GLOBAL STRATEGY AND ACTION PLAN FOR THE IMPROVEMENT OF REGIONAL SAFETY OVERSIGHT ORGANIZATIONS (RSOOs) AND THE ESTABLISHMENT OF A GLOBAL SYSTEM FOR THE PROVISION OF SAFETY OVERSIGHT

1. CONTEXT

1.1 The participants at the Global Forum on Regional Safety Oversight Organizations (RSOOs) for Global Aviation Safety, held in Swaziland from 22 to 24 March 2017, supported a proposed global strategy and action plan for the improvement of RSOOs and the establishment of a global system for the provision of safety oversight.

1.2 In doing so, the Forum took note of the outcomes and recommendations of previous ICAO meetings on RSOOs, including the Symposium on RSOOs, held in 2011, and the Second High-level Safety Conference, held in 2015. The Forum also noted Resolution A39-14, adopted by the ICAO Assembly in 2016.

1.3 Assembly Resolution A39-14, in particular, encourages ICAO Member States to foster the creation of regional or sub-regional partnerships to collaborate on the development of solutions to common problems to build State safety oversight capability, and to participate in, or provide tangible support for, the strengthening and furtherance of sub-regional and regional aviation safety, and safety oversight bodies, including RSOOs.

1.4 The Forum acknowledged that over the last decade, the number and importance of RSOOs have been expanding. Presently, there are seventeen RSOOs, ranging from relatively informal safety oversight bodies that offer advisory services to their Member States to more formally institutionalized organizations that carry out safety oversight tasks and functions through formal delegation by their States.

1.5 The proposed strategy and action plan for the improvement of RSOOs, and the establishment of a global system for the provision of safety oversight was supported by the discussions at the Forum on potential solutions to many of the challenges faced by RSOOs, foremost of which is the need to ensure their sustainable funding and adequate empowerment, with respect to the tasks and functions they carry out for their members. The strategy and action plan seek to put in place solutions that will enhance the effectiveness of the existing RSOOs, as well as to better align them with the global and regional programmes of ICAO.

1.6 At the same time, there is a need for safety oversight to meet the challenges posed by growing air traffic, which is expected to double over the next fifteen years, and changing aircraft ownership, registration and user business models. To this end, the Forum reached agreement on the need to go beyond the current prevailing concept of national- and regional-based safety oversight systems to a globally based system that would be composed of a range of safety oversight providers, including the RSOOs. RSOOs will be recognized as an integral part of a global aviation safety oversight system led by ICAO, within the framework of the Global Aviation Safety Plan (GASP), and maintaining the States’ obligation and responsibility for safety oversight under the Convention on International Civil Aviation.
1.7 Improving the performance of RSOOs also entails strengthening cooperation and information sharing between RSOOs, and establishing a cooperative platform for this purpose.

2. STRATEGIC OBJECTIVES

2.1 The proposed strategy supported by the Forum consists of the following three objectives:

a) to improve and strengthen the RSOOs’ capacity to carry out safety oversight tasks and functions on behalf of their Member States and to actively contribute to ICAO’s global and regional programmes and activities;

b) to implement a global system for the provision of safety oversight that improves the efficiencies of current safety oversight programmes and enables the continuous monitoring of a State’s safety oversight in a more effective and coordinated manner; and

c) to establish an RSOO cooperative platform aimed at bringing RSOOs together to exchange best practices, share and collaborate on the development of manuals and checklists, cooperate on providing technical assistance and assist ICAO in related provisions development and global programme implementation.

3. IMPROVEMENT AND STRENGTHENING OF RSOOS

3.1 An evaluation of RSOOs in general will be conducted in order to update information on major challenges faced in relation to their improvement. In addition, and upon request, a more in-depth gap analysis can be conducted on an individual RSOO in order to determine the actions that need to be taken for strengthening it. For the purpose of carrying out both the evaluation and the gap analysis, the following five criteria have been defined:

a) **Relevance**: This will assess the RSOO’s mission, goals, programmes and activities, and their alignment with those of its Member States or donors as well as ICAO. Is the RSOO meeting the expectations and needs of its Member States and stakeholders, and is it well integrated into the strategic plans and programmes of its Member States?

b) **Effectiveness**: This will assess the extent to which an RSOO is able to meet its goals and objectives. Is the RSOO sufficiently empowered to carry out its mission? Has it been given international legal personality that enables it to establish agreements and working arrangements with other international organizations (including ICAO) and third-party States? Have formal delegations of authority been established that will enable the RSOO to carry out safety oversight duties and functions on behalf of its Member States? Have common standards and practices been established in the region? Is the RSOO sufficiently resourced to enable it to meet its programmed activities?
c) **Efficiency:** This will assess the use of human and financial resources, and make a comparison of the RSOO’s outputs and the costs incurred. Unnecessary overlap and duplication of programmes and activities between the RSOO and its member States, ICAO and other international organizations are to be avoided.

d) **Sustainability:** This will assess the long-term viability of the RSOO, particularly in respect to legal authority, human resources and financial viability and sustainability. How effective is the management of the RSOO in terms of the organization’s strategic development and quality assurance? Has a mechanism been established for the sustainable funding of the RSOO?

e) **Adaptability:** This will assess the ability of the RSOO to adapt to an evolving environment, brought about by a rapidly expanding aviation industry, changing technologies, scope and processes.

3.2 All gap analyses of individual RSOOs will be conducted on a cost recovery basis.

3.3 Integral to the strengthening and improvement of RSOOs will be the establishment of an RSOO cooperative platform. The RSOO platform will interface with ICAO, facilitate the supply of technical assistance and support to RSOOs and provide RSOOs with a common pool of experts. In general, it will greatly enhance cooperation between RSOOs by enabling the exchange of information and sharing of best practices. Any RSOO recognized by ICAO or having a clear roadmap towards ICAO evaluation may become part of the cooperative platform.

4. **DEVELOPMENT AND IMPLEMENTATION OF AN ICAO GLOBAL AVIATION SAFETY OVERSIGHT SYSTEM**

4.1 The primary objective of the global aviation safety oversight system is the implementation of an enhanced safety oversight model that resolves the challenges faced by current regional- and national-based models, caters for future challenges posed by a rapidly expanding air transport industry and offers practical and affordable options in the area of safety oversight.

4.2 Under the global aviation safety oversight system, an ICAO recognized safety oversight provider will be any international, regional or sub-regional aviation safety oversight body that carries out tasks and functions on behalf of a State or group of States. Suitably empowered and strengthened RSOOs and other State safety oversight providers will constitute the building blocks of a global safety oversight system.

4.3 On a voluntary basis, safety oversight providers may request recognition from ICAO in respect to competencies to carry out the specific tasks and functions. Each task and function will be mapped to a USOAP CMA protocol question (PQ) or set of PQs. A safety oversight provider may receive several levels of recognition for various tasks and functions.

4.4 The following three levels are defined, based on the complexity of tasks and functions performed:
• **Level 1** – advisory and coordinating tasks and functions

• **Level 2** – operational assistance tasks and functions

• **Level 3** – certifying agency tasks and functions

4.5 For Level 1 and 2 tasks and functions, ICAO recognition will be based on an initial assessment to evaluate the capabilities of the provider.

4.6 For a provider to receive ICAO recognition for Level 3 tasks and functions, it will have to first undergo an activity under the ICAO USOAP CMA.

4.7 ICAO recognition will be renewed at a determined frequency, on the basis of a re-assessment for Levels 1 and 2, and will depend on USOAP CMA results for Level 3.

4.8 All ICAO recognized safety oversight providers will have to demonstrate competence in the tasks and functions that they provide, in order to qualify for ICAO recognition, and ICAO will maintain an inventory of competent safety oversight providers and the tasks and functions that they provide. An ICAO recognized safety oversight provider could include the civil aviation authority of a State that provides assistance to another State, or an RSOO that carries out safety oversight tasks and functions.

5. **PROPOSED RSOO COOPERATIVE PLATFORM**

5.1 A Platform will be established to facilitate greater cooperation between RSOOs. The detailed objectives of this Platform are to:

a) facilitate inter-RSOO communication;

b) become an information hub and facilitate the exchange of information and sharing of best practices, including the establishment of common or harmonized definitions, standards and specifications relevant to RSOOs;

c) facilitate the exchange of data and common data analysis;

d) facilitate the supply of technical assistance and support to RSOO;

e) interface with ICAO on topics of mutual interest for RSOO;

f) receive tasks from ICAO that concern development of the RSOO community;

g) provide an RSOO pool of experts; and

h) nurture the continued stability and progression of RSOO.

5.2 Any RSOO may become part of the cooperative platform. Consideration shall be given to supporting other regional mechanisms in development towards becoming an RSOO.
5.3 The interim Platform should progressively and initially:

a) develop terms of reference describing its tasks and governance scheme;

b) organize regular meetings among and between RSOOs, adjacent to other relevant forums; and

c) develop a web-based application and other tools to support this.

5.4 It should also study the outcomes of the 2017 RSOO Forum to determine, in coordination with ICAO, where it could provide support in the follow up of the actions in strengthening RSOOs. The nature of tasks should be expanded progressively; overlaps with existing ICAO, regional or State activities is to be avoided.

5.5 The resources necessary should be supported by contributions by the RSOOs or their member States as well as ICAO Voluntary Funds. Additional forms of funding should be further explored.

5.6 The Platform’s secretariat, as addressed by the terms of reference, should regularly report to its members as well as the ICAO Secretariat and may be reported on to the ICAO governing bodies through existing reporting mechanisms regarding its activities and the actions undertaken. The Platform will not replace the representation of the RSOO member States to ICAO. It will cooperate closely with the State representatives to ICAO in order to coordinate positions.
**PROPOSED ACTION PLAN FOR THE IMPROVEMENT OF REGIONAL SAFETY OVERSIGHT ORGANIZATIONS (RSOOs) AND THE ESTABLISHMENT OF A GLOBAL SYSTEM FOR THE PROVISION OF SAFETY OVERSIGHT**
