

Masaki Takeuchi

He has 16-year experience as an architectural engineer of Narita International Airport, Tokyo, Japan, and has obtained wide range of knowledge and expertise in airport planning, management, and operations.

He had been responsible for airport planning and passenger terminal development/refurbishment projects including the development of brand-new low-cost terminal (T3).

After attaining an MBA degree at Claremont Graduate University in the US in 2020, he had led several consulting projects for a brown field airport development project in Southeast Asia as the company's international business for five years.

Currently, as a Manager of Facilities Planning in Airport Planning Department, he has been responsible for formulating the Airport Master Plan of "Second Opening of NRT" program including the planning of the brand-new consolidated passenger terminal.
