

NOTAM Criticality

Parameters

Name	Description
------	-------------

api_key	API key for the request
----------------	-------------------------

format	Output format for the result, may be csv or json (default)
---------------	--

notam	NOTAM body message text or pipe-separated () list of up to 10 such texts
--------------	---

callback	If set, Specifies JSONP as return format (for website integrations only). If format is different from JSON, data will be encapsulated in an object. Optional.
-----------------	---

Output

Field	Type	Description
-------	------	-------------

notam	string	Message body text of the NOTAM
--------------	--------	--------------------------------

criticality	number	The criticality level of the NOTAM as assessed by NORM. Criticality is a number between 0 (garbage) and 4 (critical)
--------------------	--------	--
