

Statement at the press conference made by Mr. Ishii, the Minister of Ministry of Land, Infrastructure, Transport and Tourism, Government of Japan

20 September 2016

The General Assembly of the International Civil Aviation Organization (ICAO) will be held in Montreal, Canada, from 27 September, wherein the measures for reduction of GHG (Green House Gas) emissions from the international aviation sector will be discussed.

Japan is playing a responsible role in the field of international aviation, and it has also been playing a positive role in implementing measures against global warming. In this context, Japan came to the decision of participating in the Global Market-Based Measure. This will effectively reduce the GHG emissions from the international aviation sector.
