Airport CDM – Group Exercises

ICAO SAM 3rd Workshop

David Phythian
Lima, Peru
26 September 2017

A-CDM – Group Exercises

- Groups will have specific tasks related to different Airport Scenarios

- Each group to present to the open forum

A-CDM – Airport A

- Busy main
- 2 runways
- No runway crossings
- Cul de sac between
- Pier A and B
- 2 ground handling companies
- Peak hour traffic
- 30 ARR / 35 DEP
- Stands total 35

Questions?

How would you implement Pre – Departure Sequencing?

What information do you require?

What tools do you require?

A-CDM – Airport B

- Holiday destination
- Single runway
- 10 stands on narrow ramp
- 15 contact stands
- 30 ARR, 25 DEP
- B757 30% of traffic
- Ground handler in monopoly position
- Access road prone to accidents and blockage
- Traffic via congested airspace

Questions?

How would you implement Airport CDM
