## ICAO ADS-B WEBINAR

1 September 2021

### THALES

Thales is the world leader in air mobility solutions. An impressive 2 out of every 3 planes around the world land and take-off with the help of Thales. We combine half a century's experience in development and deployment with an unrivalled worldwide installed base, advanced technology and ground-breaking innovations to deliver solutions that are continually adapted to the ever-changing aviation system's needs. Thales offers integrated gate-to-gate solutions, from pre-flight to landing, ensuring airport safety, efficient traffic handling operations, data sharing on aircraft and seamless handover operations between territories. Thales is trusted by key ATM decision makers across 180 nations, and helps key decision makers master complexity and make timely decisions for better outcomes. Thales delivers efficient and innovative products and services, for better decisions and better results.

### AIREON

Aireon operates the first ever, space-based air traffic surveillance system for Automatic Dependent Surveillance-Broadcast (ADS-B) equipped aircraft throughout the entire globe. Aireon harnesses next-generation aviation surveillance technologies that were formerly ground-based and extends their reach throughout the world to significantly improve efficiency, enhance safety, reduce emissions and provide cost savings benefits to all stakeholders. Aireon's high-fidelity, low-latency surveillance data is available for various applications, allowing aerospace industry partners access to revolutionary data capabilities that enhance asset tracking, aircraft situational awareness and decision support analytical tools. In partnership with leading ANSPs from around the world, like NAV CANADA, Enav, NATS, the Irish Aviation Authority (IAA) and Navair, as well as Iridium Communications, Aireon provides global, real-time, space-based aircraft data for enhanced air traffic surveillance, innovation and analytics.

### The Second Research Institute of Civil Aviation Administration of China (CASRI)

The Second Research Institute of Civil Aviation Administration of China is a scientific research institute specializing in the application and development of high and new technology in the civil aviation industry of China. Its predecessor is the Scientific Research Institute of CAAC. It was established in Beijing on December 11, 1958. It is mainly engaged in civil aviation information management system, air traffic management system, ADS-B system, A-SMAGCS, Multilateration system. Airport weak current system, aviation chemical products, agricultural and forestry aviation products design, application results cover the major airports nationwide and over 50 countries abroad
