Ref. T 3/10.1, T 3/4.14, T 3/15.1 – AP071/20 (ATM)

13 March 2020

Subject: COVID-19 Contingency Measures

Action required: To note and take action as appropriate

Sir/Madam,

As the World Health Organization (WHO) has declared the COVID-19 outbreak to be a pandemic on 11 March 2020 and noting the ICAO-WHO Joint Statement (**Attachment A**), I wish to recall:

- the provisions of Annex 11 and Annex 14 regarding Air Traffic Management (ATM) and aerodrome contingency planning;
- recent Conclusions of the Seventh Meeting of the Air Traffic Management Sub-Group (ATM/SG/7) of APANPIRG (05 - 09 August 2019, Bangkok, Thailand), with respect to Regional ATM Contingency Planning; and
- requirements of the Regional Air Navigation Plan Volume II with respect to ATM contingency capability reporting.

ICAO Standards and Recommended Practices

For ease of reference, the relevant provisions from Annex 11, Annex 14 and ICAO Doc. 4444 – *Procedures for Air Navigation Services Airt Traffic Management* (PANS-ATM) are reproduced as **Appendix 1** and **Appendix 2**. Specifically, States must have special arrangements in place to manage a public health emergency, and the State's contingency arrangements should be integrated into national disaster management plans.

Apart from the provisions already highlighted, States should note **Figure 1**, which indicates the Collaborative Arrangement for the Prevention and Management of Public Health Events in Civil Aviation (CAPSCA) document framework for the management of events such as pandemics.

2/...

Figure 1: CAPSCA Framework

State Actions

Therefore, in light of the COVID-19 pandemic, States should take the following actions:

1. regulators and Air Navigation Service Providers (ANSPs) should review the national ATM contingency plan and ATM procedures with respect to compliance with Annex 11, PANS ATM, and the Regional ATM Contingency Plan's provisions – especially those related to a protecting a workforce which may be affected by COVID-19* and critical services that need to be temporarily delegated to other units or States;

*For example, States should limit the sharing of the same space by critical operations personnel and develop capability to manage reduced manpower situations, including remote systems.

2. provide an update, by **01 April 2020**, on your contingency capability through a report using the Regional ATM Contingency Plan Monitoring and Reporting Form appended as **Attachment B** to the Regional Office, so ICAO is aware of the State's current planning and status;

Note 1: this request had previously been made to South and Southeast Asian States in State Letter Ref.: T 3/8.12, T 3/8.13 – AP107/19 (ATM) dated 19 September 2019.

Note 2: the Form should be sent electronically to pchalayonnawin@icao.int.

3. limit, as much as feasible in the short-term while the COVID-19 pandemic is continuing, any major changes to ATM, aerodrome, aeronautical meteorology (MET), Communications, Navigation and Surveillance (CNS) and security systems that may place extra pressure on airlines, which may have limited workforces and resources at this time;

Note: an area to consider is the need to limit, as far as feasible, information provided under the Aeronautical Information Regulation and Control (AIRAC) system to avoid overwhelming airlines and so all changes can be implemented in the downstream process, despite the potential consequences of COVID-19.

4. aerodrome operators should review Aerodrome Emergency Plans (AEPs) with respect to compliance with Annex 14, Volume I SARPs, so as to prepare for the increased risk of travellers or cargo spreading COVID-19 through air transport, severe outbreak of COVID-19 affecting aerodrome staff and other public health emergency scenarios;
5. update as necessary –
 - a. the State Aviation Activity Questionnaire (SAAQ) Part 0 information related to public health contacts (*Has the State identified a clear contact point at national aviation level, with identified individual(s), for policy formulation, operational organization of preparedness and coordination of a national plan in order to respond to a communicable disease with the potential to pose a serious public health risk?*); and
 - b. the attached ATM Points of Contact List (**Attachment C**); and

Note: the Form should be sent electronically to pchalayonnawin@icao.int.

6. ensure that States have plans for the safe and gradual recovery of normal operations.

ATM Conclusions

In 2019, the ATM/SG/7 agreed to the following relevant Conclusions:

Conclusion ATM/SG/7-6: ATM Emergency and Contingency Response Planning

That, Asia/Pacific States are urged to ensure through regulatory oversight mechanisms that all operational positions at ATS units have ready access to information to respond to emergency and contingency situations.

Conclusion ATM/SG/7-7: Amendment to the Regional ATM Contingency Plan

That:

1. *The Proposal for Amendment at Appendix G to the Report be incorporated in the Regional ATM Contingency Plan; and*
2. *States ensure their contingency plans include the new elements of the Plan.*

States should recall that the *Regional ATM Contingency Plan* and associated contingency templates are available on the ICAO Asia and Pacific Regional Office website under APAC Electronic Documents/ATM/Contingency at:

<https://www.icao.int/APAC/Pages/eDocs.aspx>

Accordingly, States are requested to take urgent note of the contingency actions expected of States and to take action as appropriate.

Yours sincerely,

Arun Mishra
Regional Director

Enclosures:

- A – Joint Statement on COVID-19
- B – Regional ATM Contingency Plan Monitoring and Reporting Form
- C – ATM Points of Contact List

Appendix 1 – Annex 11 and PANS ATM Excerpts

Annex 11

2.32 Contingency arrangements

Air traffic services authorities shall develop and promulgate contingency plans for implementation in the event of disruption, or potential disruption, of air traffic services and related supporting services in the airspace for which they are responsible for the provision of such services. Such contingency plans shall be developed with the assistance of ICAO as necessary, in close coordination with the air traffic services authorities responsible for the provision of services in adjacent portions of airspace and with airspace users concerned.

Note 1.— Guidance material relating to the development, promulgation and implementation of contingency plans is contained in Attachment C.

Note 2.— Contingency plans may constitute a temporary deviation from the approved regional air navigation plans; such deviations are approved, as necessary, by the President of the ICAO Council on behalf of the Council.

Annex 11, Appendix C, paragraph 4.2 b):

b) assessment of risk to civil air traffic due to military conflict or acts of unlawful interference with civil aviation as well as a review of the likelihood and possible consequences of natural disasters or public health emergencies. Preparatory action should include initial development of special contingency plans in respect of natural disasters, public health emergencies, military conflicts or acts of unlawful interference with civil aviation that are likely to affect the availability of airspace for civil aircraft operations and/or the provision of air traffic services and supporting services.

It should be recognized that avoidance of particular portions of airspace on short notice will require special efforts by States responsible for adjacent portions of airspace and by international aircraft operators with regard to planning of alternative routings and services, and the air traffic services authorities of States should therefore, as far as practicable, endeavour to anticipate the need for such alternative actions;

Doc. 4444 – Procedures for Air Navigation Services Air Traffic Management (PANS-ATM)

16.6.1 The flight crew of an en-route aircraft shall, upon identifying a suspected case(s) of communicable disease, or other public health risk, on board the aircraft, promptly notify the ATS unit with which the pilot is communicating, the information listed below:

- a) aircraft identification;*
- b) departure aerodrome;*
- c) destination aerodrome;*
- d) estimated time of arrival;*
- e) number of persons on board;*
- f) number of suspected case(s) on board; and*
- g) nature of the public health risk, if known.*

16.6.2 The ATS unit, upon receipt of information from a pilot regarding suspected case(s) of communicable disease, or other public health risk, on board the aircraft, shall forward a message as soon as possible to the ATS unit serving the destination/departure, unless procedures exist to notify the appropriate authority designated by the State and the aircraft operator or its designated representative.

16.6.3 When a report of a suspected case(s) of communicable disease, or other public health risk, on board an aircraft is received by an ATS unit serving the destination/departure, from another ATS unit or from an aircraft or an aircraft operator, the unit concerned shall forward a message as soon as possible to the public health authority (PHA) or the appropriate authority designated by the State as well as the aircraft operator or its designated representative, and the aerodrome authority.

Note 1.— See Annex 9 — Facilitation, Chapter 1 (Definitions), Chapter 8, 8.12 and 8.15, and Appendix 1, for relevant additional information related to the subject of communicable disease and public health risk on board an aircraft.

Note 2.— The PHA is expected to contact the airline representative or operating agency and aerodrome authority, if applicable, for subsequent coordination with the aircraft concerning clinical details and aerodrome preparation. Depending on the communications facilities available to the airline representative or operating agency, it may not be possible to communicate with the aircraft until it is closer to its destination. Apart from the initial notification to the ATS unit whilst en-route, ATC communications channels are to be avoided.

Note 3.— The information to be provided to the departure aerodrome will prevent the potential spread of communicable disease, or other public health risk, through other aircraft departing from the same aerodrome.

Note 4.— AFTN (urgency message), telephone, facsimile or other means of transmission may be used.

Appendix 2 – Annex 14 (Volume 1) Excerpts

9.1.1 An aerodrome emergency plan shall be established at an aerodrome, commensurate with the aircraft operations and other activities conducted at the aerodrome.

9.1.2 The aerodrome emergency plan shall provide for the coordination of the actions to be taken in an emergency occurring at an aerodrome or in its vicinity.

Note 1.— Examples of emergencies are: aircraft emergencies, sabotage including bomb threats, unlawfully seized aircraft, dangerous goods occurrences, building fires, natural disaster and public health emergencies.

Note 2.— Examples of public health emergencies are increased risk of travellers or cargo spreading a serious communicable disease internationally through air transport and severe outbreak of a communicable disease potentially affecting a large proportion of aerodrome staff.

9.1.3 The plan shall coordinate the response or participation of all existing agencies which, in the opinion of the appropriate authority, could be of assistance in responding to an emergency.

Note 1.— Examples of agencies are:

- on the aerodrome: air traffic control units, rescue and firefighting services, aerodrome administration, medical and ambulance services, aircraft operators, security services, and police;*
- off the aerodrome: fire departments, police, health authorities (including medical, ambulance, hospital and public health services), military, and harbour patrol or coast guard.*

Note 2.— Public health services include planning to minimize adverse effects to the community from health-related events and deal with population health issues rather than provision of health services to individuals.

ICAO

World Health
Organization

Joint Statement on COVID-19

On 31 December 2019, an outbreak of pneumonia of unknown etiology was reported in Wuhan City, Hubei province of the People's Republic of China. On 9 January 2020, Chinese authorities reported that the cause of this viral pneumonia was initially identified as a new coronavirus, which is different from any other human coronavirus discovered so far. The disease has subsequently been named as COVID-19.

Following the advice provided by the Emergency Committee convened under the International Health Regulations (IHR (2005)), on 30 January 2020, the Director-General of the World Health Organization (WHO) declared the outbreak of COVID-19 to constitute a Public Health Emergency of International Concern (PHEIC) and issued a set of Temporary Recommendations.

WHO is working closely with global experts, governments and partners to understand this new virus, to track its spread and virulence, and to provide advice to countries and the global community on measures to protect health and prevent the spread of this outbreak.

The International Civil Aviation Organization (ICAO) issued two electronic bulletins and a State letter to highlight ICAO's role in providing aviation-related information on COVID-19, and in serving as the key facilitator for States and organizations that are members of the ICAO Collaborative Arrangement for the Prevention and Management of Public Health Events in Civil Aviation (CAPSCA) programme to implement effective collaboration and coordination with all stakeholders. ICAO is also working with governments and industry partners, such as the International Air Transport Association (IATA) and Airport Council International (ACI), to provide guidance to aviation authorities, airlines and airports on appropriate measures aimed to protect the health of the travelling public and reduce the risk of transmission.

ICAO and WHO remind all stakeholders of the importance of following existing regulations and guidance, particularly the relevant standards contained within the various Annexes to the Convention on International Civil Aviation and the International Health Regulations (2005). Cross-sector collaboration at the national level is also important, and in this regard, States are reminded to coordinate between aviation and health authorities and to establish National Facilitation Committees that comprise all relevant groups, in line with ICAO guidelines.

ICAO

WHO has advised countries to institute public health measures proportionate to the public health risks and consistent with the International Health Regulations (IHR (2005)). WHO has also underlined the importance of travellers' awareness in preventing the transmission of COVID-19.

Building from past experiences with communicable disease outbreaks, WHO, ICAO and aviation industry organizations have developed extensive guidelines, toolkits and response plans to support governments, passengers, and the aviation industry in mitigating risks.

Intense international cooperation and coordination, between governments and other agencies as well as between the public and private sectors, is on-going and should be strengthened as needed going forward.
