**1. Introduction**

1.1 Air navigation deficiencies correspond to non-compliance with the SARPs in Annex 15 and with the elements declared by States in the CAR/SAM Regional Air Navigation Plan.

1.2 The Secretariat has maintained ongoing monitoring of these deficiencies through the SAM/AIM meetings and the GREPECAS mechanisms, using the GANDD database as the main tool.

1.3 Follow-up has also been strengthened through regional virtual meetings (2025) where States presented progress on the AIS to AIM transition roadmap, including e-AIP, digital datasets and AIM staff competencies

**2. Discussion**

2.1 The Air Navigation Deficiencies Database contains requirements not met by States, which are related to ICAO SARPs and air navigation services, as well as infrastructure declared in the Regional Air Navigation Plan.

2.2 The Secretariat has noted that a significant percentage of these gaps are related to AIS/AIM, mainly related to digital datasets related to terrain and obstacles, and to the availability of AIP and English language.

2.3 The Secretariat reminds the Meeting that it has referred that the corrective action plans (CAPs) must be reviewed and updated as well as their compliance.

2.4 The situation of deficiencies, if they have yet to update the reports reported by Brazil and Chile, appears in **Appendix A**.

3. **Action Required**

3.1. The Meeting is invited to:

- a) take note of the information presented in the WP;
- b) provide information to update the table;
- c) update the corrective Action Plan; and
- d) consider other actions that they deem necessary.
