

---

Mr. BATZAYA Tserenjav currently serves as Head of the Information Security Division at the Passenger Information Unit under the General Authority for Border Protection of Mongolia. He holds a degree in Software Engineering from the Mongolian National University (2006) and later earned a Law degree from the same university in 2021.

---

With nearly two decades of professional experience in national security and cybersecurity, Mr. Batzaya has held various key technical and leadership positions at the General Intelligence Agency and other government institutions. His areas of expertise include network and information security, cyber threat monitoring, and the protection of classified state data.

He played a central role in the development and implementation of the “GoTravel” system - an integrated platform designed to enhance cross-border passenger information management in alignment with the United Nations Counter-Terrorism Program. His contributions have been pivotal in advancing Mongolia’s digital border security and inter-agency cooperation on data-driven risk assessment.

Today, Mr. Batzaya continues to lead strategic initiatives focused on improving the country’s cybersecurity resilience and ensuring secure ICT infrastructure in support of border operations.
