

# Discussion on future of SEA-BOB ADS-B WG

## Option 1: To be integrated with SURICG

- SEA/BOB ADS-B WG established since 2007 with 15 meetings held
  - ➔ have completed most of their objectives. On-going projects could be transferred to SURICG
  - ➔ SURICG can be expanded from 3 to 4 days to cater for integration
  - ➔ Streamlined meeting, secretariat and logistics arrangements, especially under global pandemic
- New working groups/task forces (e.g. GBAS, ATM Automation System) are established under CNS Sub-group
  - ➔ Needs to close working groups which have completed their objectives, and maintain a healthy APANPIRG structure

## Option 2 : To be continued

- An effective working group with focus on ADS-B matters and data-sharing projects
  - ➔ A smaller group structure with greater flexibilities
- On-going projects
  - ➔ New ADS-B data sharing projects
  - ➔ New technologies and new mode of ADS-B data sharing (e.g. SWIM over CRV)
  - ➔ Space-based ADS-B
- Could expand TOR (or rename) to cover wider scope other than SEA or BOB
- Should continue to report to CNS Sub-group via SURICG

# Discussion on future of SEA-BOB ADS-B WG

## Option 1:

To be integrated with SURICG

Supporting States / Administration

## Option 2 :

To be continued with revised TOR
