

SECURITY COURSES & PROGRAMME

ICAO-ACI Management of Airport Security

The ACI-ICAO Management of Airport Security course provides guidance to aviation security personnel at a managerial level on planning, coordinating and implementing airport security preventative measures and pro-active initiatives that are in accordance with national programmes and airport industry best practices.

Classroom

Virtual

Duration 5 days

Developed in collaboration with Airports Council International (ACI)

Introduction to Security Culture

This course aims to give delegates an understanding of what a security culture is, what the benefits of a security culture are and how it can be embedded. Delegates will also be given tools and techniques to measure current security culture in their organisations.

Classroom and Virtual

Duration 2 days

Developed in collaboration with UK CAA International (CAAi)

Foundations of Aviation Cybersecurity Leadership and Technical Management

This five-day foundational course addresses the importance and urgency of protecting civil aviation's critical infrastructure systems and data against cyber threats. The course is designed to introduce aviation practitioners to the domain of cybersecurity, focusing on the aviation field.

Virtual

Duration 5 days (or 10 half days)

Developed in collaboration with Embry-Riddle Aeronautical University

Master of Science (MSc) in Aviation Security

The MSc in Aviation Security allows you to explore and develop theories and methodologies to mitigate these risks, and consider and analyse the future of safe and secure aviation. This master's analyses, evaluates and develops the multi-layered and interconnected processes involved in security management in the high-risk and technology-dependent world of aviation.

Part-time distance learning

Duration 2 years

Developed in collaboration with Buckinghamshire New University

Security Training Week from 6 to 17 December

The training week provides a selection of security related courses developed in partnership with academic institutions, international organization and industry stakeholders to support the sector in meeting their aviation security goals and implementation of the relevant ICAO's Standards and Recommended Practices.
