U.S. ICAO CAEP Work

Federal Aviation Administration's (FAA) Office
of Environment and Energy (AEE)

Pat Moran

Given the international and interconnected nature of aviation, the objective of the FAA's international strategy is:

- To pursue FAA's broader environmental objective of protecting the environment while ensuring the sustained growth of civil aviation through international engagement in the International Civil Aviation Organization and with foreign governments and stakeholders

FAA International Environmental Activities

FAA leads U.S. Government involvement on the Committee on Aviation Environmental Protection (CAEP), including:

- Serve as US CAEP Member (Dr. Lourdes Maurice, Executive Director, AEE-1)
- Supports (in many cases Leading) and provides significant analytical capability to Working Groups (1, 2, 3) and
 - CO2 Standard Task Group
 - Forecasting and Economic Analysis Support Group (FESG)
 - Modeling and Databases Support Group (MDG)
 - Impacts and Science Group (ISG)
 - Alternative Fuels Task Force (AFTF)
 - Global Market-Based Measures Technical Task Force (GMTF)
 - the States' Climate Action Plan Group
