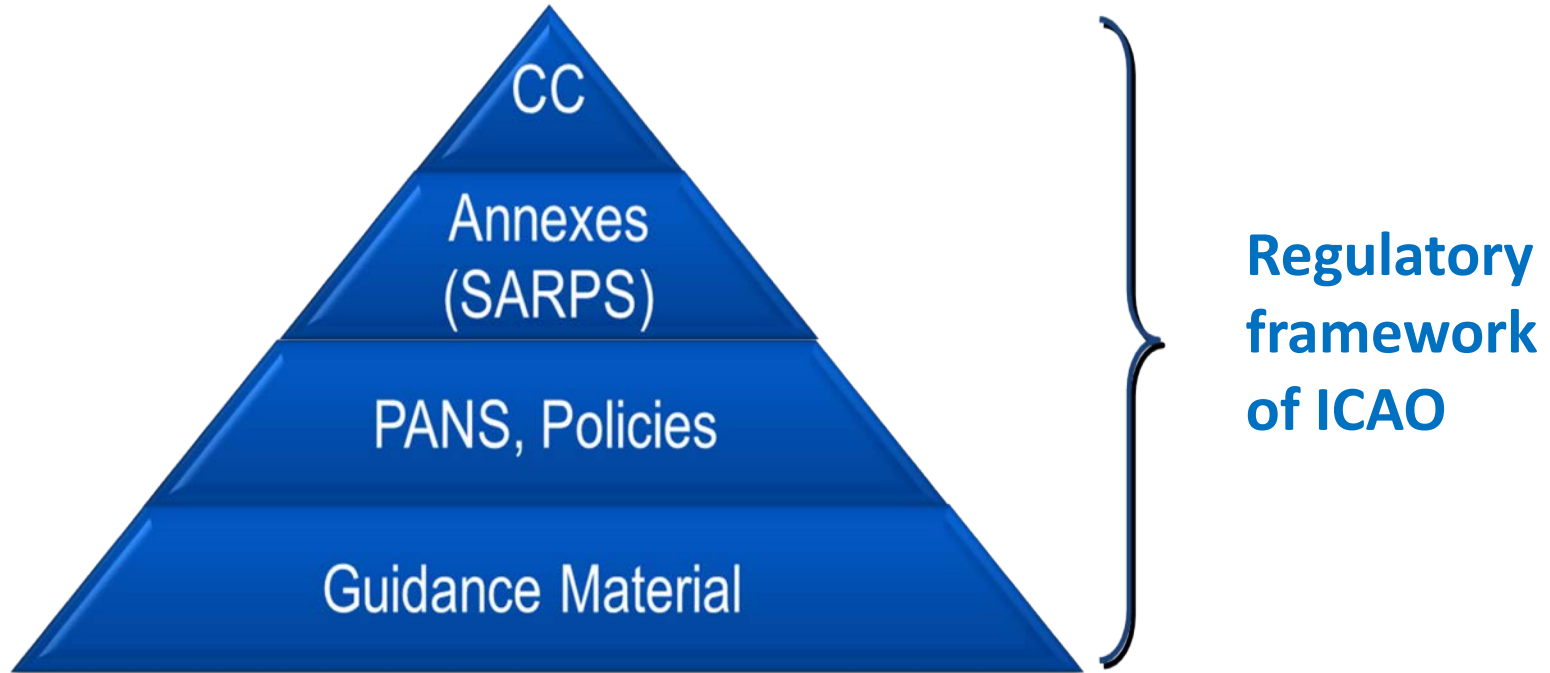

- **Standard**

*“...specification must be such that its uniform application by all Contracting States **is necessary** in the interest of safety or regularity of international civil aviation.”*

- **Recommended Practice**

*“...application by all Contracting States **is desirable, but not essential** in the interests of safety, regularity or efficiency of international civil aviation.”*

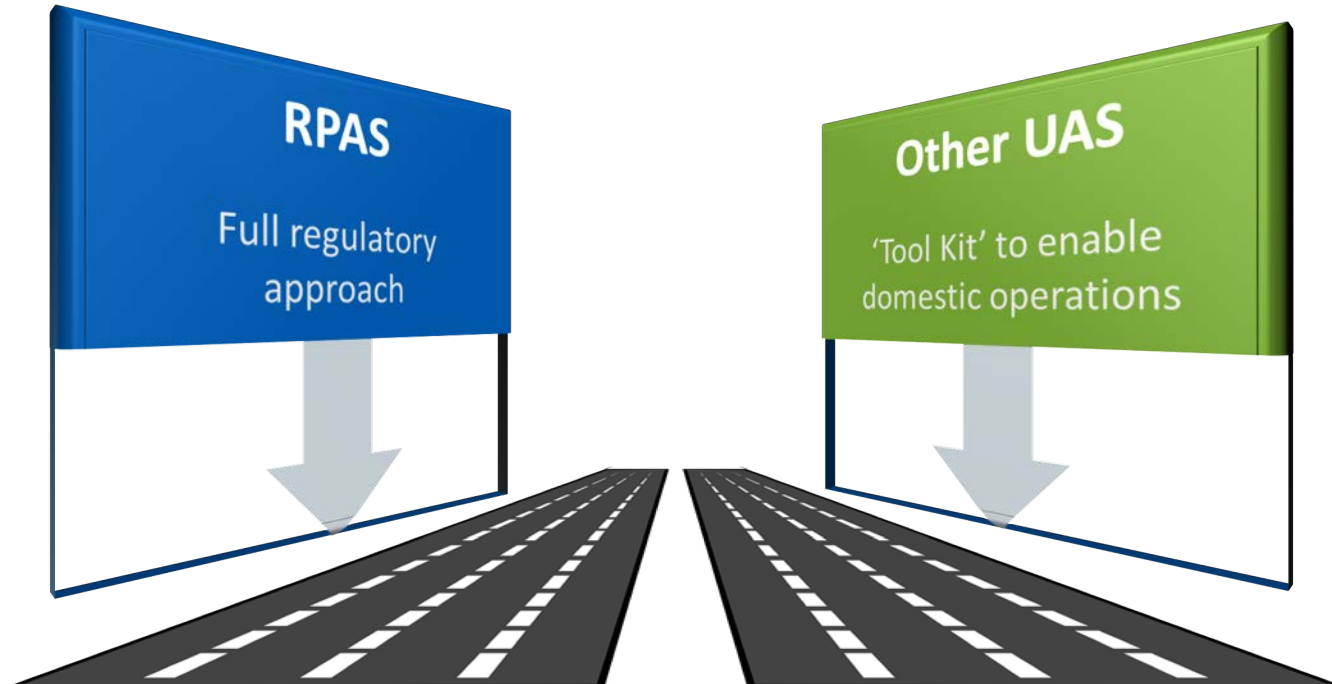

## Unmanned aircraft are aircraft

**Aircraft.** *Any machine that can derive support in the atmosphere from the reactions of the air other than the reactions of the air against the earth's surface.*

Unmanned Aircraft are aircraft subject to the dispositions of

**Article 8 of Convention**

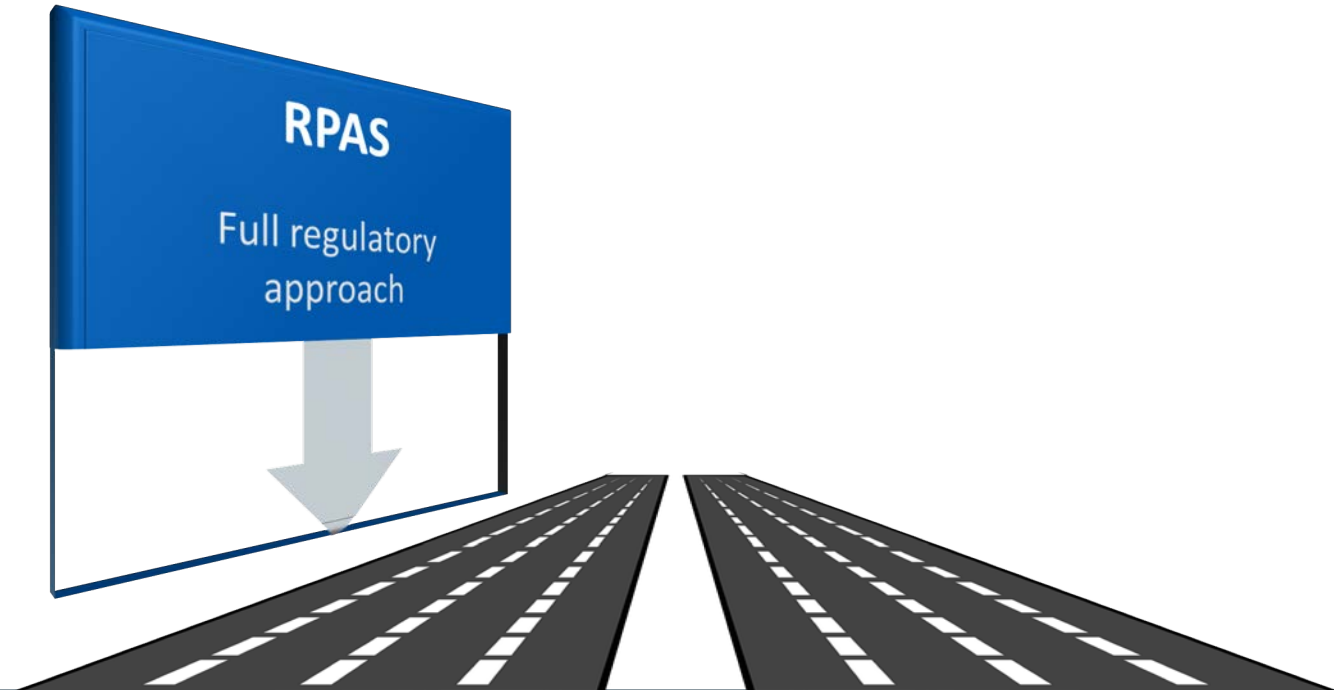

## Two Approaches – Two Streams of Work

# Two Approaches – Two Streams of Work

# Actions on the full regulatory approach

UAS phenomenon  
touches all of  
aviation and all the  
ICAO Annexes

- Annex 1 - Personnel Licensing **Approved**
- Annex 2 - Rules of the Air
- Annex 3 - Meteorological Services
- Annex 4 - Aeronautical Charts
- Annex 5 - Units of Measurement
- Annex 6 - Operation of Aircraft
- Annex 7 - Aircraft Nationality and Registration Marks
- Annex 8 - Airworthiness of Aircraft **To be reviewed in 2019**
- Annex 9 - Facilitation
- Annex 10 - Aeronautical Telecommunications
- Annex 11 - Air Traffic Services
- Annex 12 - Search and Rescue
- Annex 13 - Aircraft Accident and Incident Investigation
- Annex 14 - Aerodromes
- Annex 15 - Aeronautical Information Services
- Annex 16 - Environmental Protection
- Annex 17 - Security
- Annex 18 - The Safe Transportation of Dangerous Goods by Air
- Annex 19 - Safety management

## RPAS Panel

Developing the regulatory framework for RPAS to conduct IFR operations in controlled non-segregated airspace/aerodromes

## Other ANC Panels supporting on technical matters

For International IFR operations  
Requirements:

- Remote pilot license
- Certificate of Airworthiness
- Certificate of RPAS Operator

## Applicability of New Standards

LICENSING → 2022

AIRWORTHINESS → 2024

OPERATIONS → 2024

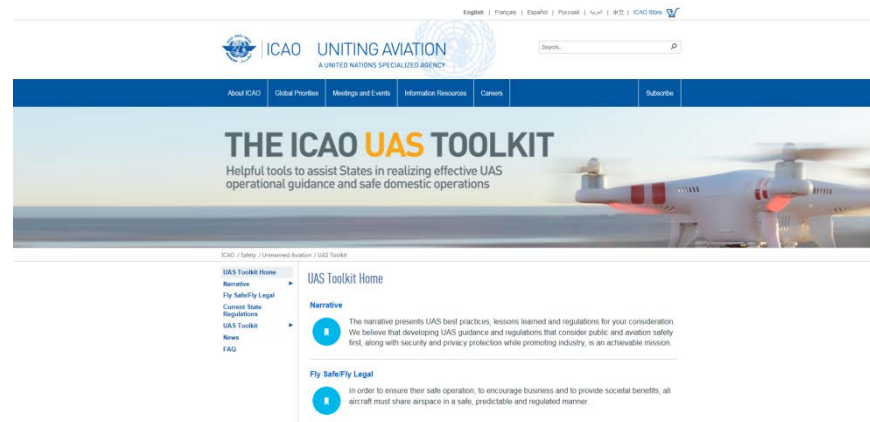

C2, DAA, ATM → 2024

# Two Approaches – Two Streams of Work

## Toolkit developed by the UAS Advisory Group

- General guidance for national regulations
- Best practices and lessons learned from many States
- Practical examples
- <https://www.icao.int/safety/UA/UASToolkit/>

The screenshot displays the ICAO UAS Toolkit website. At the top, there is a navigation bar with the ICAO logo and the text "UNITING AVIATION A UNITED NATIONS SPECIALIZED AGENCY". Below this is a search bar and a menu with items: "About ICAO", "Global Priorities", "Meetings and Events", "Information Resources", "Careers", and "Subscribe". The main heading reads "THE ICAO UAS TOOLKIT" with the subtitle "Helpful tools to assist States in realizing effective UAS operational guidance and safe domestic operations". A large image of a white drone is visible on the right. Below the main content, there is a sidebar menu with "UAS Toolkit Home", "Narrative", "Fly Safe/Fly Legal", "Current State", "Regulations", "UAS Toolkit", "News", and "FAQ". The main content area shows a "Narrative" section with a blue circular icon and a "Fly Safe/Fly Legal" section with a blue circular icon.

- **Expanding through DRONE ENABLE**

- Registration, ID, tracking systems
- Communications systems
- Geo-fencing like systems

- **UTM and ATM interoperability**

## What about personnel licensing?

Our goal is the integration of RPA in global traffic, so ....

RPA has to operate like any other aircraft, but...

Only **ONE licence** with ratings, no distinction between Private and Commercial/Professional

Basic framework of the licence is CPL but with **Class 3 Medical**

**Competency-Based Training (CBT)** applies to RPL

Remote pilots need to demonstrate **competencies** ,  
by learning general aviation **knowledge, skills and attitudes**

Competencies listed below can be used in all trainings

**Communication**

**Application of Procedures**

**RPA flight path management, automation**

**Management of non-normal situations**

**Leadership, teamwork and self management**

**Coordination and handover**

**Problem solving and decision making**

**Situational awareness**

**Workload management**

They are evaluated through observable behaviors

## Why a competency-based approach ?

Competency-based approach to licensing is better adapted to the **diversity and rapid evolution of RPAS operations**

RPAS Operators and Approved Training Organizations **determine the performance** they want to see from RPLs, then develop training

Based on the outcome of this training, they continuously **improve the training program**

- ICAO licensing will be mandatory for **international flights**; it is the full regulatory approach (applicability **2022**)
- It is a **model / reference** that can be **scaled down and adapted** for national purposes

Our goal is to help worldwide **standardization and harmonization**

ICAO is now working on **licensing implementation** by providing guidance

- Adaptation of **RPAS Manuel** (Doc 10019)
- Creation of a **Manual on Competency-Based Training for Remote Pilot Licence**
- **Workshops in 2019**
