

**Mr. Edmond Nonie**  
Drone Specialist.  
Office of Innovation  
United Nations Children's Fund  
UNICEF

#### **Drones (UAVs/UAS/RPAs) Technical Specialist**

Mr. Nonie provides technical support to implement training programmes required to develop UNICEF regional and country offices' capacity to use UAS, as a tool to improve service delivery for children.

He supports UNICEF's Drones Working Group--composed of participants from UNICEF programs, offices and divisions; as well as with a global, regional, and country representation--to integrate the use of Unmanned Aircraft Systems (UAS) in delivery, imagery and connectivity use cases, where it makes more sense to support UNICEF's mission.

He also provides technical support to the UNICEF ICTD and Office of Innovation as well as country-level drone-focused initiatives, including implementation and management of drone testing corridors, use of UAS to support programmatic work, integration of UAS into health supply chains for the delivery of medical supplies, among other UAS initiatives.

In coordination with ICTD and the Office of Innovation team, Mr. Nonie builds and maintain partnerships with interagency entities, NGOs, private sector, among others, in relation to UAS use in development and humanitarian missions.
