3.5 SEGUIMIENTO AERONAVES

Todos los contactos

Sólo ANSPs

The screenshot shows the homepage of the OPS CONTROL DIRECTORY. At the top, there is a blue banner with a world map and a central airplane icon, with the text "OPS CONTROL DIRECTORY". Below this is a section titled "ABOUT THIS DIRECTORY" which explains the purpose of the directory. There are two main content blocks: "AIR NAVIGATION SERVICE PROVIDERS" and "AIR OPERATORS", each with a brief description of their functions. At the bottom, there is a section titled "ACCESS THE DIRECTORY" with a "LOGIN OR REGISTER" button.

OPS CONTROL DIRECTORY

ABOUT THIS DIRECTORY

The development of new aircraft tracking standards by the International Civil Aviation Organization (ICAO) identified a need to establish a means to facilitate communication and exchange of information between air operators and air navigation service providers. While the OPS Control Directory has been established to assist with the implementation of the aircraft tracking Standard, it may also be useful in other circumstances.

AIR NAVIGATION SERVICE PROVIDERS

Provide your Service Information
Maintain your area control centre information, and obtain contact details for air operators around the World.

AIR OPERATORS

Update OCC Details and Connect with ANSPs
Maintain your operational centre information, and obtain contact details for the global air navigation service providers.

ACCESS THE DIRECTORY

In order to access the OPS Control Directory, ANSPs and air operators must have an account with the Data Network for Aviation (DNA), a new digital portal providing access to a range of tools and services. Click the button below and follow the process. Further details will be requested by ICAO to approve your subsequent access to the OPS Control Directory.

Please note that by extending the "Authorized User" status to this individual, you are permitting them to directly access and conduct searches in the directory. Authorized users are unable to make any edits or changes to any of the data featured in the directory.

All users will need to have a DNA account. You may add the email account associated to the user before a DNA account has been set up. This will pre-authorize that user. Please direct users without a DNA account to <https://www4.icao.int/dna> so that they can create an account.
