

ICAO

Second Meeting of the Asia/Pacific Wildlife Hazard  
Management Working Group (AP-WHM WG/2)

*Virtual Meeting, 27 to 29 May 2020*

---

**Agenda Item 3: Global, Regional and National Guidance/Best Practices on  
Wildlife Hazard Management**

**SUBMISSION OF WILDLIFE STRIKE REPORTS TO ICAO**

(Presented by Secretariat)

**SUMMARY**

This paper presents the new submission formats for wildlife strike reports to ICAO.

**1. INTRODUCTION**

1.1 The ICAO Bird Strike Information System (IBIS) was created to collect and disseminate information on wildlife strikes to aircraft. Using the reports collected from States, ICAO performs routine analyses of wildlife strike data which can reveal trends that will assist aerodrome operators in identifying areas of concern, to be addressed through a well-managed wildlife control programme.

1.2 As the analyses are dependent on reports from States, it is of utmost importance that the reports are submitted in the specified formats so as to facilitate subsequent work.

**2. DISCUSSION**

ICAO Standards on Wildlife Strike Hazard Reduction

2.1 ICAO Annex 14, Volume I has the following Standards on wildlife strike hazard reduction:

9.4.1 The wildlife strike hazard on, or in the vicinity of, an aerodrome shall be assessed through:

- a) the establishment of a national procedure for recording and reporting wildlife strikes to aircraft;
- b) the collection of information from aircraft operators, aerodrome personnel and other sources on the presence of wildlife on or around the aerodrome constituting a potential hazard to aircraft operations; and
- c) an ongoing evaluation of the wildlife hazard by competent personnel.

9.4.2 Wildlife strike reports shall be collected and forwarded to ICAO for inclusion in the ICAO Bird Strike Information System (IBIS) database.

2.2 In accordance with the aforementioned Standards, States are requested to submit wildlife strike reports to ICAO on a routine basis.

2.3 The last cycle of ICAO Wildlife Strike Analyses was conducted for 2008 – 2015 and is contained in ICAO Electronic Bulletin (EB) 2017/25 (**Attachment A**).

New Submission Formats

2.4 In order to better facilitate occurrence reporting and data analysis, as announced in ICAO EB 2017/25, ICAO has replaced the old IBIS computer application with a new reporting system based on the European Co-ordination Centre for Accident and Incident Reporting Systems (ECCAIRS) platform. A User Manual and Software Installation Manual of ECCAIRs is available at <http://www.icao.int/ibis> for States interested in the platform.

2.5 States are requested to submit the wildlife strike reports either through ECCAIRS .e5f files, or through an ECCAIRS Excel-based form that can be downloaded at <http://www.icao.int/ibis>. The files should be sent to the following email addresses:

[wildlife@icao.int](mailto:wildlife@icao.int), [icaohq@icao.int](mailto:icaohq@icao.int), [aoi@icao.int](mailto:aoi@icao.int), and [iaa@icao.int](mailto:iaa@icao.int)

2.6 A State Letter with reference **T 11/5.6 – AP043/20 (AGA)** was issued on 2 March 2020 regarding the same issue. The State Letter is available in **Attachment B**.

2.7 To further enhance the awareness on this issue, the following Draft Conclusion is prepared by AP-WHM WG/2 and approval by APANPIRG/31 after its endorsement by AOP/SG/4:

<b>Draft Conclusion AP-WHM WG/2-X: Submission of Wildlife Strike Reports</b>	
<b>What:</b> That, States are requested to submit wildlife strike reports to ICAO in the format of either ECCAIRS .e5f files or an ECCAIRS Excel-based form.	<b>Expected impact:</b> <input checked="" type="checkbox"/> Political / Global <input type="checkbox"/> Inter-regional <input type="checkbox"/> Economic <input type="checkbox"/> Environmental <input checked="" type="checkbox"/> Ops/Technical
<b>Why:</b> To facilitate wildlife strike occurrence reporting and data analysis	<b>Follow-up:</b> <input checked="" type="checkbox"/> Required from States
<b>When:</b> 9-Sep-20	<b>Status:</b> Draft to be adopted by PIRG
<b>Who:</b> <input checked="" type="checkbox"/> Sub groups <input checked="" type="checkbox"/> APAC States <input checked="" type="checkbox"/> ICAO APAC RO <input type="checkbox"/> ICAO HQ <input type="checkbox"/> Other: Nil	

**3. ACTION BY THE MEETING**

3.1 The meeting is invited to:

- a) note the information contained in this paper;
- b) discuss and endorse the Draft Conclusion contained in paragraph 2.7; and
- c) discuss any relevant matters as appropriate.

International Civil Aviation Organization

## ELECTRONIC BULLETIN

For information only

EB 2017/25

12 May 2017

### 2008 - 2015 WILDLIFE STRIKE ANALYSES (IBIS)

The analyses of wildlife strike reports for the years 2008 to 2015 are based on 97 751 reports, received from ninety-one States on strikes occurring in 105 States and territories as shown at Attachment A. A summary of wildlife strikes reported to the ICAO Bird Strike Information System (IBIS) for the years 2008 to 2015 is included at Attachment B, IBIS World Wildlife Strike Statistics at Attachment C and a list of wildlife types at Attachment D. The above attachments (available in English only) can be found at [www.icao.int/IBIS](http://www.icao.int/IBIS).

The analyses of wildlife strike data and observing and monitoring of wildlife activities can reveal trends that will assist airport authorities in identifying areas of concern, which should be addressed through a well-managed wildlife control programme. Wildlife strike statistics can also be analysed to determine those times of year or day when wildlife control is needed the most.

In order to better facilitate occurrence reporting and data analysis, ICAO now has replaced the old IBIS computer-application with a new reporting system based on the European Co-ordination Centre for Accident and Incident Reporting Systems (ECCAIRS) platform. A User Manual and Software Installation Manual can be downloaded at [www.icao.int/IBIS](http://www.icao.int/IBIS). States are encouraged to submit wildlife strike reports either via ECCAIRS e5f/e4f files, or via an ECCAIRS Excel-based form that can also be downloaded at [www.icao.int/IBIS](http://www.icao.int/IBIS).

#### Enclosures:

- A — List of States and Territories for the years 2008 - 2015
- B — Summary of Wildlife Strikes reported to ICAO Bird Strike Information System (IBIS) for the years 2008 - 2015
- C — IBIS World Wildlife Strike Statistics 2008 - 2015
- D — List of wildlife types for the years 2008 - 2015

Issued under the authority of the Secretary General

ATTACHMENT A to EB 2017/25

LIST OF STATES AND TERRITORIES FOR THE YEARS 2008 - 2015

*States Reporting (91 States)*

Angola	Japan	South Korea
Armenia	Jordan	Spain
Australia	Kenya	Sri Lanka
Austria	Kyrgyzstan	Sweden
Bahrain	Latvia	Switzerland
Bangladesh	Lebanon	Tanzania
Barbados	Macedonia	Thailand
Belarus	Madagascar	Togo
Belgium	Maldives	Tonga
Bolivia	Malta	Trinidad & Tobago
Bosnia and Herzegovina	Mauritius	Tunisia
Brazil	Mexico	Turkey
Cameroon	Mongolia	Uganda
Cape Verde	Montenegro	Ukraine
Chile	Morocco	United Arab Emirates
China	Myanmar	United Kingdom
Croatia	Nepal	United States
Dominican Republic	New Zealand	Uruguay
Ecuador	Nicaragua	Uzbekistan
El Salvador	Nigeria	Venezuela
Estonia	Oman	
Fiji	Pakistan	
Finland	Paraguay	
France	Peru	
Georgia	Philippines	
Germany	Poland	
Greece	Portugal	
Hong Kong	Qatar	
India	Republic of Korea	
Indonesia	Republic of Moldova	
Iran	Romania	
Ireland	Russian Federation	
Israel	Rwanda	
Italy	Saudi Arabia	
Jamaica	Singapore	
Japan	Slovakia	

*States/Territories of Occurrence (105 States)*

Algeria	Finland	Norway
Argentina	French Antilles	Panama
Angola	French Guyana	Peru
Armenia	French Polynesia	Philippines
Australia	Gabon	Portugal
Austria	Germany	Puerto Rico
Bahamas	Greece	Reunion
Bahrain	Guinea	Romania
Belize	Haiti	Russian Federation
Belgium	Honduras	Saudi Arabia
Benin	Hong Kong	Senegal
British Virgin Islands	Hungary	Sierra Leone
Bolivia	Ireland	Singapore
Burkina Faso	India	Slovenia
Cambodia	Indonesia	Sri Lanka
Cameroon	Israel	Spain
Canada	Italy	Sweden
Canary Islands	Ivory Coast	Switzerland
Chad	Japan	Thailand
Chile	Kenya	Togo
China	Korea, South	Tunisia
Croatia	Latvia	Turkey
Colombia	Lebanon	Turks and Caicos Islands
Congo, the Republic of	Madagascar	Uganda
Congo, the Democratic Republic of	Malaysia	United Arab Emirates
Costa Rica	Mali	United Kingdom
Cyprus	Mariana Islands	United States of America
Czech Republic	Marshall Islands	Uruguay

**ATTACHMENT B to EB 2017/25**

**SUMMARY OF WILDLIFE STRIKES REPORTED TO THE ICAO BIRD STRIKE INFORMATION SYSTEM (IBIS) FOR THE YEARS 2008 - 2015**

**1. INTRODUCTION**

1.1 The ICAO Bird Strike Information System (IBIS) was created to collect and disseminate information on wildlife strikes to aircraft.

1.2 This statistical summary is intended to provide the reader with an overview of the global wildlife strike situation, as reported to ICAO for the years 2008 to 2015. It supplements the IBIS World Statistics in Attachment D to this Electronic Bulletin.

**2. STATISTICAL ANALYSIS FOR THE YEARS 2008-2015**

2.1 *Wildlife strikes at Global Level:* The previous data period covered the years 2001 to 2007, seven years in total. This data period covers the years 2008 to 2015, eight years in total. Although the change in data period is only of one year, the number of wildlife strikes reported to ICAO has increased significantly from 42 508 to 97 751. The global trend in terms of wildlife strike characteristics remains to be very similar, as shown further within this document.

2.2 *Wildlife strikes by ICAO Region:* For the years 2008 to 2015, the 97 751 wildlife strikes were reported to ICAO by 91 States. These occurred in 105 States and Territories throughout the world. Charts 1 and 2 below illustrate a comparison between the number of States and Territories of occurrence and States reporting, and reported strikes distributed by the Region in which they occurred.

Chart 1: States/Territories of Occurrences and States Reporting

Chart 2: Strikes reported distributed by Region in which they occurred

2.3 **When the wildlife strikes occurred:** 68 per cent of the bird strikes occurred during the day and 25 per cent occurred at night time, as illustrated in Chart 3.

Day time remains to be the highest activity of wildlife strikes when compared with the previous data period 2001 to 2007. Although there is a sharp increase in the data gathered from 2008 to 2015 with twice the amount of wildlife strikes both during daytime and at night time, the pattern remains the same in terms of wildlife strikes in relation to the time of the day.

Chart 3: Light Conditions for Wildlife Strikes in 2008-2015 and Comparison

Although wildlife strikes occurred throughout the year, the busiest months are May through October, as illustrated in Chart 4. The months with the least reported number of wildlife strikes are January and February. August remains to be the month of the highest wildlife strike activity for both of the data periods of 2001 to 2007 and 2008 to 2015, which follow a similar pattern as shown below. This monthly distribution also reflects the fact that the majority of the wildlife strikes were reported by States located in the Northern Hemisphere.

Chart 4 : Strikes reported according to season

2.4 **Where the wildlife strikes occurred:** Chart 5 illustrates that 91 per cent of the strikes for which location data was furnished occurred on or near the aerodrome. 31 per cent of these occurred during the take-off phase while 59 per cent occurred during the approach and landing phase. A similar pattern is followed, as compared with 2001 to 2007 data period.

Chart 5: Strikes reported according to flight phase

2.5 **Damage to the aircraft:** The extent of damage to the aircraft was coded for 33 376 wildlife strikes, which is approximately 34 per cent of the total number of strikes reported. Of the wildlife strikes for which the damage was coded, seventeen aircraft were destroyed, 600 caused substantial damage to the

aircraft, 1 874 caused minor damage and 30 817 or approximately 92 per cent caused no appreciable damage.

2.6 **Wildlife types most frequently struck:** The wildlife type was reported in 47 748 cases. Most frequently struck species were: American Mourning Dove with 2 634 strikes which represents 6 per cent, then Barn Swallow with 2 592 strikes or 5.4 per cent, Gulls with 2 128 strikes or 4.5 per cent, Eurasian Kestrel with 1 923 strikes or 4 per cent and Killdeer with 1 773 strikes or 3.7 per cent. Mammals including bats, and non-flying including hares account for 2 378 or 5 per cent of total known occurrences. The percentages of wildlife types struck are shown in Chart 6.

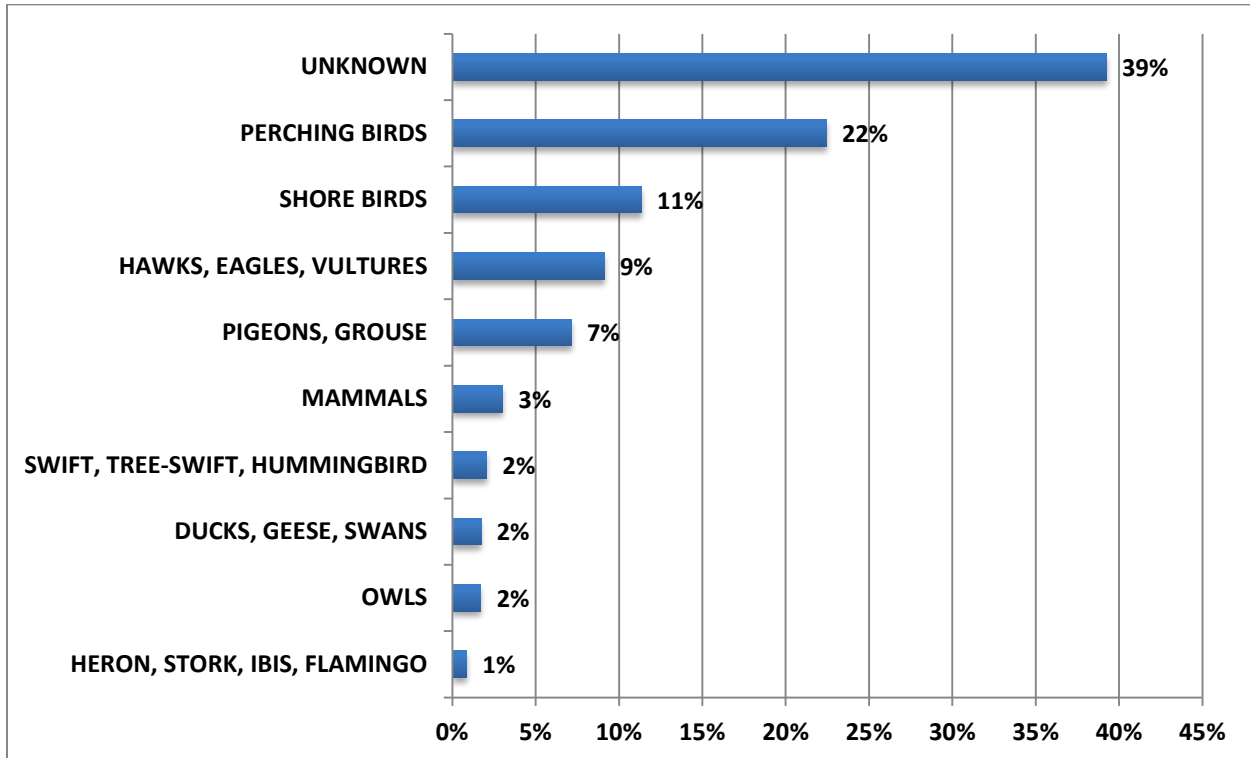

Chart 6: Comparison between wildlife struck among species

2.7 **Effects of the wildlife strike on flight:** The effect of the wildlife strike on the flight was reported 12 227 times. Out of those, 2 501 had a clear indication of an effect on the flight, while the rest had no effect or no clear indication. These 2 501 cases represent 20 per cent of the total number in which the effects were reported. There were 1 230 precautionary landings, which account for the highest number of effects. The effects also include 513 cases of aborted take offs and 63 cases of engine(s) being shut down. The other category includes but is not limited to flight delay, declaring technical emergency and aircraft return. Delayed flights were reported 211 times followed by declaring technical emergency 54 times and aircraft forced to return 137 times. Chart 7 shows the percentages of different effects of wildlife strikes on flights.

Chart 7: Effects on Flight

2.8 ***Parts of Aircraft Struck and/or Damaged:*** Parts of aircraft struck were reported 56,093 times. A 44 per cent increase compared to previous period of 2001 to 2007. The part struck most, as reported, remains to be the Windshield, with 8 296 strikes followed by the Wings with 7 955 strikes and then by the nose with 7 756 strikes. The following illustrations show the percentages of the parts struck by wildlife. Chart 8 illustrates the percentages of parts struck by wildlife. Chart 9 illustrates the percentages of the parts damaged by wildlife strikes. Chart 10 illustrates the comparison between the parts struck and the parts damaged by wildlife strikes.

Chart 8: Parts of Aircraft Struck

Chart 9: Parts of Aircraft Damage

Chart 10: Comparison with Parts of Aircraft Damage and Struck

2.9 Table 1 below provides a brief summary of wildlife strike characteristics for the data periods of 2001 to 2007 and 2008 to 2015.

<b>Data Comparison 2001-2007 to 2008-2015</b>		
	<i>2001-2007</i>	<i>2008-2015</i>
No. of States Reporting	51	91
No. of States/Territories of Occurrence	145	105
No. of Strikes	42 508	97 751
Day Time Strikes	63%	68%
Night Time Strikes	24%	25%
Peak Month Activity	12% (August)	14% (August)
Strikes during Takeoff	39%	31%
Strikes during Approach	40%	33%
Strikes during Landing	17%	26%

Ref.: T 11/5.6 – AP043/20 (AGA)

2 March 2020

**Subject:** Submission of Wildlife Strike Reports

**Action Required:** To submit wildlife strike reports using the specified method at your earliest convenience and not later than **1 May 2020**

Sir/Madam,

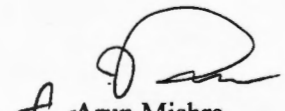

I have the pleasure to draw your attention to the new methods for submissions of wildlife strike reports.

In order to better facilitate occurrence reporting and data analysis, as announced in ICAO Electronic Bulletin 2017/25 (**Attachment A**), ICAO has replaced the old ICAO Bird Strike Information System (IBIS) computer application with a new reporting system based on the European Co-ordination Centre for Accident and Incident Reporting Systems (ECCAIRS) platform. A User Manual and Software Installation Manual of ECCAIRS can be downloaded at [www.icao.int/IBIS](http://www.icao.int/IBIS).

States are requested to submit the wildlife strike reports either via ECCAIRS .e5f files, or via an ECCAIRS Excel-based form that can also be downloaded at [www.icao.int/IBIS](http://www.icao.int/IBIS) (**Attachment B**).

It would be greatly appreciated if the wildlife strike reports for 2019 be sent to [wildlife@icao.int](mailto:wildlife@icao.int), [icaohq@icao.int](mailto:icaohq@icao.int), [aoi@icao.int](mailto:aoi@icao.int) and [iaa@icao.int](mailto:iaa@icao.int) at your earliest convenience and not later than **1 May 2020**.

Accept, Sir/Madam, the assurances of my highest consideration.

  
Arun Mishra  
Regional Director

**Attachments:**
