Developing Safety Cases

Kathryn Jones
Human Factors Programme Manager, CAA United Kingdom

Fatigue Management Approaches Symposium
5-6 April 2016, Montréal, Canada
Safety Cases – The whole picture

• Operational context (work pattern and within service provider)
• Operational evidence
• Best practice (others, working practices, research)
• Informed by data
  – data has to be processed into information that can be acted upon
Methodical

- Repeatable
- Transparent
- Assumptions explained not intuition as justification.
- Change management (from here to there and all steps in-between)
Ongoing ownership

- Maturity of approach demonstrated through assurance processes
- Demonstrable understanding of performance based approach
- Ongoing assessment and development
THANK YOU
