Be aware! Get ready!
ICAOn compliance date: 5 November 2020
The new ICAO methodology for assessing and reporting runway surface conditions, commonly known as the Global Reporting Format (GRF), enables the harmonized assessment and reporting of runway surface conditions and a correspondingly improved flight crew assessment of take-off and landing performance.

The 5 November 2020 applicability date for the GRF is fast approaching. In partnership with key international organisations ICAO is supporting its Member States and stakeholders as they start their planning.

Various activities are being conducted to raise awareness and support deployment of the GRF, including a series of regional seminars. For information see the ICAO GRF web page.

Training Courses:
Relevant courses are being developed with ICAO partners, under the Global Aviation Training (GAT) and TRAINAIR PLUS Programme:

- ICAO-ACI Global Reporting Format (GRF) - online course for airport operations staff
- ICAO-IATA Introduction to the Global Reporting Format (GRF) for Runway Surface Conditions - online course for aircraft operators and flight crew
- ICAO-IATA-CANSO Introduction to the Global Reporting Format (GRF) for Runway Surface Conditions for air navigation service providers and air traffic services personnel (under development)
