RO 1  In order to perform flights with civil aircraft registered in another State for the carriage of dangerous goods, an authorization is required. This authorization may be given either by the Ministry of Transport and Infrastructure, or by the Romanian Civil Aeronautical Authority (RCAA), as the case may be, upon receipt of the advice of the Romanian Ministry of Defence.

The application to obtain the flight authorization and advice provided for must be submitted to the RCAA at least ten (10) working days before the date of flight and it must contain all relevant information and documents mentioned in the form shown in the Romanian AIP page GEN 1.2-12.

Upon request, a copy of the certificate issued by the appropriate authority of the State of Registry of the air operator proving that it is entitled to carry dangerous goods must also be attached to the application.
Provided the period of submission of an application in accordance with RO 1 above is met, the passenger and/or cargo scheduled air operators may be granted, upon request, a flight authorization (including Ministry of Defence advice) for the carriage of dangerous goods included in Class 2, 3 (except liquid desensitized explosives, UN Nos. 1204, 2059, 3064, 3343, 3357 and 3379), 4, 5, 6 (except infectious substances, Division 6.2, compatibility group A, UN No. 2814, 2900), 8 or 9. The flight authorization/advice must be valid for limited periods of time and/or the schedule of operation, provided the following requirements are met:

a) submission by the air operator, before starting the respective schedule of operation, of the following documents edited either in the English language or in the Romanian language:

— copy of the AOC and its operating specifications;
— copy of the certificate issued by the competent authority of the State of Registry of the air operator proving that it is entitled to carry dangerous goods;
— copy of the training programme for dangerous goods in the Operations Manual, Part D, or any other similar document referring to training, as approved by the aeronautical authority of the State of Registry of the air operator.

b) submission to RCAA of a notification twelve (12) hours before departure of aircraft of the details about the dangerous goods to be carried: class or division, UN number, proper shipping name, applicable packing instructions, type of package, weight of package, number of packages.

Civil aircraft involved in the carriage of dangerous goods that are forbidden for air transport under normal circumstances, in accordance with the ICAO documents, are not allowed to perform flights within the Romanian air space.

Waivers from the provisions may be granted by the Romanian Civil Aeronautical Authority only if the respective transport is justified by a major public interest. Such a waiver must be granted with the approval of the Ministry of Transport and Infrastructure.

In case the consignment contains radioactive materials, the air operator must provide to the Romanian Civil Aeronautical Authority a copy of the authorization issued by the National Commission for Nuclear Activities Control (CNCAN).

The contact information of the National Commission for Nuclear Activities Control is as follows:

B-dul. Libertatii, Nr. 14, Sector 5
Bucuresti, Romania
