

РАБОЧИЙ ДОКУМЕНТ

ЮРИДИЧЕСКИЙ КОМИТЕТ — 37-Я СЕССИЯ

(Монреаль, 4–7 сентября 2018 года)

- Пункт 2 повестки дня.** Рассмотрение общей программы работы Юридического комитета
- Пункт 2-2 повестки дня.** Рассмотрение инструктивного материала о конфликте интересов
- Пункт 2-4 повестки дня.** Рассмотрение вопроса о разработке правовых рамок применительно к системам CNS/ATM, включая глобальные навигационные спутниковые системы (GNSS) и региональные многонациональные органы
- Пункт 2-5 повестки дня.** Определение статуса воздушного судна – гражданское/государственное
- Пункт 2-6 повестки дня.** Содействие ратификации документов международного воздушного права

РАССМОТРЕНИЕ ДРУГИХ ВОПРОСОВ, ВКЛЮЧЕННЫХ В ОБЩУЮ ПРОГРАММУ РАБОТЫ ЮРИДИЧЕСКОГО КОМИТЕТА

(Представлено Секретариатом)

1. ВВЕДЕНИЕ

1.1 В настоящем рабочем документе содержится информация о работе, относящейся к пунктам 2-2, 2-4, 2-5 и 2-6 общей программы работы Юридического комитета, которые не входят в число пунктов, рассмотренных в рабочих документах LC/37-WP/2-1, LC/37-WP/2-3, LC/37-WP/2-7 и LC/37-WP/2-8.

2. РАССМОТРЕНИЕ ИНСТРУКТИВНОГО МАТЕРИАЛА О КОНФЛИКТЕ ИНТЕРЕСОВ

2.1 На 4-м заседании своей 209-й сессии, состоявшемся 25 ноября 2016 года, Совет подтвердил включение этого вопроса в качестве пункта № 2 в общую программу работы Юридического комитета.

2.2 В ходе 36-й сессии Юридического комитета (30 ноября – 3 декабря 2015 года) было отмечено, что по причине распространенности случаев конфликтов интересов в гражданской авиации всем государствам необходимо иметь систему для разрешения таких конфликтов, а также было принято решение продолжить работу по этому вопросу, которая включая представление резолюции 39-й сессии Ассамблеи ИКАО (27 сентября – 6 октября 2016 года). В связи с этим Ассамблея приняла резолюцию А39-8 *"Конфликты интересов в гражданской авиации"*, в которой

она настоятельно призвала государства разработать правовые рамки в отношении конфликтов интересов в деятельности гражданской авиации. В этой резолюции Ассамблея также поручила Совету в интересах государств-членов оказывать содействие сбору, анализу и распространению информации о передовой практике разрешения конфликтов интересов и ее внедрению. Она также поручила Генеральному секретарю продолжить сбор информации от государств и соответствующих межправительственных организаций о политике и мерах в этой области, а также разработать справочный документ с указанием всех содержащихся в Приложениях и руководствах ИКАО положений, касающихся конфликтов интересов.

2.3 В целях выполнения задачи, возложенной на Секретариат в резолюции А39-8 Ассамблеи, по разработке справочного документа с указанием всех содержащихся в Приложениях и руководствах положений, касающихся конфликтов интересов, в 2017 году Секретариат провел многоплановое исследование и анализ для выявления таких положений. Подборка положений ИКАО, касающихся конфликтов интересов, приводится в **добавлении А** к настоящему документу. Эта подборка положений будет представлена на сайте ИКАО.

2.4 Ассамблея также приняла к сведению, что указанная в резолюции деятельность будет осуществляться при наличии ресурсов в бюджете Регулярной программы на 2017–2019 годы и/или за счет внебюджетных взносов. Следовательно, в связи с необходимостью определения источников финансирования другая работа, предусмотренная в резолюции А39-8 Ассамблеи, может быть перенесена на более поздний срок.

3. РАССМОТРЕНИЕ ВОПРОСА О РАЗРАБОТКЕ ПРАВОВЫХ РАМОК ПРИМЕНИТЕЛЬНО К СИСТЕМАМ CNS/АТМ, ВКЛЮЧАЯ ГЛОБАЛЬНЫЕ НАВИГАЦИОННЫЕ СПУТНИКОВЫЕ СИСТЕМЫ (GNSS) И РЕГИОНАЛЬНЫЕ МНОГОНАЦИОНАЛЬНЫЕ ОРГАНЫ

3.1 На 4-м заседании своей 209-й сессии Совет подтвердил включение этого вопроса в качестве пункта № 4 в общую программу работы Юридического комитета. На 8-м заседании своей 211-й сессии, состоявшемся 19 июня 2017 года, Совет поручил Юридическому комитету проанализировать существующую формулировку пункта № 4 в целях ее изменения таким образом, чтобы лучше отразить в ней события в технической сфере, произошедшие за последние годы, включая, помимо прочего, принятие Глобального аэронавигационного плана (ГАНП), а также другие недавние инициативы, такие как глобальное слежение.

4. ОПРЕДЕЛЕНИЕ СТАТУСА ВОЗДУШНОГО СУДНА – ГРАЖДАНСКОЕ/ГОСУДАРСТВЕННОЕ

4.1 На 4-м заседании своей 209-й сессии Совет подтвердил включение этого вопроса в качестве пункта № 5 в общую программу работы Юридического комитета.

4.2 На 5-м заседании своей 203-й сессии, состоявшемся в ноябре 2014 года, на котором Совет принял решение включить этот вопрос в программу работы Юридического комитета [в качестве пункта № 7], Совет также поручил Управлению по правовым вопросам и внешним сношениям (ЛЕВ) рассмотреть материалы проведенного Секретариатом в 1993 году исследования по вопросу "Гражданские/государственные воздушные суда" (исследование 1993 года) в целях определения областей, в которых возможно участие Юридического комитета, а также рекомендовал рассмотреть пути решения этого вопроса без изменения пункта b) статьи 3 *Конвенции о международной гражданской авиации* (Чикагская конвенция).

4.3 В ходе 36-й сессии Юридического комитета Комитет на основании рабочего документа LC/36-WP/2-6 "Определение гражданских/государственных воздушных судов и его значение для авиации" пришел к выводу, что в целях сужения круга вопросов, на которые LEV необходимо обратить внимание при рассмотрении материалов исследования 1993 года, следует разослать вопросник, касающийся практических проблем, с которыми сталкиваются государства при классификации "гражданских/государственных воздушных судов". В соответствии с рекомендациями Комитета вопросник был разослан 1 ноября 2016 года (письмо государствам LE 4/50 – 16/86), и в нем государствам было предложено представить ответы до 1 февраля 2017 года.

4.4 Пятьдесят пять государств (23,5 % членов ИКАО) представили ответы на вопросник, которые были проанализированы в целях оказания помощи LEV в рассмотрении материалов исследования 1993 года. Сорок семь из 55 представивших ответы государств не подняли никаких вопросов и не выразили озабоченности в отношении определения статуса воздушного судна – гражданское/государственное. Из 9 государств, которые подняли некоторые вопросы или выразили озабоченность, только 4 государства предложили внести поправку в статью 3 Чикагской конвенции, тогда как еще три государства призвали ИКАО утвердить толкование пункта b) статьи 3, подобное предложенному в материалах исследования 1993 года, с тем чтобы упростить процесс определения статуса воздушного судна (гражданское/государственное) и предусмотреть критерии, которые позволят определять, используется ли воздушное судно на военной, таможенной и полицейской службах. Остальные два государства подняли вопросы, преимущественно относящиеся к категории эксплуатационных или касающихся внедрения.

4.5 На основании достигнутого в ходе 36-й сессии Юридического комитета общего согласия об отсутствии необходимости внесения поправок в пункты a) и b) Чикагской конвенции и с учетом полученных ответов на вопросник, которые не позволяют сделать вывод, что государства сталкиваются с какими-либо проблемами в связи с правовым режимом, действующим в отношении гражданских/государственных воздушных судов и требующим обновления или какого-либо другого изменения мнений и рекомендаций, изложенных в материалах исследования 1993 года, Юридическому комитету предлагается:

- a) принять к сведению по-прежнему актуальные мнения и рекомендации, изложенные в материалах исследования 1993 года по вопросу об определении статуса воздушного судна – гражданское/государственное;
- b) рекомендовать Совету призвать государства сотрудничать друг с другом в целях решения эксплуатационных вопросов, касающихся статуса воздушного судна (гражданское/государственное), и/или обмениваться передовой практикой в области осуществления пункта b) статьи 3 посредством прямых консультаций или путем использования соответствующих форумов или региональных групп ИКАО;
- c) рекомендовать Совету считать работу по пункту "Определение статуса воздушного судна – гражданское/государственное" завершенной и исключить этот пункт из программы работы Юридического комитета.

5. СОДЕЙСТВИЕ РАТИФИКАЦИИ ДОКУМЕНТОВ МЕЖДУНАРОДНОГО ВОЗДУШНОГО ПРАВА

5.1 На 4-м заседании своей 209-й сессии Совет подтвердил включение этого вопроса в качестве пункта № 6 в общую программу работы Юридического комитета.

5.2 Число ратификаций документов международного воздушного права, принятых под эгидой ИКАО, в том числе число ратификаций, имевших место со времени окончания 36-й сессии Юридического комитета (3 декабря 2015 года), указано в **добавлении В** к настоящему документу. На общедоступном сайте ИКАО в разделе "Сборник договоров" приводится дополнительная информация, в частности: текущий перечень участников многосторонних договоров в области воздушного права; статус отдельных государств в отношении многосторонних договоров по воздушному праву; сводная таблица, иллюстрирующая статус договоров и статус государств в отношении договоров; подборка административных материалов для оказания помощи государствам в присоединении к договорам; резолюции Ассамблеи, касающиеся вопросов ратификации; и текущая информация и рекомендации по вопросам ратификации. На сайте оперативно размещается информация, отражающая в хронологическом порядке все акты сдачи на хранение ратификационных грамот.

5.3 В ходе 39-й сессии Ассамблеи были утверждены поправки к статьям 50 (а) и 56 Чикагской конвенции. Поправкой к статье 50 (а) членский состав Совета был увеличен с 36 до 40 человек, а поправкой к статье 56 членский состав Аэронавигационной комиссии был увеличен с 19 до 21 человека. Ассамблея приняла резолюции А39-5 и А39-7, в которых всем Договаривающимся государствам было рекомендовано как можно скорее ратифицировать эти поправки, а Генеральному секретарю было поручено как можно скорее довести эти резолюции до сведения Договаривающихся государств. Соответственно, 20 января 2017 года было выпущено письмо государствам LE 3/1.20, LE 3/1.21 – 17/2, к которому были приложены эти резолюции и в котором содержался настоятельный призыв ратифицировать эти поправки.

5.4 Важность всеобщего принятия *Конвенции для унификации некоторых правил международных воздушных перевозок*, которая была совершена в Монреале 28 мая 1999 года, была особо отмечена Ассамблеей в резолюции А39-9 "*Содействие принятию Монреальской конвенции 1999 года*", в которой Ассамблея настоятельно призвала все государства, которые еще не сделали этого, стать участниками этой конвенции. Соответственно, 2 марта 2017 года было выпущено письмо государствам LE 3/38.1-17/25, к которому была приложена вышеупомянутая резолюция и в котором содержался настоятельный призыв ратифицировать эту конвенцию.

5.5 Ассамблея также признала важность расширения и укрепления глобального режима авиационной безопасности, приняв резолюцию А39-10 "*Содействие принятию Пекинской конвенции и Пекинского протокола 2010 года*", в которой Ассамблея настоятельно призвала все государства подписать и ратифицировать *Конвенцию о борьбе с незаконными актами в отношении международной гражданской авиации* (Пекинская конвенция 2010 года) и *Протокол, дополняющий Конвенцию о борьбе с незаконным захватом воздушных судов* (Пекинский протокол 2010 года). Соответственно, 2 марта 2017 года было выпущено письмо государствам LE 3/44, LE 3/45-17/26, к которому была приложена вышеупомянутая резолюция и в котором содержался настоятельный призыв ратифицировать Пекинские документы. Следует отметить, что Пекинский протокол 2010 года вступил в силу 1 января 2018 года – в первый день второго месяца после ратификации Республикой Уганда 28 ноября 2017 года. После ратификации Угандой был сдан на хранение 22-й документ о ратификации, что требовалось для вступления в силу Протокола в соответствии с пунктом 1 его статьи XXIII. Пекинская конвенция 2010 года вступила в силу 1 июля 2018 года – в первый день второго месяца после ратификации Турецкой Республикой 31 мая 2018 года. После ратификации Турцией был сдан на хранение 22-й документ о ратификации, что в соответствии с пунктом 1 статьи 22 Конвенции требовалось для ее вступления в силу.

5.6 Президент Совета и Генеральный секретарь постоянно поднимают вопрос ратификации документов международного воздушного права в ходе своих визитов в государства-члены и встреч с высокопоставленными государственными должностными лицами. Международная ассоциация воздушного транспорта (ИАТА), Региональное бюро Восточной и Южной Африки (ESAF) ИКАО и Республика Корея провели у себя юридические семинары соответственно 1 апреля 2016 года, 27 – 28 ноября 2017 года и 24 -25 мая 2018 года в целях содействия, в частности, ратификации этих документов. ЛЕВ также поднимает вопрос ратификации на юридических семинарах, во время личной сдачи на хранение документов государственными должностными лицами, на сессиях Ассамблеи и других совещаниях ИКАО.

6. ПРОЧИЕ ВОПРОСЫ

6.1 На восьмом заседании своей 211-й сессии Совет одобрил созыв 37-й сессии Юридического комитета и просил Комитет рассмотреть вопрос о включении в предварительную повестку дня двух дополнительных пунктов, касающихся соответственно:

- а) правовых аспектов изменений в области космического права в контексте деятельности, осуществляемой Управлением по вопросам космического пространства Организации Объединенных Наций (УВКП) в части, применимой к мандату ИКАО;
- б) кибербезопасности и в частности того, охватывают ли в настоящее время должным образом положения Пекинской конвенции 2010 года правовые аспекты этой проблемы.

7. ДЕЙСТВИЯ КОМИТЕТА

7.1 Юридическому комитету предлагается рассмотреть настоящий рабочий документ и предпринять любые действия, которые он сочтет необходимыми.

APPENDIX A

**ICAO GUIDANCE
ON CONFLICTS OF INTEREST
IN CIVIL AVIATION**

(Consolidation of Current ICAO Provisions)

July 2018

PART I - OVERVIEW

INTRODUCTION

In accordance with Assembly Resolution A39-8 *Conflicts of interest in civil aviation*, this reference document identifies provisions in the Annexes and manuals relating to conflicts of interest (COI). The purpose of this document is to provide easy reference to provisions set out in various ICAO documents that are relevant to the topic of COI.

DEFINING COI

A COI is typically defined as a situation in which an official has private interests that may or be perceived to improperly influence or interfere with the performance of his or her official duties and responsibilities. Such improper influence or perceived interference could be attributed to situations involving financial interest, family, emotional life, political or national affinity of the official. COI may also be found at the level of an organization. An organizational COI arises where an organization fails or is impeded to act impartially due to outside activities or relationships it has with other entities.

In the field of civil aviation, such COI may arise, principally, in two different scenarios:

- (a) First, through interactions between a department of the Government or its regulatory agencies with operating entities that are subject to regulation (such as air operators, aviation training organizations, approved maintenance organizations, design organizations, production organizations, air navigation service providers and aerodrome operators). Examples of COI situations that could arise in the course of such interactions include:
 - (i) direct or indirect financial interests in regulated entities;
 - (ii) movement of individuals between jobs in the regulatory and regulated entities (also referred to as “revolving door” situations);
 - (iii) performance of regulatory duties by seconded or designated staff of the regulated entities;
 - (iv) partnerships or arrangements between regulatory and regulated entities to advance the commercial interests of the regulated entities at the expense of the public interest (leading to what is also referred to as “regulatory capture”); and
 - (v) lobbying of policy or rule-making bodies on behalf of or in favour of regulated entities;
- (b) Second, through relationships between different organs or entities of the State involved in civil aviation activities, which could include:

- (i) overlap of functions between regulatory bodies and the government or its other organs such as the military, police, customs and investigative bodies;
- (ii) ownership or control of regulatory and operator entities by the State; and
- (iii) combination of regulatory and service provision functions in the same or related entities.

It is possible that COI (real or perceived), arising from such interactions or relationships, may hamper effective, independent and impartial regulation.

LEGAL FRAMEWORK

Generally, States have developed legal and institutional frameworks to deal with COI in response to requirements of their national laws or with reference to international treaties, such as the United Nations Convention Against Corruption of 2003 (UNCAC)¹ which provides for instance in Article 7(4) that: *“Each State Party shall, in accordance with the fundamental principles of its domestic law, endeavour to adopt, maintain and strengthen systems that promote transparency and prevent conflicts of interest.”* There are also guidelines or codes of best practice developed by international organizations such as the Organization for Economic Cooperation and Development (OECD) or by professional bodies. Civil aviation administrations in a given State might be subject to government-wide conflicts of interest frameworks or to frameworks that apply specifically only to them or to some combination of such frameworks. Frameworks that have been developed generally for the public sector or for particular professions may not fully address conflicts of interest as they relate specifically to civil aviation activities.

In a survey carried out by the ICAO Secretariat², it was found that many States have established a framework that deals specifically with civil aviation in addition to or separate from the general framework applicable to the public sector as a whole. In this regard, many respondents observed that it was necessary to establish such a specific framework so as to manage COI risks that are unique to civil aviation and to achieve legal harmonization and certainty. Indeed, the Convention on International Civil Aviation, 1944 (the Chicago Convention) sets an early precedent for standards of conduct in rule making, when in Article 50c) it provides that *“ No representative of a contracting State on the Council shall be actively associated with the operation of an international air service or financially interested in such a service.”* ICAO has also prescribed rules in Annexes and developed guidance for States on COI.

The Assembly in A39-8 urges States which have not done so to consider establishing a legal framework to detect, avoid, mitigate and manage conflicts of interest in civil aviation. It also invites States to examine the level of adequacy of their domestic legal regimes in this regard and

¹ 186 Parties as at June 2018

² The results of the survey were reported to the Legal Committee in LC/36-WP/2-2

where necessary to enact laws and establish relevant policy frameworks. Current ICAO rules and guidance could be used as a reference to inform States as well as guide decisions and future work in this area. Assembly Resolution A39-8 is reproduced in the **Appendix**.

Annex - 17 Security and Annex 19 - Safety Management contain Standards on COI that States are required to implement.

ICAO PROVISIONS

A number of ICAO Annexes and manuals contain provisions which identify and describe potential COI situations in various activities involving civil aviation and highlight the need as well as the means and measures that could be taken by States to address them.

The provisions identified in the ICAO Annexes and manuals have been organized under the following headings, which are provided for convenience only: Safety Management and Oversight; Security; Aeronautical Charts; Charges for Airports and Air Navigation Services; Airport Economics; and Accident Investigation.

PART II - ICAO PROVISIONS RELATING TO CONFLICTS OF INTEREST

A. SAFETY MANAGEMENT AND OVERSIGHT

ANNEX 19 - SAFETY MANAGEMENT

Chapter 3. State Safety Management Responsibilities

3.2 State safety policy, objectives and resources

3.2 Each State shall establish and implement a safety oversight system in accordance with Appendix 1.

Appendix 1 State Safety Oversight System

3. State System and Functions

3.3 The State shall ensure that personnel performing safety oversight functions are provided with guidance that addresses ethics, personal conduct and the avoidance of actual or perceived conflicts of interest in the performance of official duties.

ANNEX 19 - SAFETY MANAGEMENT (APPLICABLE FROM 7 NOVEMBER 2019)

Chapter 3. State Safety Management Responsibilities

3.2 State safety policy, objectives and resources

3.2.3 State System and Functions

3.2.3.1 States shall establish State System and functions in accordance with section 3 of Appendix 1.

Appendix 1 State Safety Oversight (SSO) System Critical Elements

Section 3. State System and Function (CE-3)

3.4 State shall ensure that personnel performing safety oversight functions are provided with guidance that addresses ethics, personal conduct and the avoidance of actual or perceived conflicts of interest in the performance of official duties.

DOC 9859 – SAFETY MANAGEMENT MANUAL
Fourth Edition (advance unedited) — 2018

1.2 Safety Management Applicability

1.2.4 Applicability for State-owned or military service providers

1.2.4.2 Where the State operates as a service provider there should be a clear separation between its functions as the service provider and that of the State regulatory authority. This is accomplished by having clearly defined roles and responsibilities for State authority and service provider personnel to avoid any conflicts of interest.

Chapter 8 - STATE SAFETY MANAGEMENT

8.2 State Safety Programme (SSP)

8.4 Component 2: State Safety Risk Management

8.4.8 Accident investigation

8.4.8.1 The accident investigation authority (AIA) must be functionally independent from any other organization. Independence from the CAA of the State is of particular importance. The interests of the CAA could conflict with the tasks entrusted to the AIA. The rationale for the independence of this function from those of other organizations is that accident causation can be linked to regulatory or SSP-related factors. Also, such independence enhances the viability of the AIA and avoids real or perceived conflicts of interest.

Chapter 9 - SAFETY MANAGEMENT SYSTEMS (SMS)

9.3 Component 1: Safety Policy And Objectives

9.3.5 Safety Accountability and Responsibilities

9.3.5.14 The service provider should aim to avoid conflicts of interest between staff members' safety responsibilities and their other organizational responsibilities. They should allocate their SMS accountabilities and responsibilities, in a way that minimizes any overlaps and/or gaps.

9.3.6 Appointment of key safety personnel

9.3.6.3 In most organizations, an individual is appointed as the safety manager. Depending on the size, nature and complexity of the organization the safety manager role may be an exclusive function or it may be combined with other duties. Moreover, some organizations may need to allocate the role to a group of persons. The organization must ensure that the option chosen does not result in any conflicts of interest. Where possible, the safety manager should not be directly involved in the product or service delivery but should have a working knowledge of these. The

appointment should also consider potential conflicts of interest with other tasks and functions . Such conflicts of interest could include:

- a) competition for funding (e.g. financial manager being the safety manager);
- b) conflicting priorities for resources; and
- c) where the safety manager has an operational role and their ability to assess the SMS effectiveness of the operational activities they are involved in.

DOC 9734 - SAFETY OVERSIGHT MANUAL
Part A The Establishment And Management Of A State's Safety Oversight System

Chapter 2. Safety Oversight: An Obligation

2.3 State Safety Oversight (SSO) System

2.3.4 When the State is both the regulatory authority and service provider (e.g. an air traffic service (ATS) provider, aerodrome operator, air operator, manufacturer or maintenance organization), the requirements of the Convention will be met, and public interest be best served, by a clear separation of functions and responsibilities between the regulatory authority and the service provider. The approval, certification and continued surveillance procedures should be followed as though the service provider were a non-governmental entity.

3.3 State System And Functions (CE-3)

3.3.2 Staffing requirements

3.3.2.2 All State technical personnel authorized to perform licensing, certification, approval and/or surveillance functions, as applicable, need to possess appropriate credentials (with the empowering legislation indicated) identifying them as technical experts employed by the State authorities, with the right to unlimited and unrestricted access to aircraft, aviation-related documents, aerodromes, ATS and other relevant facilities and the associated inspection powers, as applicable and as provided by the State's primary legislation. They also need to be provided with guidance that addresses ethics, personal conduct and the avoidance of actual or perceived conflicts of interest in the performance of official duties.

3.3.2.5 It is recognized that some States (particularly those where the level of commercial air transport activity is low) may not be in a position to meet their staffing requirements due to a lack of qualified local personnel or the inability to obtain the necessary budgetary allocations. In some States, particularly when the State is also a service provider, personnel from the service provider are designated by the CAA to carry out fundamental CAA inspection functions. Such an arrangement should be avoided as it does not provide independent technical supervision and may lead to perceived or actual conflicts of interest. However, when properly controlled by the CAA, the designation of qualified service provider personnel to assist in some inspection functions can

be acceptable in terms of safety and is generally economically beneficial to both the State and the service provider. In such cases, the designated service provider personnel, when performing their designated duties, need to be kept under the supervisory and technical control of the CAA.

3.3.2.7 Regardless of the arrangements that a State makes, it is in no way relieved of its ultimate responsibility for the safe, regular and efficient conduct of aviation within its jurisdiction. It is essential that agreements or contracts for the enforcement of inspection responsibilities and duties be explicit in their requirements.

3.3.4 Establishment of service providers

3.3.4.1 Whether or not the provision of ANS and/or the operation of aerodromes is vested outside the CAA, States have to ensure effective and independent safety oversight by the CAA in its role as the regulator. A clear separation of functions and responsibilities between the regulatory authority and the service provider needs to be established, including mechanisms to avoid perceived, potential or actual conflicts of interest.

3.3.4.2 The regulatory authority and service providers should not overlap in structure, responsibility or function. In particular, for the regulatory authority to be able to take effective and independent actions, including enforcement action, if necessary, the regulatory authority and service provider should not report to the same higher level management, unless the State can demonstrate that a “functional” separation has robust checks and balances, and there is no possibility of conflict of interest, including when enforcement action is taken.

3.6 Licensing, Certification, Authorization And Approval Obligations (Ce-6)

3.6.1 General considerations

3.6.1.5 Under an effective licensing/certification/approval system, all necessary evaluations are effectively performed by qualified personnel, based on national requirements and following a formal and comprehensive process. This personnel may be from the CAA, or in case not all required specialties and competencies exist within the CAA (as happens frequently in the area of aerodromes), the evaluations may also be performed by external specialists through an appropriate delegation of functions. In such cases, the CAA should formally designate the specialists after verification of their competence and of the absence of possible conflicts of interest. The CAA should also approve the specialists’ working methodologies, define deliverables and validate results of evaluations. The outcomes of the evaluations should be properly documented and recorded, with all the pertinent records and evidence kept by the CAA.

DOC 8335 - MANUAL OF PROCEDURES FOR OPERATIONS INSPECTION, CERTIFICATION AND CONTINUED SURVEILLANCE
--

5.3 Staffing

5.3.3 A State that is unable to provide sufficient staff for its operations inspectorate could arrange for experienced personnel of an operator to be seconded to the CAA to act as CAA

inspectors. In this case, a strategy to mitigate potential conflict of interest issues should be established and documented. However, it may be impossible to ensure that an inspector in such a case would not be involved in inspections concerning the operator from which the secondment was effected. It is still incumbent upon the DGCA to ensure that operator personnel, seconded as CAA inspectors, are adequately trained and qualified and subsequently supervised in the carrying out of their duties.

DOC 9379 - MANUAL OF PROCEDURES FOR ESTABLISHMENT AND MANAGEMENT OF A STATE'S PERSONNEL LICENSING SYSTEM

PART I – General Principle and Organization

Appendix A To Part I:

Examples of Job Responsibilities and Qualifications for Key Personnel Positions

3. Examiner (Inspector or Technical Subject Matter Expert but excluding Medical Examiners)

Qualifications:

3d) have no personal or professional conflicts of interest with the examination function;

4. Examination Supervisor (Proctor)

Qualifications:

f) have no personal or professional conflicts of interest with his or her examination supervision function;

PART II - Procedures

Chapter 5 - Examining Principles

5.2 Theoretical knowledge examinations

5.2.3 Examination design and development

5.2.3.9 External question writers or moderators should have no potential conflicts of interest; for example, they should not be associated with any training organization or with persons intending to sit an examination. Precautions should also be taken not to compromise the security of examinations or questions worked on outside the Licensing Authority. Questions lost, mislaid or stolen are considered to be compromised and should be withdrawn from use.

5.4 Qualifications for Examiners

5.4.2 Whether they are responsible for theoretical examinations or practical tests, they must be experienced and current practitioners in their specialist area and have a strong background in training and assessment. Their requirement for the prescribed standard of performance from personnel being tested should not be in doubt. They should also have no professional or personal conflicts of interest with their examining function.

**DOC 10070 - MANUAL ON THE COMPETENCE OF CIVIL AVIATION SAFETY
INSPECTORS (FIRST EDITION (ADVANCE UNEDITED) — 2016**

Changing business models (Page 1-8)

In order to compensate for a shortage of locally qualified people or the inability to acquire sufficient budgetary funding allocations, States may need to consider changing their own business model. For example, they may augment the core group of CASIs with designated personnel trained and qualified to perform inspection/audit duties that are acquired through consignment agreements with other States or selected aviation service providers. In these instances, States must take special precautions to mitigate any likelihood of conflicts-of-interest when assigning inspection duties to temporary employees coming from organizations outside of the CAA. Regardless of the circumstances surrounding the CAA's level of funding or staffing, the State continues to assume full responsibility for meeting its safety obligations enshrined in the Chicago Convention and its Annexes. (Page 1-9)

B. SECURITY

ANNEX 17 - SECURITY

3.4 Quality control and qualifications

3.4.7 Each Contracting State shall ensure that the management, setting of priorities and organization of the national civil aviation security quality control programme shall be undertaken independently from the entities and persons responsible for the implementation of the measures taken under the national civil aviation security programme. Each Contracting State shall also:

- a) ensure that the personnel carrying out security audits, tests, surveys and inspections are trained to appropriate standards for these tasks in accordance with the national civil aviation security programme;
- b) ensure that the personnel carrying out security audits, tests, surveys and inspections are afforded the necessary authority to obtain information to carry out these tasks and to enforce corrective actions;
- c) supplement the national civil aviation security quality control programme by establishing a confidential reporting system for analysing security information provided by sources such as passengers, crew and ground personnel; and
- d) establish a process to record and analyse the results of the national civil aviation security quality control programme, to contribute to the effective development and implementation of the national civil aviation security programme, including identifying the causes and patterns of non-compliance and verifying that corrective actions have been implemented and sustained.

DOC 10047 - AVIATION SECURITY OVERSIGHT MANUAL**2.4 Government Approach To Control And Supervision****2.4.2 Characteristics of an effective State aviation security oversight system**

2.4.2.3 It is equally important that an independent oversight infrastructure provide close governmental control and supervision where security functions are performed directly by civil service staff. This poses a challenge in States where the State is both the regulatory authority and an airport operator, aircraft operator, ATSP or other service provider or operator. In order to avoid any potential conflict of interest, there should be a clear separation of authority and responsibility between the State regulatory authority and any State-run operator or service provider. All approval, certification and continued surveillance procedures should be followed as though the operating agency was a non-government entity.

3.4 State Appropriate Authority for Aviation Security and Its Responsibilities (Ce-3)**3.4.2 Staffing requirements**

3.4.2.5 Persons and entities responsible for the management, setting of priorities and organization of the NQCP should operate independently from persons and entities responsible for the implementation of measures under the NCASP, to avoid the perception of conflict of interest, and to ensure that designated personnel who perform aviation security oversight functions are, in turn, also subject to surveillance.

**DOC 9807 – UNIVERSAL SECURITY AUDIT PROGRAMME
CONTINUOUS MONITORING MANUAL****2.4 Auditing principles**

2.4.1 The following auditing principles apply to USAP-CMA activities, in accordance with *ISO 19011:2011 — Guidelines for Auditing Management Systems*.

(e) **Independence:** the basis for the impartiality of the audit and objectivity of the audit conclusions. Auditors should be independent of the activity being audited and should in all cases act in a manner that is free from bias and conflict of interest. Auditors should maintain objectivity throughout the audit process to ensure that the audit findings and conclusions are based only on the audit evidence.

APPENDIX D – ICAO CODE OF CONDUCT FOR AUDITORS

23. Conflicts of interest may occur when an international civil servant's personal interests interfere with the performance of his/her official duties or call into question the qualities of integrity, independence and impartiality required the status of an international civil servant. Conflicts of interest include circumstances in which international civil servants, directly or indirectly, may benefit improperly, or allow a third party to benefit improperly, from their association with their organization. Conflicts of interest can arise from an international civil servant's personal or familial dealings with third parties, individuals, beneficiaries, or other institutions. If a conflict of interest or possible conflict of interest does arise, the conflict shall be disclosed, addressed and resolved in the best interest of the organization. Questions entailing a conflict of interest can be very sensitive and need to be treated with care.

C. AERONAUTICAL CHARTS

DOC 8697 - AERONAUTICAL CHART MANUAL

1.5 Relations with other States

1.5.2 If responsibility [for the provision of aviation cartographic services] is delegated to an agency, it is very desirable that such agency should at least have an adequate technical background and preferably be one engaged in or allied to civil aviation. Where such background is lacking, the need for close coordination and liaison increases. An agency may be appointed to cover the whole or any part of the aeronautical charting programme and here again the responsibilities delegated should be clearly defined.

D. CHARGES FOR AIRPORTS AND AIR NAVIGATION SERVICES

DOC 9082 - ICAO POLICIES OF CHARGES FOR AIRPORTS AND AIR NAVIGATION SERVICES

Section I. General

Economic oversight

12. States' exercise of their economic oversight responsibilities should be clearly separated from the operation and provision of airports and air navigation services, with roles and powers clearly defined for each function.

E. AIRPORT ECONOMICS

DOC 9562 - AIRPORT ECONOMICS MANUAL

Chapter 2 - Ownership, Control And Governance Of Airports

B — Government Ownership And Control

2.7 When a government plays both the role of regulator (i.e. performing its economic oversight function) and service provider, it should consider a clear separation of the regulatory and operational functions, with roles and powers clearly defined for each function as recommended in ICAO's policies on charges in Doc 9082 (Section I, paragraph 12). This is because too close a relationship between the regulator and the service provider can result in conflicts of interest and undermine public confidence and trust in the adequacy of the system, and because overlaps in the regulatory and operational functions may lead to diffuse accountability relationships within the entity. Separation enhances transparency in the decision-making process and makes clear the lines of accountability and the authority of one branch to monitor the activities of the other.

F. ACCIDENT INVESTIGATION

DOC 9756 - MANUAL OF AIRCRAFT ACCIDENT AND INCIDENT INVESTIGATION (Part 1 – Organization And Planning)

The Accident Investigation Authority

2.1 Structure

2.1.1 In conformity with Article 26 of the Convention on International Civil Aviation, it is incumbent on the State in which an aircraft accident occurs to institute an inquiry into the circumstances of the accident. This obligation can be met only when appropriate legislation on aircraft accident investigation is in place. Such legislation shall make provision for the establishment of an accident investigation authority (or commission, board or other body) for the investigation of aircraft accidents and incidents that is independent from State aviation authorities and other entities that could interfere with the conduct or objectivity of an investigation.

2.1.2 The accident investigation authority must be strictly objective and totally impartial and must also be perceived to be so. The authority should be established in such a way that it can withstand political or other interference or pressure. Many States have achieved this objective by setting up their accident investigation authority as an independent statutory body or by establishing an accident investigation organization that is separate from the civil aviation administration. In these States, the accident investigation authority reports directly to Congress, Parliament or a ministerial level of government (see Figure I-2-1 and Figure I-2-2 as examples).

DOC 9962 - MANUAL ON ACCIDENT AND INCIDENT INVESTIGATION POLICIES AND PROCEDURES

3.2 Independence

3.2.1 Maintaining independence in the conduct of investigations will result in enhancing the credibility of the [Investigation Authority] and its ability to avoid situations that have the potential to create conflicts of interest. Maintaining independence of the investigation function is equally important for accident and incident investigations.

3.2.2 The intent of “independence” is that the [Investigation Authority] shall be functionally independent, in particular of the national civil aviation authorities responsible for airworthiness, certification, flight operation, maintenance, licensing, air traffic control or airport operation and, in general, of any other party whose interests could conflict with the task entrusted to the investigation authority.

3.2.3 “Independence” does not mean that the [Investigation Authority] would not be administratively supervised and accountable to a governmental minister or ministry (or parliament) for its finances, administration, policies and working methods (which should be transparent).

4.2 The Selection and Appointment of Investigators

4.2.5 The use of outside expertise is accomplished by written contracts and/or MoUs which include provisions to ensure that the seconded individuals are relieved of their regular duties during the course of the investigation. Their independence and objectivity in the investigation work is essential, and it is important to ensure there are no real or perceived conflicts of interest on the parts of seconded individuals. Seconded investigators should be given proper credentials and should sign written agreements to comply with [Name of State] laws, regulations, policies and procedures, and to demonstrate their independence and objectivity, and that there are no conflicts of interest during the period of the secondment.

5.5 Delegation of the Investigation (In whole or in part)

5.5.2 For occurrences in which [Name of State] is the State of Occurrence, and involving aircraft operated, registered, designed and/or manufactured by other State(s), the [Investigation Authority] may consider delegating the whole or parts of the investigation to an aircraft accident investigation authority in another State or to an RAIO, in order to facilitate a timely investigation. For example, for aircraft component examinations that must be conducted at facilities outside of [Name of State], the [Investigation Authority] may delegate the oversight of the examinations to the accident investigation authority in another State. Whenever possible, the facility should not be the manufacturer, in order to avoid a real or perceived conflict of interest. However, there may be times when the only appropriate expertise or tooling will be at the manufacturer’s facility, so it will be necessary to ensure investigator supervision of the work. Until the [Investigation Authority] establishes its own flight recorder laboratory, replay and analysis for recorders should be conducted in the facilities of other States with recorder read-out capabilities, in accordance with guidance provided in ICAO Annex 13, Attachment D, Guidelines for Flight Recorder Read-out and Analysis.

Investigation Policies and Procedures

6.1 General

6.1.9 Should the recorders sustain damage in such a way that they cannot readily be read out at the chosen facility, or are of a type that requires additional expertise or equipment (such as Russian-built flight recorders), the [Investigation Authority] should seek expert assistance consistent with the provisions of ICAO Annex 13. In some cases, the recorder may need to be taken to its manufacturer for read-out. In such cases, the work should normally be supervised by a [Investigation Authority] investigator, or an investigator from another State to ensure that there is no real or perceived conflict of interest.

9.1 Laboratory Testing of Aircraft Systems and Components

9.1.2 Specialist examinations may range from a scanning electron microscope (SEM) examination of a failed part to chemical analysis, and/or aircraft systems testing or flight testing. Laboratory examination and testing generally entail the use of specialized equipment not available at the accident site and are often beyond the capability of an aircraft maintenance facility. Consideration should be given to using the component manufacturer's facilities where specialized equipment and trained personnel are readily available. However, this should require close supervision by the [Investigation Authority] investigators, or by investigators designated by the [Investigation Authority] to ensure that there is no real or perceived conflict of interest. All activities, particularly disassembly and testing phases, should be documented and photographed for evidence purposes.

APPENDIX 1

A39-8: Conflicts of interest in civil aviation

Recognizing that conflicts of interest may hamper effective, independent and impartial safety regulation of civil aviation and thereby pose risks to the safety and security of international civil aviation;

Acknowledging the need for and the benefits of drawing upon the experience and expertise of qualified industry personnel to help ensure that important regulatory oversight functions can be provided;

Recalling that the item “Consideration of Guidance on Conflicts of Interest” was added to the General Work Programme of the Legal Committee by the 37th Session of the Assembly and subsequently was endorsed by the Legal Committee, the Council and the 38th Session of the Assembly, which elevated its priority;

Aware that under the United Nations Convention Against Corruption adopted by the General Assembly on 31 October 2003, States have the obligation to endeavour to adopt, maintain and strengthen systems that promote transparency and prevent conflicts of interest;

Considering that Annex 19 — Safety Management and ICAO guidance material identify the need for States inter alia to establish a strategy to mitigate potential issues arising from conflicts of interest in civil aviation; and

Convinced of the need for States to share information concerning policies and measures used to detect, avoid, mitigate and manage conflicts of interest in civil aviation;

The Assembly:

1. *Urges* States which have not done so to consider establishing a formal legal framework to detect, avoid, mitigate and manage conflicts of interest in civil aviation;

2. *Invites* States:

a) to examine at the national level the adequacy of their domestic legal regimes on measures and practices to detect, avoid, mitigate and manage conflicts of interest in civil aviation, with a view to ensuring and improving transparency and accountability in civil aviation regulatory activities and to balancing their particular circumstances and ability to fulfil their oversight obligations with addressing the risks to aviation safety and security posed by conflicts of interest; and

A39-8: Cont'd

b) where necessary, to enact legislation and establish systems, codes and practices which promote the awareness of potential conflicts of interest in civil aviation;

3. *Urges* States to ensure the enforcement of rules and measures to detect, avoid, mitigate and manage conflicts of interest relating to safety oversight in civil aviation;

4. *Mandates* the Council to facilitate the collection, analysis, dissemination and promotion of best practices addressing conflicts of interest for the benefit of Member States, taking advantage of existing expertise in the States and within the United Nations and other relevant international organizations;

5. *Requests* the Secretary General to continue to collect information from States and relevant intergovernmental organizations, concerning policies and measures used to detect, avoid, mitigate and manage conflicts of interest in civil aviation, in order to advance the study of this issue;

6. *Requests* the Secretary General to develop a reference document identifying all provisions in the Annexes and manuals relating to conflicts of interest;

7. *Mandates* the Legal Committee to keep the issue of conflicts of interests in civil aviation under regular review; and

8. *Calls upon* States to extend to the Secretary General their full support and assistance in the implementation of the present resolution, including the provision of expertise and information.
