

Agenda Item 4: Report on GESEA activities and deliverables and its Subgroups

**REGIONAL WEBINAR ON THE BRAZILIAN AIRPORT
EFFICIENCY PROGRAM**

(Prepared by Brazil)

SUMMARY

This Paper reports on the successful execution of the Regional Webinar on the Brazilian Airport Efficiency Program, organized in compliance with GESEA/8/2 Action. The event was held on 23 April 2025 and coordinated by Brazil (DECEA), the ICAO SAM Office, and IATA. It aimed to disseminate best practices, methodologies, and results from initiatives implemented at strategic Brazilian airports. The webinar was broadcast online and is publicly available.

1. Background

1.1 GESEA/8/2 Action established coordination among Brazil, ICAO SAM Office, and IATA to organize a regional event aimed at sharing progress on the Airport Efficiency Program developed by Brazil's GEPEA Group. The program has promoted the implementation of initiatives at major Brazilian airports such as SBGR, SBKP, SBGL, and SBRJ, covering topics such as RRSM, HIRO, omnidirectional SIDs, and take off and approach windows (ADW), among others.

2. Analysis

2.1 The event was held on 23 April 2025 via virtual platform, with participation from States, the aviation industry, and international organizations. The following topics were presented, in accordance with the previously distributed agenda:

- a) Phases of the Airport Efficiency Programme;
 - Operational results at high-demand airports;
 - Analysis tools, performance measurement, and risk management;
 - Success stories and lessons learned.

2.2 The activity successfully fulfilled its objective of sharing Brazil's experiences and promoting interest in replicating or adapting such methodologies in other States.

3. **Suggested actions**

3.1 The Meeting is invited to:

- a) Take note of the Regional Webinar held on 23 April 2025 on the Brazilian Airport Efficiency Programme;
- b) Encourage SAM States to view the recorded content available at the following link: Webinar Recording; and
