SESSION 2

**Introduction to the
Global Aviation Safety Plan (GASP)**

Overview

- ICAO strategic objective in safety
- What is GASP
- Purpose
- GASP principles
- Scope
- Review process
- Relationship with other Global Plans

ICAO

SAFETY

NO COUNTRY LEFT BEHIND

What is the GASP?

- Global strategy for safety improvement
- Framework for regional & national plans
- Promotes harmonization & coordination of efforts

Purpose of GASP

- Continually reduce fatalities and risk of fatalities
 - associated with accidents
 - by guiding harmonized development and implementation of RASP/NASP
- States, regions and industry facilitate implementation of GASP
 - through coordinated SEIs
- Through GASP, ICAO prioritizes global action in aviation safety
 - by addressing HRCs

Purpose of GASP (2)

- Assist States, regions and industry in planning & implementation
 - by establishing GASP goals, targets and indicators
 - providing framework for planning and implementation of SEIs
 - presenting global aviation safety roadmap
 - to achieve the GASP goals
 - providing methodology for identification of hazards & emerging issues
 - and management of regional / national safety risks

GASP Principles

- GASP contains vision = intent behind plan
- It also includes mission statement
 - what ICAO seeks to achieve through GASP
- Set of values are presented in GASP
 - to guide SEIs and enable GASP to meet its purpose

Scope of GASP

- GASP is strategic document
 - flexible, step-by-step approach for planning & implementation
- States must develop safety oversight capabilities & implement SSP
 - in accordance with ICAO SARPs
- GASP is means for States to achieve compliance with ICAO SARPs
 - go beyond minimum level of compliance
 - proactive management of ops safety risks

Scope of GASP (2)

- Assist States to identify deficiencies and prioritize actions
 - by providing implementation strategy in roadmap
- Assist States in strengthening capabilities in management of safety
 - process founded on CEs of State safety oversight system
- States, regions and industry should prioritize SEIs
 - first establish effective safety oversight capabilities
 - then address operational safety risks effectively

Relationship with Other Global Plans

Points to Remember

- GASP is global strategy for safety improvement
- Framework for RASP & NASP
- Promotes harmonization & coordination of efforts
- Developed via comprehensive process
