Dear Sir/Madam,

I invite you to participate in the *Cybersecurity Webinar on Air Traffic Management (ATM) and Communications, Navigation and Surveillance (CNS) Activities*, which focuses in cybersecurity applied to communication, navigation and surveillances and ATM activities in civil aviation. The webinar is organized by the ICAO NACC Regional Office in coordination with EUROCONTROL and industry stakeholders.

Cybersecurity challenges in ATM and CNS are growing, and digitalization is increasing in all regions. The cybersecurity threat landscape is ever-evolving and cyber-risks have to be continuously and pro-actively managed, and ATM/CNS cyber-resilience has to be enhanced.

Cybersecurity requires a holistic approach as it is another component of the civil aviation security measures and of the procedures already applied in ATM/CNS components and operations.

This webinar will be an excellent opportunity to learn what risks Air Navigation Service Provicers (ANSPs) and Civil Aviation Authorities (CAAs) are facing, which approach is recommended to identify the weaknesses, improving the protection and maintaining business continuity and safety in case of cyber-incidents. The content of the webinar is based on lessons learned by EUROCONTROL and the solutions implemented by the industry in the ATM domain. The working languages of the event will be English and Spanish and interpretation services will be provided. The proposed programme is **attached.**

For this webinar, ANSPs and CAAs are expected to attend. The content is specifically designed for personnel belonging to different air navigation areas such as Aeronautical Information Management (AIM), aerodromes and ground aids (AGA), ATM, CNS and Aeronautical Meteorology (MET).
