# Regional Seminar/Workshop on USOAP Continuous Monitoring Approach (CMA) and State Aviation Safety Tools (SAST)

Name

Title, Section, Bureau

Date

## Overview of the USOAP Continuous Monitoring Approach

Module 2

# Module Objective

At the end of this module, the participants will be able to:

- a) describe the background, objective, management, principles and activities of the ICAO USOAP Continuous Monitoring Approach (CMA), and
- b) outline the means used to collect and process relevant safety information.

# Outline

- ❑ Background
- ❑ Evolution and objective of USOAP CMA
- ❑ Management of CMA – CMO Quality Management System
- ❑ USOAP CMA and auditing principles
- ❑ CMA stakeholders, staffing, activities and information
- ❑ USOAP CMA audit areas
- ❑ Transition to CMA

# What is Safety Oversight?

Safety oversight is a function by which ICAO Member States ensure the effective implementation of:

- ICAO Standards and Recommended Practices (SARPs);
- the critical elements of a safety oversight system; and
- relevant safety practices and procedures.

*Safety oversight is a State's responsibility.*

# Two Complementary Roles

ICAO

STATES

- ☐ Develops principles and techniques to be adopted in the Annexes.
- ☐ Approves regional air navigation plans.
- ☐ Implement Annex SARPs.
- ☐ Carry out their safety oversight responsibilities by implementing the eight critical elements.
- ☐ Establish aviation infrastructure according to regional plans.

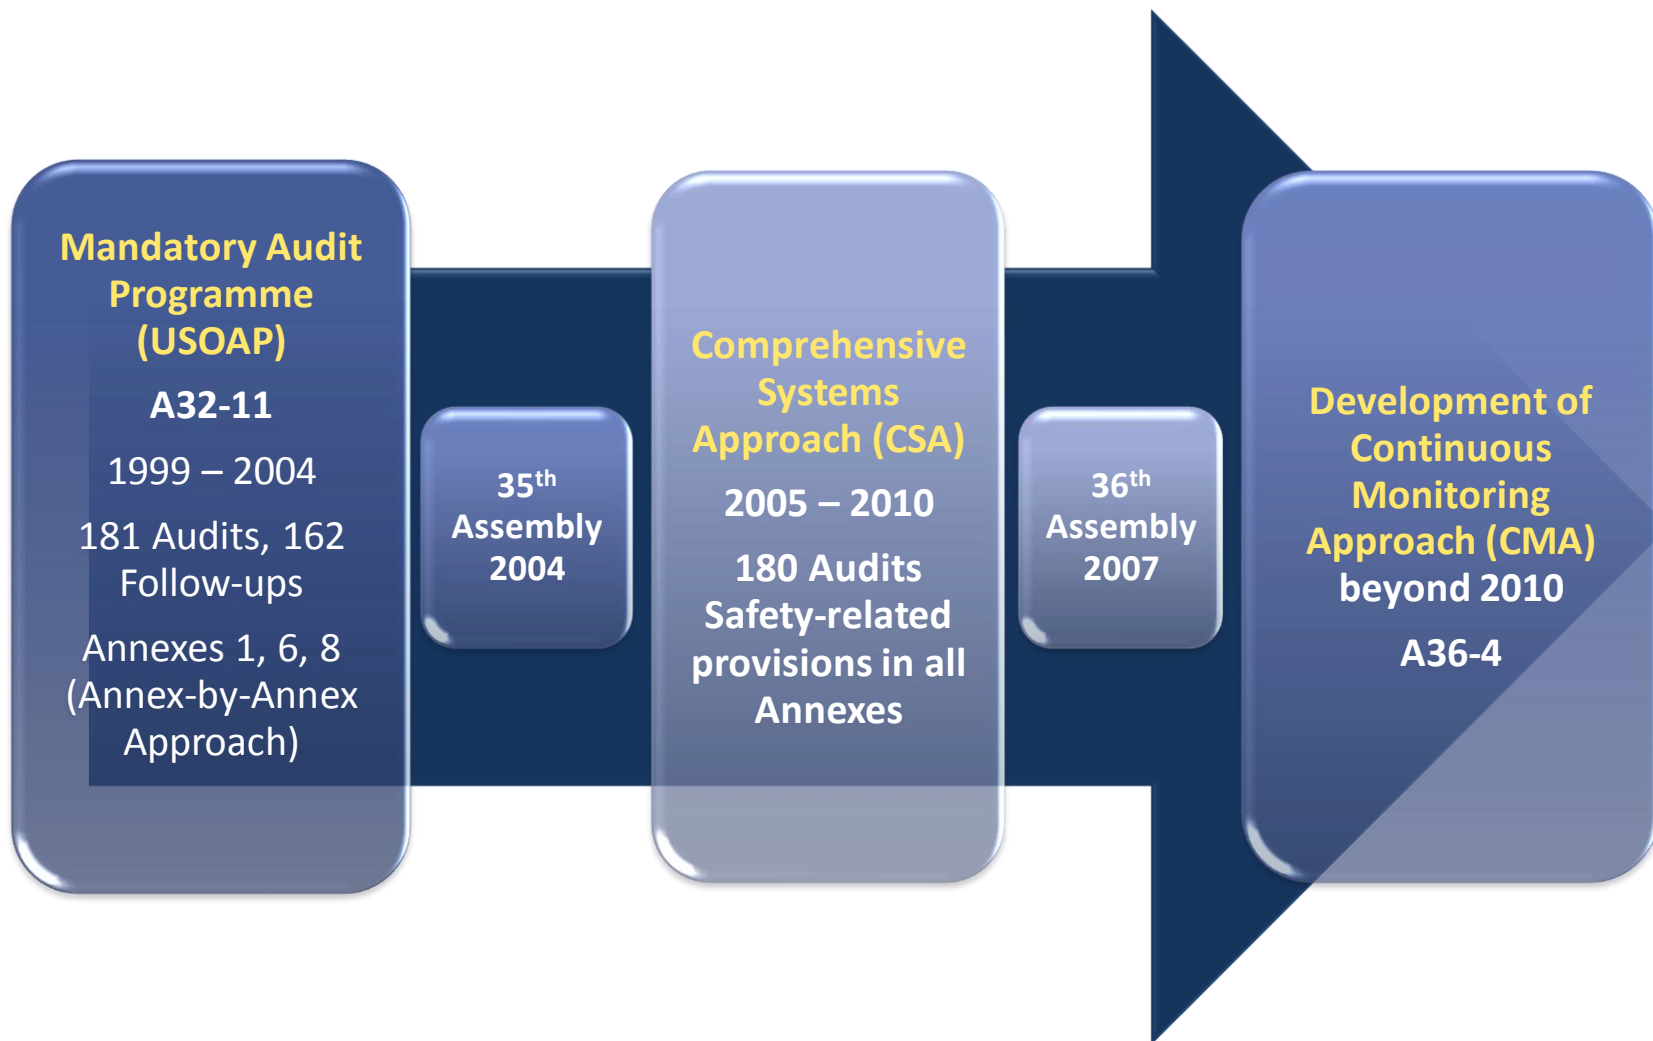

# Why an ICAO Programme?

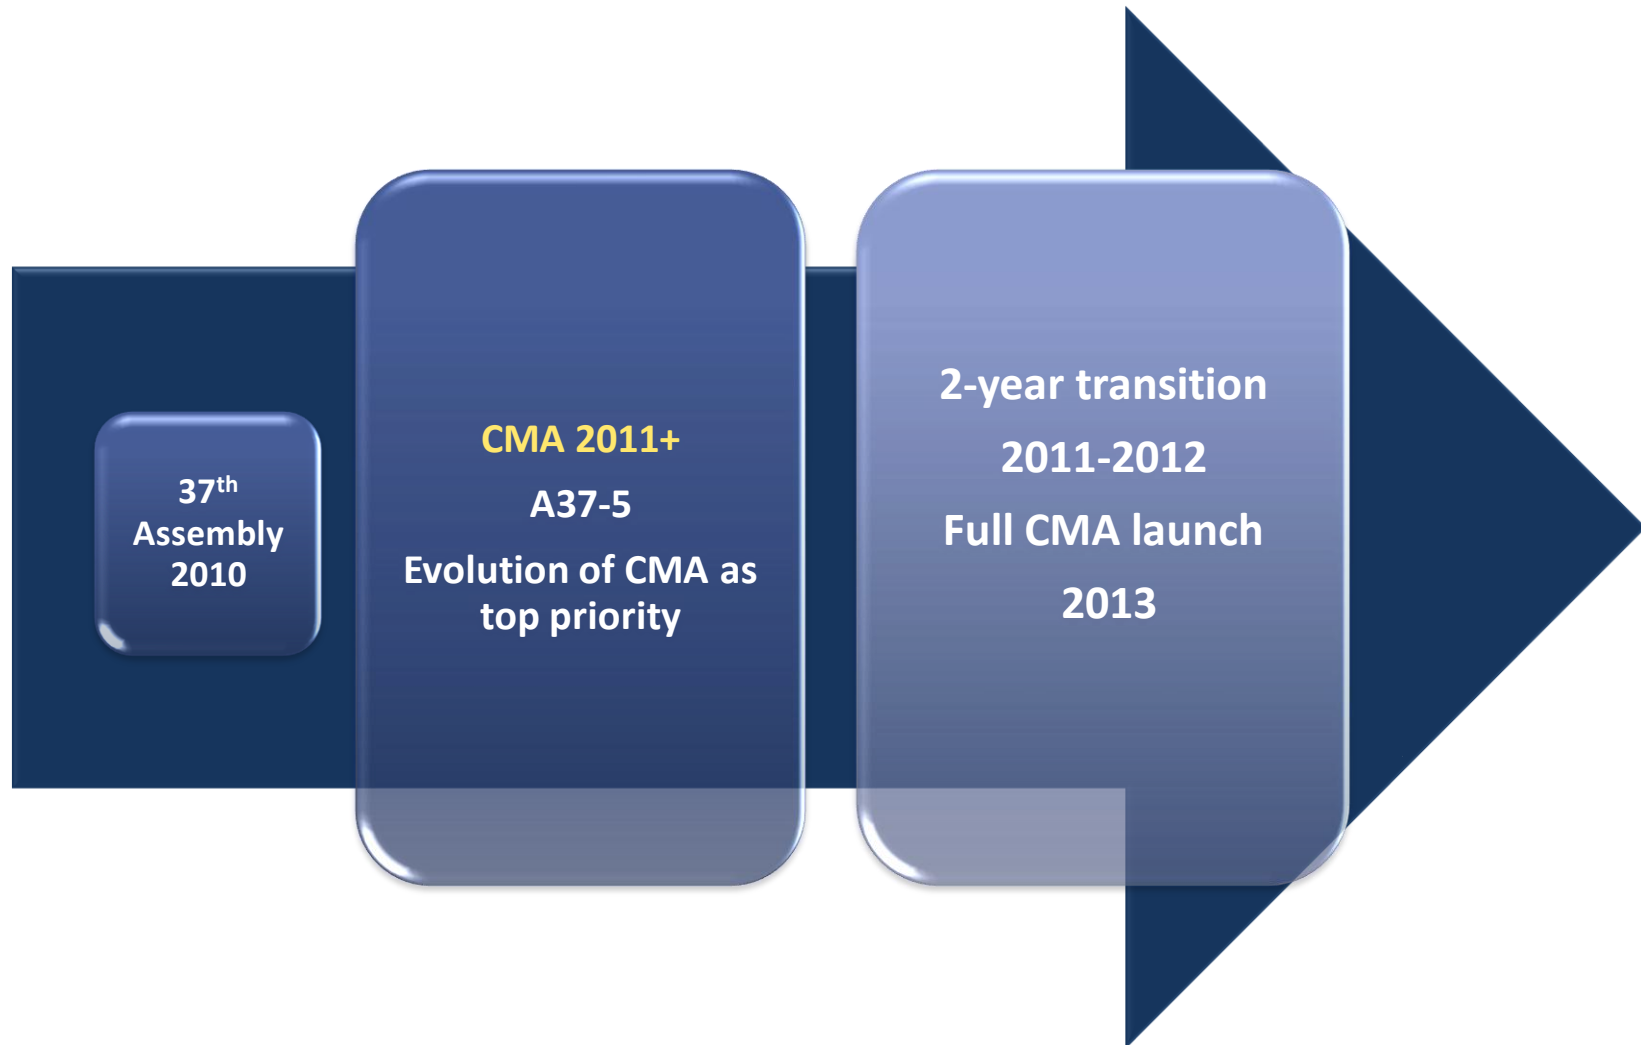

- ❑ Various reports in the early 1990s on the lack of implementation by States of ICAO SARPs.
- ❑ Accidents indicating insufficient safety oversight by States.
- ❑ Increased concern over the level of aviation safety worldwide.
- ❑ Need to reduce accident rates to offset the rapid increase in traffic.

# Evolution of USOAP

# Evolution of USOAP (cont'd)

# Comprehensive Systems Approach (CSA)

Initiated in 2005 as a six-year cycle, the CSA has been successfully implemented and has achieved its stated purpose. In particular, it has been instrumental in:

Establishing the baseline for the level of worldwide implementation of the 8 critical elements of a safety oversight system.

Increasing States' awareness of their safety oversight responsibilities.

Assessing the status of States' compliance with SARPs in all safety-related Annexes.

# CSA (cont'd)

Overall, the CSA has contributed significantly to the safety and efficiency of the international air transport system.

Enabling the identification of safety concerns pertaining to all safety-related Annexes and providing recommendations for their resolution.

Promoting the uniform implementation of international safety Standards.

Enhancing confidence among States by making each State aware of the other States' capability for safety oversight.

# CSA (cont'd)

However, the CSA also presented challenges.

The six-year cycle was too long.

Although the CSA audit drew a picture of the overall health of an aviation system, the end result was still only a snapshot of the State's safety oversight system.

# Continuous Monitoring Approach (CMA)

September 2007 — The 36<sup>th</sup> Assembly adopted A36-4, directing the Council to make appropriate changes to USOAP to:

Include the analysis of risk factors

Assess, on an ongoing basis, States' compliance with their safety oversight obligations and adapt the audit planning and scope accordingly

Consider a new approach based on the concept of CMA, to be implemented at the end of the CSA cycle

Maintain, as core elements, the key safety provisions contained in Annexes 1, 6, 8, 11, 13 and 14 to the Chicago Convention

# CMA (cont'd)

March 2010 — The High Level Safety Conference (HLSC 2010) agreed that:

States should commit to supporting USOAP CMA by providing ICAO with relevant safety information

ICAO Council should monitor progress during the transition period to CMA and, if required, adjust its duration

## October 2010 — CMA endorsed by Assembly Resolution A37-5:

Evolution of USOAP to  
CMA to be a top  
priority

Information on safety  
performance of  
Member States to be  
provided to other  
Member States and to  
the travelling public on  
an ongoing basis

Foster coordination and  
cooperation between  
USOAP and other  
audit/inspection  
programmes for the sharing  
of safety information

# Objective of the Programme

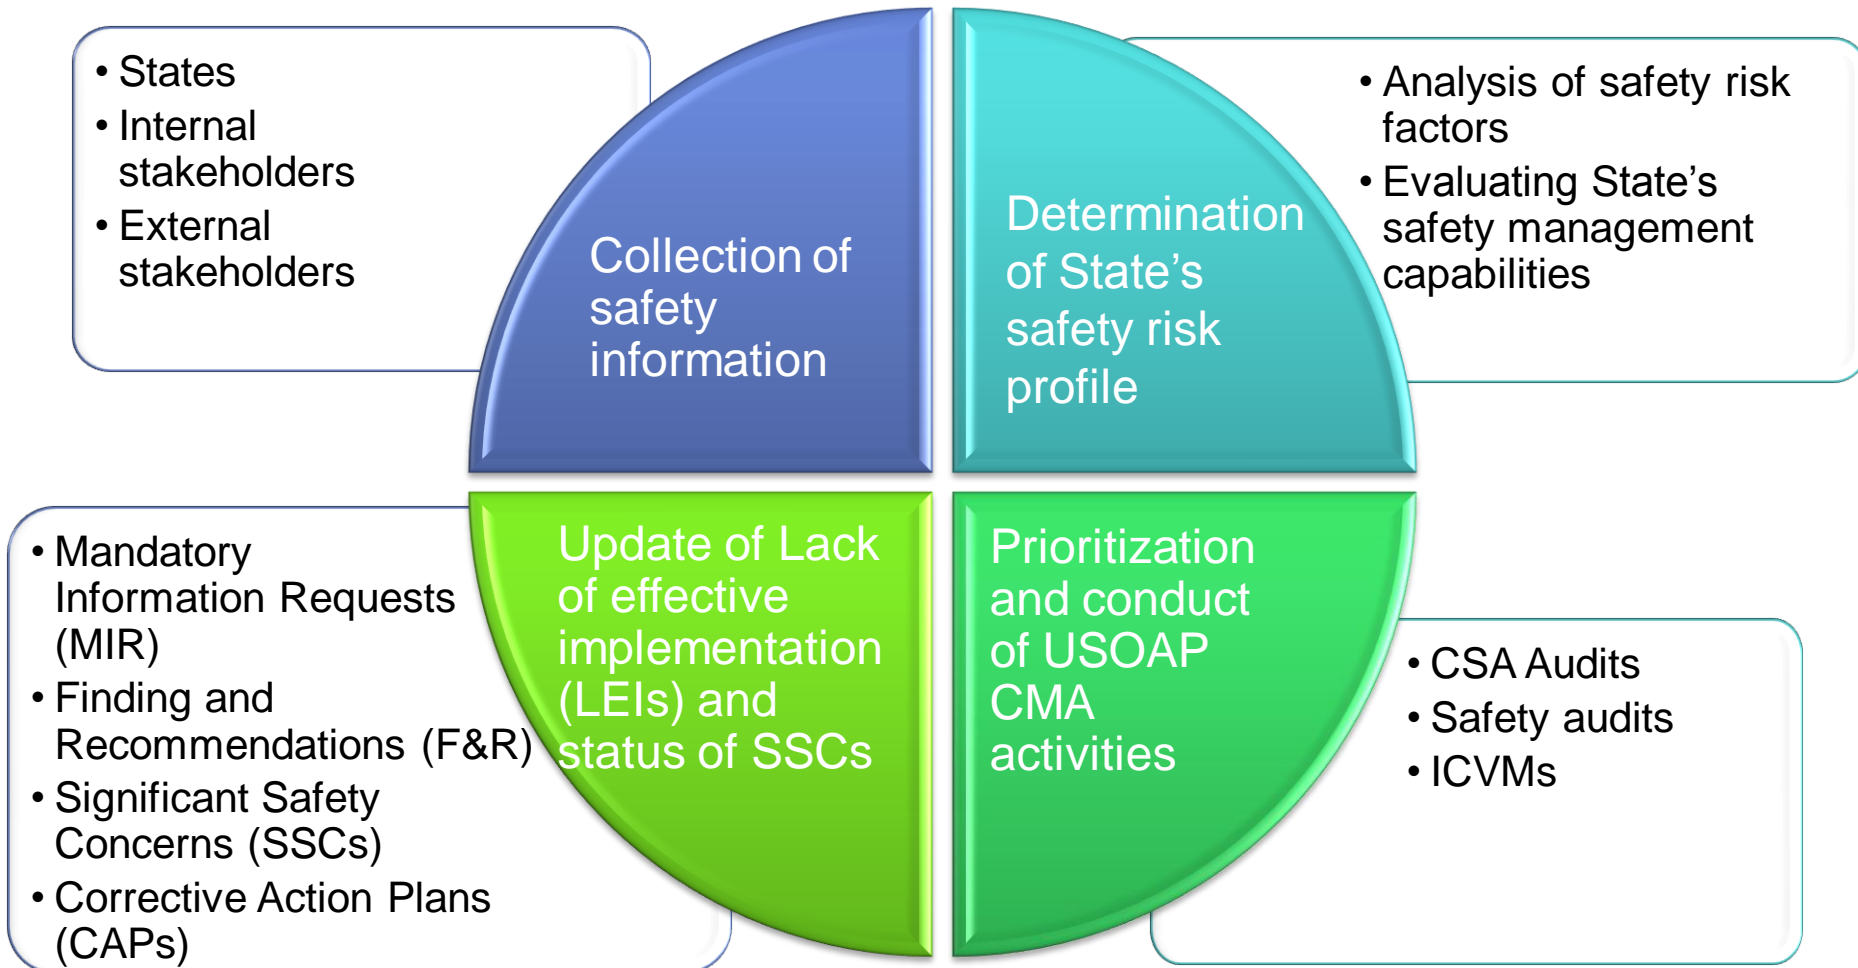

The objective of USOAP under the CMA is:

- to promote global aviation safety through continuous monitoring of the Member States' safety oversight capabilities.

The USOAP CMA provides a mechanism for ICAO:

- to collect safety information from Member States and other stakeholders, and
- to analyze this information using a risk-based approach to identify and prioritize appropriate activities to be carried out by ICAO.

# CMA Components

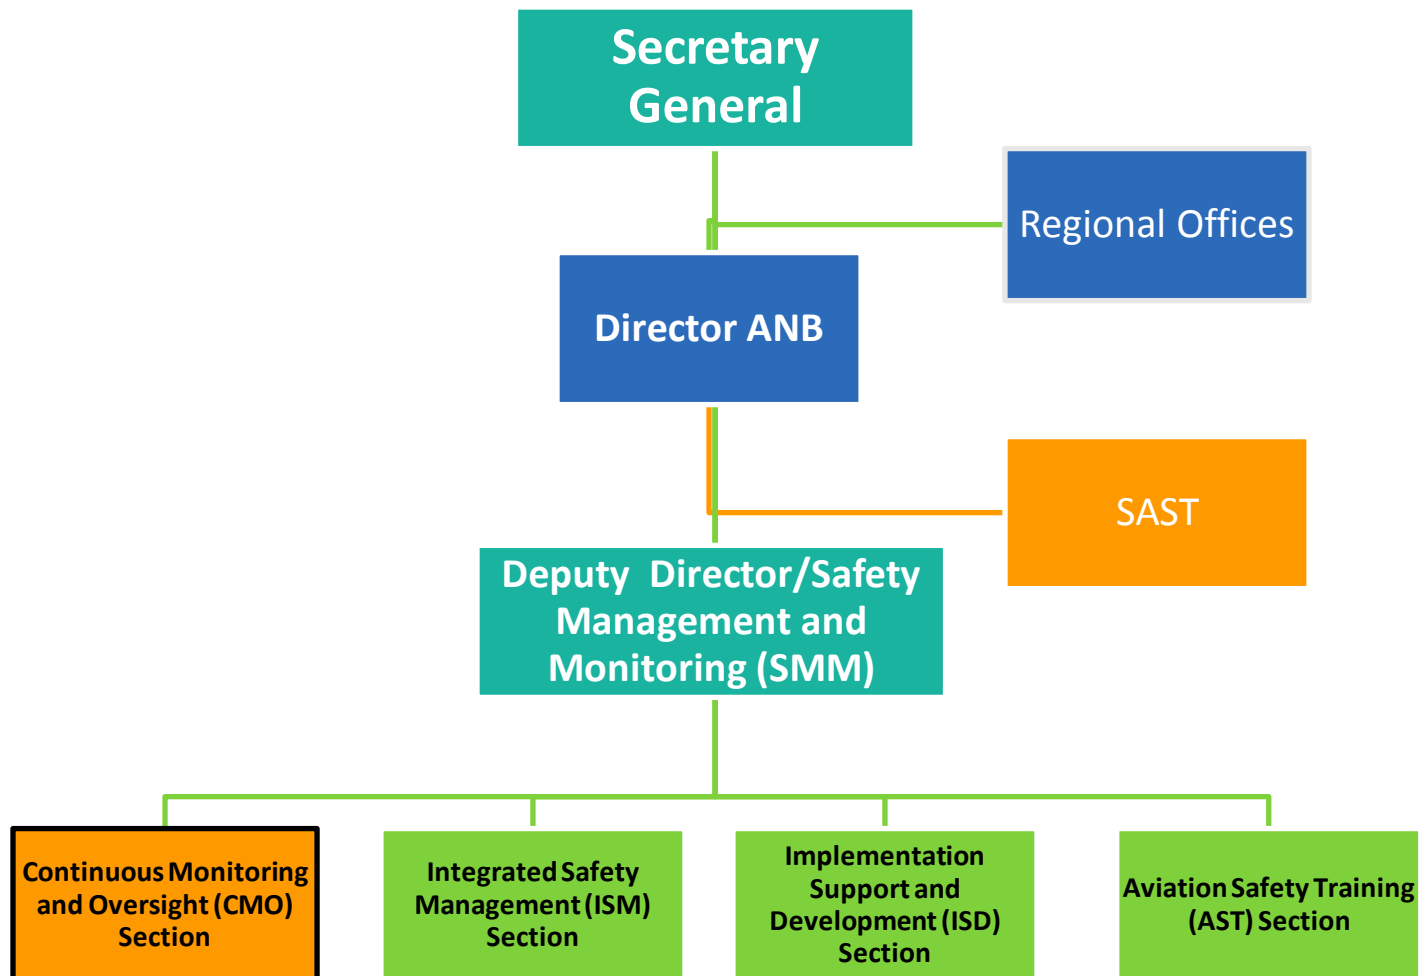

# Management of USOAP CMA

The Continuous Monitoring and Oversight (CMO) Section is responsible for the management of the overall development, transition, implementation, and quality of the CMA.

The effective implementation of the USOAP CMA depends on the partnerships, communication and exchange of information between the CMO Section and other ICAO Bureaus, Air Navigation Bureau (ANB) Sections, Regional Offices (ROs), Member States, international, regional and supranational organizations.

# Management of the CMA

# CMO Quality Management System (QMS)

The ICAO Council requested the Secretary General to establish an independent quality assurance mechanism:

- to monitor and assess the quality of USOAP (Assembly Resolution A33-8), and
- to increase the confidence of Member States and other stakeholders in the management of USOAP.

## Overview of the QMS

- Controls and documents procedures;
- Establishes mechanism(s) to monitor and improve USOAP CMA processes;
- Monitors and measures processes and activities;
- Adopts proactive approach to prevent nonconformities;
- Based on the requirements of ISO 9001:2008; and
- Registered to ISO 9001 since 2002 (with annual surveillance audits and re-registration audits every 3 years).

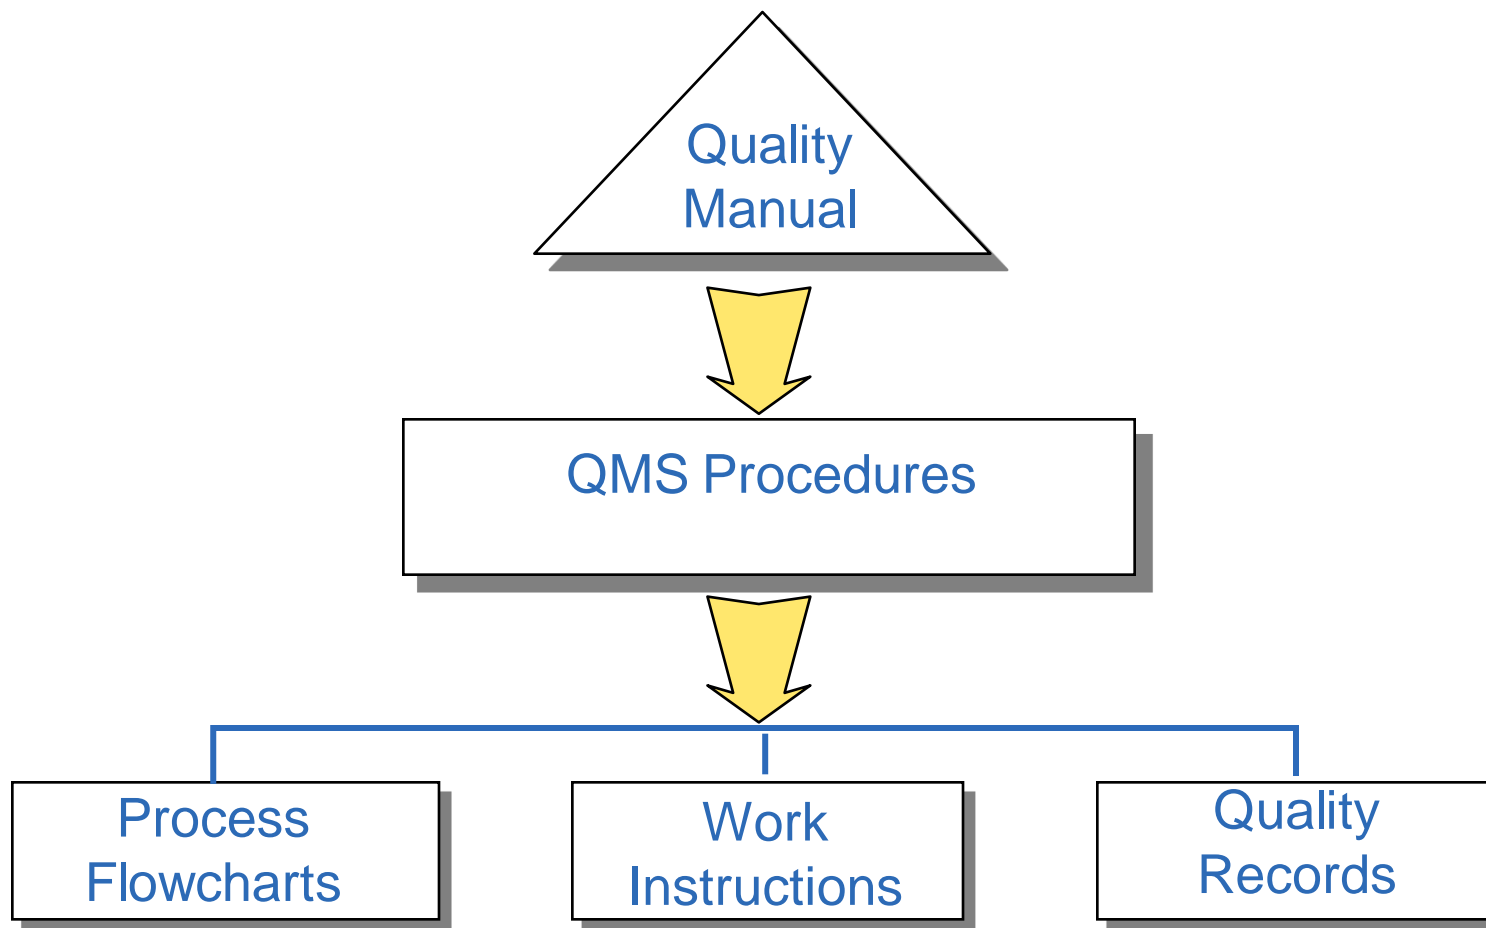

## Benefits of the QMS

- Ensures that USOAP CMA activities are carried out according to defined provisions;
- Identifies, manages and measures interactions among processes to ensure that desired outcomes are achieved;
- Uses facts and data for continuous improvement of processes and their effectiveness;
- Meets the requirements of all stakeholders; and
- Ensures the satisfaction of stakeholders, particularly Member States, with USOAP CMA processes and activities.

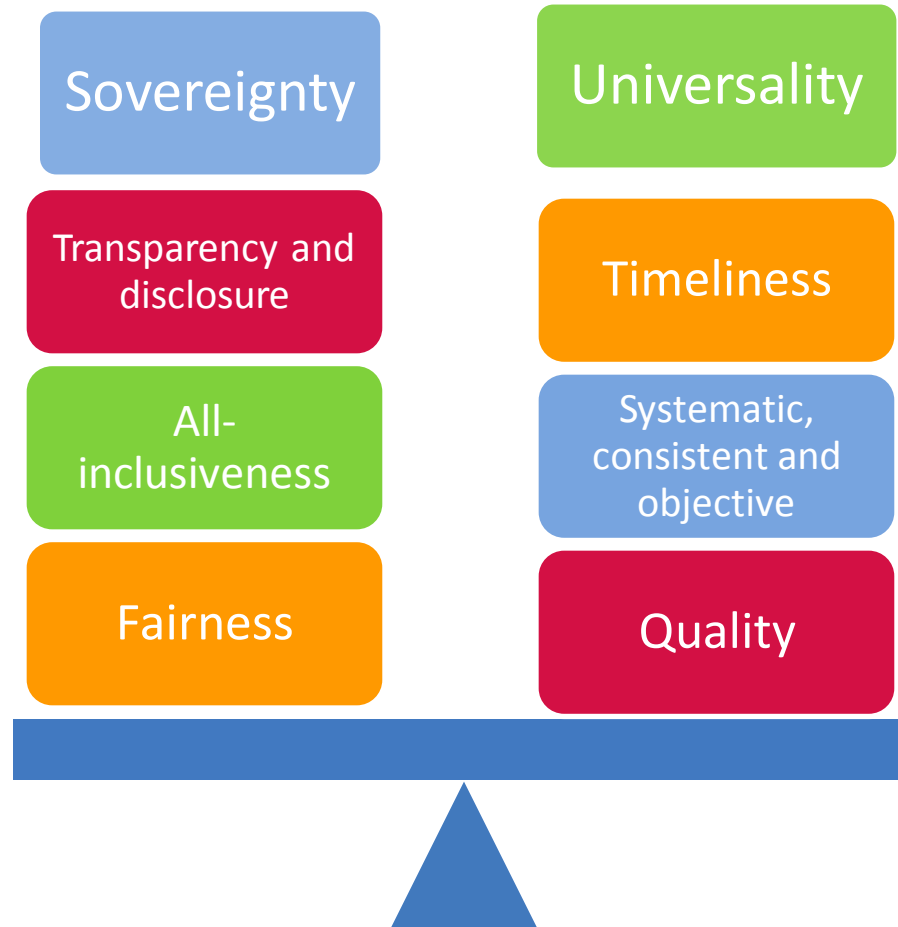

# CMO QMS (cont'd)

## Documentation System

# USOAP Principles

# Auditing Principles

The ISO 19011 International Standard provides guidance on the management of audit programmes, the conduct of internal or external audits of quality and/or environmental management systems, as well as on the competence and evaluation of auditors.

Five of the most important ISO 19011 auditing principles have been selected for USOAP CMA purposes.

# Auditing Principles (cont'd)

## ISO 19011 auditing principles applied for USOAP CMA activities

### Ethical Conduct

The foundation of professionalism.

*Trust, integrity, confidentiality and discretion* are essential to the conduct of USOAP CMA activities.

# Auditing Principles (cont'd)

## ISO 19011 auditing principles applied for USOAP CMA activities

### Fair Presentation

The obligation to report *truthfully* and *accurately*.

# Auditing Principles (cont'd)

## ISO 19011 auditing principles applied for USOAP CMA activities

### Due Professional Care

The application of *diligence* and *judgement* in the conduct of USOAP CMA activities.

# Auditing Principles (cont'd)

## ISO 19011 auditing principles applied for USOAP CMA activities

### Independence

The basis for *impartiality* of USOAP CMA activities and *objectivity* of the conclusions.

# Auditing Principles (cont'd)

## ISO 19011 auditing principles applied for USOAP CMA activities

### Evidence-based Approach

The rational method for reaching *reliable* and *reproducible* conclusions in a systematic process.

# CMA Information

## Collected by means of:

- States Aviation Activities Questionnaires (SAAQs)
- Compliance Checklists (CCs)
- Electronic Filing of Differences (EFODs)
- Protocol Questions (PQs)
- Mandatory Information Requests (MIRs)

## Processed by means of:

- Findings and Recommendations (F&Rs)
- Significant Safety Concerns (SSCs)
- Corrective Action Plans (CAPs)

# USOAP CMA Audit Areas

# Transition Plan

Task	Start	End	Q1 - 2011	Q2 - 2011	Q3 - 2011	Q4 - 2011	Q1 - 2012	Q2 - 2012	Q3 - 2012	Q4 - 2012
<b>MEMBER STATES TRANSITION TO CMA</b>										
Member States to sign newMoU	1/6/2011	31/8/2011								
Member States to assign National Continuous Monitoring Coordinator (NCMC)	1/6/2011	31/8/2011								
NCMC to complete Computer Based Training (CBT) on CMA	1/9/2011	1/3/2012								
States to update Corrective action plan (CAP) from the CSA audit cycle using the on-line framework	1/9/2011	1/7/2012								
States to develop a plan for the completion of their CMA protocols and communicate to ICAO	1/9/2011	1/7/2012								
States to update State Aviation Activity Questionnaire (SAAQ) using the on line framework	1/9/2011	1/9/2012								
States to completeUSOAP CMA protocols using the on-line framework according to established CMP	2/1/2012	31/12/2012								
Full CMA Launched	1/1/2013	1/1/2013								
<b>ICAO TRANSITION TO CMA</b>										
Publish new edition Doc 9735	1/6/2011	1/6/2011								
Develop and expand agreements with International Entities	1/1/2011	31/12/2011								
Conduct CMA testing of the on-line framework with some member States	1/1/2011	30/9/2012								
Conduct Regional CMA Workshops	1/8/2011	29/12/2011								
Secretariat launchCBT Auditor training	1/6/2011	31/12/2012								
Conduct ICAO Coordinated Validation Missions (ICVMs) (10 ICVMs in 2011) (20 ICVMs in 2012)	1/1/2011	31/12/2012								
Conduct Safety Audits at the request of member States	1/10/2011	31/12/2012								
Full CMA Launched	1/1/2013	1/1/2013

# Transition Plan (cont'd)

Tasks in the CMA Transition Plan (A37-WP/37)	2011			2012				2013			
	2Q	3Q	4Q	1Q	2Q	3Q	4Q	1Q	2Q	3Q	4Q
States to sign the <b>CMA MOU</b>		1/7/11 ~ 30/9/11									
States to assign <b>NCMC(s)</b>		1/7/11 ~ 30/9/11									
States to update action plans ( <b>CAPs</b> ) from the CSA Audit cycle		1/9/11 ~ 1/9/12						Full CMA launched			
States to complete <b>SAAQ</b>		1/9/11 ~ 1/9/12									
				1/1/12 ~ 31/12/12							
States to complete <b>PQs</b>											

## Once full CMA is launched, States are required to:

- Keep up-to-date State profile, SAAQ, CCs, and PQs;
- Respond to MIRs in a timely manner; and
- Provide updates on progress made to CAPs.

# Transition Plan (cont'd)

**2011**

## State

Update CAP  
Complete SAAQ  
Sign new MOU

## ICAO

- Doc 9735
- Seminars/  
Workshops
- CBT/OJT
- Expand  
agreements
- Conduct ICVMs

**2012**

## State

Update CAP  
Complete SAAQ  
CMA Online protocols

## ICAO

- CBT/OJT
- Prioritize CMA  
activities
- Conduct ICVMs
- Conduct Safety audits

**2013**

## State

Update CAP  
Update SAAQ  
CMA Online protocols

## ICAO

- CBT/OJT
- Prioritize CMA  
activities
- Conduct ICVMs
- Conduct Safety  
audits
- Conduct CSA audits

# Transition Plan (cont'd)

ICVMs (10 in 2011 and 20 in 2012)

Seminar/workshop (8 in 2011 and 2 in 2012)

Safety audits (as of 2012)

# CMA in 2013 and beyond

An average of 30 ICVMs per year

An average of 15 CSA audits per year

2 seminars per year

Expansion of the ISO 9001-certified QMS

# Review

- ❑ Background
- ❑ Evolution and objective of USOAP CMA
- ❑ Management of CMA — CMO Quality Management System
- ❑ USOAP CMA and auditing principles
- ❑ CMA stakeholders, staffing, activities and information
- ❑ USOAP CMA audit areas
- ❑ Transition to CMA
