Volcanic Ash Guidance Material
Docs. 9766, 9691 and 9974

Raul Romero
ICAO
IAVWOPSG Secretary
Manual on Volcanic Ash, Radioactive Material and Toxic Chemical Clouds

Approved by the Secretary General and published under his authority

International Civil Aviation Organization
Section 1 — Scientific background

Chapter 1. Volcanic eruptions

1.1 Classification
1.2 Mechanism of volcanic eruptions
1.3 Duration and frequency of volcanic eruptions
1.4 Distribution of active volcanoes
1.5 Monitoring volcanoes and forecasting volcanic eruptions
Chapter 2. Volcanic ash cloud

2.1 Composition of volcanic ash and associated gases

2.2 Volcanic ash column characteristics

2.3 Electrical phenomena in volcanic ash clouds

2.4 Movement of volcanic ash clouds
Chapter 3. Observation/detection and forecasting movement of volcanic ash in the atmosphere

3.1 Ground-based observation
3.2 Airborne observation
3.3 Space-based observation
3.4 Forecasting the movement of volcanic ash clouds
Section 2 — Volcanic ash and aircraft operations

Chapter 4. Effect of volcanic ash on aircraft

4.1 General
4.2 Effect on jet engines
3. Effect on airframe and equipment
4.4 Preliminary recommendations for volcanic ash material for use in jet engine testing
4.5 Recommended general procedures to mitigate the effect of volcanic ash
Chapter 5. Impact of volcanic ash on aviation operational and support services

5.1 Aerodromes
5.2 Air traffic management
5.3 Meteorological services
5.4 Flight planning, dispatch and operational control
5.5 Vulcanological agencies
Chapter 6. The International Airways Volcano Watch (IAVW)

6.1 General
6.2 Structure of the IAVW
6.3 Observing part of the IAVW
6.4 Advisory and warning part of the IAVW
6.5 Communications and coordination in the IAVW
6.6 Non-real-time support to the IAVW
6.7 Training and audio-visual aids
6.8 Operation of the IAVW
APPENDIX A. Recommended procedures for the mitigation of the effect of volcanic ash on airports

APPENDIX B. Emergency plan for volcanic eruptions in Alaskan airspace

APPENDIX C. Weather deviation procedures for oceanic controlled airspace

APPENDIX D. Details of VAW posters and video

APPENDIX E. Volcanic eruptions producing ash plume of concern to civil aviation, 1980–2004

APPENDIX F. Cross-reference list of volcanoes and navigation aids

APPENDIX G. Database for encounters between aircraft and ash clouds
Flight Safety and Volcanic Ash

Risk management of flight operations with known or forecast volcanic ash contamination

Approved by the Secretary General and published under his authority.

First Edition — 2012

HANDBOOK
ON THE
INTERNATIONAL AIRWAYS
VOLCANO WATCH (IAVW)

OPERATIONAL PROCEDURES
AND CONTACT LIST

SECOND EDITION — 2004
Part 1. Volcanoes active during the last 10 000 years
Part 2. Volcanic ash advisory centres (VAACs) designated by ICAO and their responsibilities

Part 3. Useful web sites
3.1 Volcanic ash advisory centres
3.2 Worldwide weekly volcanic activity reports
3.3 Other sites

Part 4. International Airways Volcano Watch — Operational procedures for the dissemination of information on volcanic eruptions and associated volcanic ash clouds in areas which could affect routes used by international flights, and necessary pre-eruption arrangements
4.1 Pre-eruption procedures
4.2 Action to be taken by the ACC in the event of a volcanic eruption
4.3 Action to be taken by the NOF in the event of a volcanic eruption
4.4 Action to be taken by the MWO in the event of a volcanic eruption
4.5 Action to be taken by VAACs in the event of a volcanic eruption
4.6 Action to be taken by VAACs or MWOs regarding volcanic ash test procedures
4.7 Guidance to pilots on the detection of sulphurous gases on the flight deck
Volcanic Ash Guidance Material  
Docs. 9766, 9691 and 9974

Table 4-1.  Addresses for NOFs to use to send ASHTAMs or NOTAMs on volcanic activity to their associated VAAC  
Table 4-2.  VAAC contact numbers  
Table 4-3.  Volcanic ash advisory bulletin headers

Appendix A — Sample letter of agreement between the air traffic services, meteorological authorities and vulcanological authorities  
Appendix B — AFTN addresses to be used to promulgate special air reports, SIGMETs and volcanic ash advisories to London WAFC and SADIS  
Appendix C — Operational procedures for the coordination and transfer of responsibility between VAACs for volcanic ash events  
Appendix D — Back-up procedures for volcanic ash advisory centres  
Appendix E — Format of Volcano Observatory Notice for Aviation (VONA)

Part 5.  International airways volcano watch contact list

5.1  Alphabetical listing  
5.2  List of States by ICAO Region
The guidance material on volcanic ash is under constant review, however all users are kindly invited to draw the attention of the ICAO Secretariat to any discrepancies, oversights and/or suggestions. The maintenance of the material is an ICAO task but user input is essential and greatly appreciated!!
